DILUTION: 1-2 drops per quart of water (560 ppm quat) This product is not to be used as a terminal sterilant level disinfectant on any surface or instrument that is (1) introduced directly into the human body, either into or in contact with the bloodstream or normal sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normal sterile areas of the body. This product may be used to pretreat or decontaminate critical or semi-critical devices prior to sterilization or high-level disinfection.

DISINFECTION/CLEANING/DEODORIZING DIRECTIONS: Remove heavy soil deposits from surfaces. Then thoroughly wet surface with a solution of 1/3 oz of concentrate per gallon of water or equivalent. (Use 2 oz per gallon of water to kill Adenovirus Type 7.) The use solution can be applied with a cloth, mop, sponge, or coarse spray, or by spraying. For spray applications, use coarse spray. Dry 6-8 inches from the surface, rub with a cloth, mop, or sponge, or do not dry. Let product sit on surface for 10 minutes. Rinse or allow to air dry. Rinse floors if necessary unless they are to be waxed or polished. Do not use on unsealed stone. Do not spray directly on water. This product must not be used to clean the following contact food surfaces: utensils, glassware and dishes. For Human Coronavirus, treated surfaces must remain wet for 1 hour. Wipe dry with a clean cloth, sponge or mop or allow to air dry.

For Influenza Virus Type A, treated surfaces must remain wet for 2 minutes. Wipe dry with a clean cloth, sponge or mop or allow to air dry.

BACTERIAL STABILITY OF USE: DILUTION: Test confirmed for Buckeye Sanicare Quat 256 when diluted in 200 ppm water (v/v use of a 1:200 dilution) remains effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica for up to one hour when stored in covered containers such as a spray bottle. It becomes visibly dirty or contaminated, the use dilution must be discarded and fresh product prepared. Always check expiration date when diluting this product. The stability of the use-dilution does not apply to open containers such as buckets or pails.

FUNGICIDAL DIRECTIONS: For use in areas such as locker rooms, dressing rooms, showers and bathtubs and exercise facilities follow disinfection directions.

MILDERTAC STATIC INSTRUCTIONS: Will effectively control the growth of mold and mildew plus the odor caused by them when applied to hard, nonporesurfaces such as walls, floors, and table tops. Apply the stated amount of 4% per gallon of water with a cloth, mop, sponge or coarse spray. Make sure to wet all surfaces completely. Let air dry. Repeat application weekly or soon after growth reappears.

CLEANING AND DISINFEETING HARD NONPOROUS SURFACES ON PERSONAL PROTECTIVE EQUIPMENT (RESPIRATOR): Pretreatment of equipment to be disinfected to 20 ppm Buckeye Sanicare Quat 256 to obtain surface contact. Add 1/4 oz of Buckeye Sanicare Quat 256 to one gallon of water. Use 2 oz per gallon of water to kill Adenovirus Type 7). Gently mix by a uniform solution. Allow to sit for 5 minutes. Then rinse the respirator with a cloth, coarse spray device, sponge or by immersion. Thoroughly wet all surfaces to be disinfected. Treated surfaces must remain wet for 10 minutes. Remove excess solution from equipment prior to storage.

COMPLIES with all OSHA regulations for cleaning respiratory protection equipment (29 CFR § 1910.144). EPIDEMIOLOGIC STUDIES IN HUMAN SUBJECTS (1994) (HIV), (HEPATIC: HEPATITIS B VIRUS (HVB) OR HEPATITIS C) (HCV) ON PRE-CLEANED, ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type I (HIV-1) (associated with AIDS) or Hepatitis B Virus (HVB) or Hepatitis C Virus (HCV).

Special Instructions for Cleaning and Disinfection against HIV-1 (AIDS Virus) or HBV or HCV of Surfaces/Objected Soiled with Blood/Blood Flows: Personal Protection: Disposable protective gloves, gowns, face masks, or eye coverings must be worn during all cleaning of blood/body fluids and during decontamination procedures. Cleaning Procedures: Blood/body fluids must be thoroughly cleaned from surfaces/objects before application of disinfectant. Contact Time: HIV-1 (AIDS virus) is inactivated after a contact time of 4 minutes at 25°C (77°F) (room temperature). HBV and HCV are inactivated after 10 minutes contact time. Use a 10-minute contact time for other viruses, fung, and bacteria listed. Disposal of Infectious Materials: Blood/body fluids must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals: DANGER. CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear protective eye gear, (goggles), face protection (respirator, safety glasses), protective clothing and protective gloves (rubber or chemical resistant). Harmful if inhaled. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Skin: rinse immediately with plenty of water for 15-20 minutes. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Remove from ambience. Get fresh air. Use an facemask or respirator. Give 2 liters of oxygen if breathing 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. IF SKIN IS EXPOSED: Wash in plenty of water for 15 minutes. Call a poison center or doctor for treatment advice. Rinse with plenty of water for 15 minutes. Ask person you are caring for a poison control center or doctor for treatment advice.IF EXPOSED TO DUST, Fume, Mist, Spray, or Vapour: Remove to fresh air. Call a poison control center or doctor for treatment advice. Note to Healthcare Provider: Probable respiratory irritant. This product is nonflammable. Contains quaternary ammonium compounds. Against respiratory irritant. Inhalation of high concentrations of this product may cause irritation of the mucous membranes. Inhalation of this product may cause irritation of the mucous membranes.

ENVIRONMENTAL HAZARDS: Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless permitted by the authority having jurisdiction. This product is not compatible with certain types of equipment, will react with one or more ingredients. Incompatible with: Acetone, alcohols, ammonia, bilirubin, carboxylic acids, caustics, chlorates, chlorophenol, dilute acids, dilute bases, ethylene dichloride, ethylene glycol, formaldehyde, hydrogen peroxide, ketones, methylene blue, mercuric chloride, nitrogen oxides, nitric acid, nitrous acid, oxidizing agents, peracids, peroxides, salicylates, sodium hypochlorite, sodium perborate, sodium percarbonate, sulfites, tartrates, thiourea, toluene, tray washers, ultrasonic cleaners, wetting agents.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage: Oerman storage is prohibited. Store in original container in an area inaccessible to children.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray drift, or spills is a violation of Federal law. If these wastes cannot be disposed of by use according to the section instructions, contact your State Pesticide or Environmental Control Agency. or the local waste hauler or the Regional Office for guidance.

Container Disposal: Nonreturnable container. Do not reuse or refill this container. Clean container properly before disposal. If plastic container is full with water, completely empty the container. Agitate vigorously, and dispose of rinsate consistent with disposal instructions. Repellent two more times. Then offer for recycling if available or discard and dispose of in sanitary landfill or by other procedures approved by state and local authorities. Follow pesticide disposal instructions for rinsates. If not in compliance these containers are acute hazardous wastes and must be disposed of in accordance with local, state, and federal regulations.

KEEP OUT OF REACH OF CHILDREN

See sides panel for Precautionary Statements and First Aid.
