KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panels for First Aid and additional precautionary statements.
Do not sell this product in individual containers holding less than 4 pounds of bait.

HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE

IF SWALLOWED:
• Meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. They will eat both fresh and raw meat. Remove as much alternative food as possible.

APPLICATION DIRECTIONS
Each TOMCAT All-Weather Rodent Block consists of a one-pound slab scored to be broken into sixteen-1 oz. pieces.=

RATS: Break and apply in 4-16piece(s) of bait at intervals of 15 to 30 feet per placement. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole* activity cease.

FOSSILS: Each placement must be securely anchored in place. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

PRECAUTIONARY STATEMENTS
This product is toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff from treated areas may also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water bodies or irrigation equipment with this product.
