Personal Protection: Disposable protective gloves, gowns, face masks, or eye coverings, as appropriate, must be worn during all cleaning of body fluids, blood and decontamination procedures. Cleaning Procedures: Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant. Use a ten (10) minute contact time for disinfection against all other bacteria, fungi and viruses claimed. Disposal of Infectious Materials: Blood and other body fluids must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.
