"No-Rinse" Sanitizer for Kitchenware Sanitization and Low Temperature Dishmachine Use.

GENERAL INFORMATION
This product is one of the high quality components that make up the "ENERGY-SAVVY" product system. It is a specialty of high efficiency, high quality Hypochlorite solution that is specifically formulated for use in low temperature dishmachine applications. This product is one of the two most important components of the "ENERGY-SAVVY" system. It should be applied as a no-rinse sanitizer to all contact surfaces and equipment. This product provides instant clean release for rapid sanitizing action when used as directed. It promotes free draining and prevents food from contamination.

USE BILJION:

Low Temperature Dishmachine:
1 oz. to 5 gallons (50 psi)
2 oz. to 5 gallons (100 psi)

Refrigeration:
0.5 oz. to 5 gallons (50 psi)

Maximum concentration: 0.30%

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

NOTE: This product is a degreaser and has been developed to increase effectiveness of other Phase 1 products. Application timing and dosage should be determined by the user.

PRE-RINSE AND INITIAL RINSE:
1. Pre-Rinse utensils and glassware with detergent.
2. Wash in high-temperature wash machine.
3. Rinse in high-temperature wash machine.
4. Sanitize in a 1 oz. to 5 gal solution (50 psi). Increase the temperature to at least 90°F.
5. Rinse in high-temperature wash machine.

LOW-TEMPERATURE WASHWASH SANITIZATION

1. Pre-Rinse wash machine before washing.
2. Rinsing in a 1 oz. to 5 gal solution (50 psi). Increase the temperature to at least 90°F.
3. Wash using a recommended low-temperature formula.
4. Sanitize using a recommended low-temperature formula. Do not use swab swab in over filling.
5. Rinse in high-temperature wash machine.

SANITIZER E.S.
Liquid Sodium Hypochlorite

ACTIVE INGREDIENT(S):
Sodium Hypochlorite 6.47%
Total Hypochlorite 12.94%

KEEP OUT OF REACH OF CHILDREN

DANGER
