This product may only be used inside and within 100 feet of agricultural buildings and man-made agricultural structures.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

KILLS RATS, MICE & MEADOW VOLES*

Net Weight:
8 lbs (3.6kg)
86 x 1.5 oz (43g) Place Pacs

ACTIVE INGREDIENT:
Bromadiolone (CAS #28772-56-7): . . . . . . . 0.005%
OTHER INGREDIENTS†: . . . . . . . . . . 99.995%
†Contains Denatonium Benzoate  TOTAL 100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for First Aid and additional precautionary statements, and Directions For Use.
NOT TO PHYSICIAN

If swallowed or absorbed through the skin, this material may reduce the clothing ability of the blood and cause bleeding. If ingested, administered Vitamin K subcutaneously or orally. Repeat as necessary based on monitoring of prothrombin times.

TREATMENT FOR PET POISONING

For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K1. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions (bleeding or elevated prothrombin times), give Vitamin K1. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

ANTICOAGULANT BROMADIOLONE

Use only for the sites, pests, and application methods described on this label. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Where surface water is present or to intertidal areas below the mean high water mark. If bait can be shaken from bait stations when they are filled, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Keep out of reach of children, domestic animals and pets. Do not get in eyes or on clothing. Remove and wash contaminated clothing before reuse. All handlers (including application) must wear: shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

PRECAUTIONARY STATEMENTS

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Do not contaminate water, food or feed by storage or disposal. Do not sell this product in individual containers holding less than 8 pounds of bait.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Non-refillable container. Do not reuse or refill this container. [Plastic] Offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or by incineration.

Environmental Hazards

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsates.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label; read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

First Aid

If Swallowed
• Call a poison control center, doctor, or 1-877-654-2494 immediately for treatment advice.
• Have a person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

If In Eyes
• Hold eye open and rinse slowly and gently with water for 15–20 minutes.
• Remove contact lenses, if present, after the first few minutes, then continue rinsing eye.
• Call a poison control center, doctor, or 1-877-654-2494 immediately for treatment advice.

Note to Physician

If swallowed or absorbed through the skin, this material may reduce the clothing ability of the blood and cause bleeding. If ingested, administered Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

Caution

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals or birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. If bait can be shaken from bait stations when they are filled, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

Use Restrictions: This product may only be used to control the following rodent pests in and around agricultural buildings and man-made agricultural structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humulis), Golden mouse (Ochrotomys nuttalli), Polynesian rat* (Rattus exulans), Meadow vole* (Microtus pennsylvanicus), White-throated woodrat* (Neotoma albigula), Southern plains woodrat* (Neotoma micropus), and Mexican woodrat* (Neotoma mexicana). This product must be used in and within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Fence and perimeter baiting, beyond 100 feet from an agricultural structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Baiting with Hawk Rodenticide Ready-To-Use Place Pacs is prohibited.

Do not use in homes or human residences. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. Do not broadcast bait. When used in USDAA inspected facilities, this product must be applied in tamper-resistant bait stations.

Do not sell this product in individual containers holding less than 8 pounds of bait.

Selection of Treatment Areas: Determine areas where rats, mice, or meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rats, mice, or meadow voles* or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

Application Directions:

Rate: Apply 2 to 10 Place Pacs (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days.

Mice and Meadow Voles* Place 1 Place Pac at 8 to 12 feet intervals in infested areas. Maintain an uninterrupted supply of fresh bait for at least 15 days.

Follow-Up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of no rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Upland mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

Printed at 115% size on this 11" x 8.5" sheet
TREATMENT FOR PET POISONING
If animal eats bait, call veterinarian at once.

NOTE TO VETERINARIAN
Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.
