HAWK® All-Weather BAIT CHUNX®
KILLS WARFARIN RESISTANT NORWAY RATS

**Pesticide**

**Net Weight:** 9 lbs (4.1 kg)

This product is extremely toxic to fish, birds and other wildlife. Dogs and predatory and scavenging mammals and birds might be poisoned if they feed on bait that has been contaminated. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rainwater.

**For Use On:**
- Rodents
- Outdoor, above-ground use
- Bait stations are mandatory for outdoor, above-ground use.

**Labeled Use Areas:**
- Classified areas where there is a risk of rodent contamination and where it is not feasible to keep rodents away from bait. Generally these areas are along walls, by ground openings, in crevices and enclosed spaces, between structural members, in or near livestock areas and on eat and chews areas that have been seen. Baited brant from sea and air.

**Application Directions:**
- Place 3 to 16 bait blocks (at intervals of 15 to 30 feet) per placement in infested areas. Two blocks may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

**Storage and Disposal:**
- Do not contaminate water, food or feed storage areas or disposal.
- Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets.

**Waste Disposal:**
- Not for use in Georgia, Hawaii, Minnesota, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Rhode Island, South Carolina, South Dakota, Vermont, Washington and Wisconsin.

**CAUTION:**
- Harmful if swallowed or absorbed through the skin. Avoid contact with skin or eyes.
- Wash hands thoroughly after applying bait and before eating, drinking or smoking. Avoid skin contact and wash hands with soap and water under running water after handling this product.

**Dispersal:**
- See back panels for First Aid and additional precautionary statements.

**OTHER INGREDIENTS:**
- Contains Denatonium Benzoate.

**ACTIVE INGREDIENT:**
- Bromadiolone (CAS #28772-56-7): 0.005%

**TOTAL 100.000%**

**Use Restrictions:**
- This product can only be used to control Norway rats, roof rats and house mice in and within 100 feet of agricultural buildings and man-made agricultural structures.

**Application Directions:**
- Bait stations are mandatory for outdoor, above-ground use. Generally these areas are along walls, by ground openings, in crevices and enclosed spaces, between structural members, in or near livestock areas and on eat and chews areas that have been seen.

**Directions for Use:** (Continued from other panel)

**First Aid:**
- If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. Prompted, additional Hemorhin is recommended and only. Report is necessary based on severity of poison.

**NOTES TO PHYSICIAN:**
- The solution of rapid blood in use or the product is a minor treatment with the labelling.

**TREATMENT FOR PET POISONING:**
- See back panels for First Aid and additional precautionary statements.

**Storage and Disposal:**
- Do not store at temperatures below 50°F or above 100°F. Avoid direct sunlight and freezing. Do not store near heat sources.

**Disposal:**
- Nonrefillable container. Do not reuse or refill this container. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas.
