DIRECTIONS FOR USE

GENERAL PRECAUTIONS AND RESTRICTIONS

This product is not to be used as a terminal high or high level disinfectant on any surface or instruments that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contact intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise act on normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

TO START: Remove large cover from container and discard seal. From center of sterile roll, pull up a sterile corner, hold it in place and spread to about 180°. Remove towel off of center and discard. When using, keep small center core closed to prevent moisture loss.

TO CLEAN, DECONTAMINATE, AND DISINFECT: Remove gross dirt and soil. Thoroughly wet the surface with a Dicosol Ultra Disinfecting Towelette and allow to remain wet for the required contact time.

Enhanced copy for State Review

Healthcare for Disinfection and Decontamination of: inanimate, hard, non-porous surfaces such as cabinets, stools, countertops, drawer pulls, door knobs and handles, carts, baskets, tables, cabinets, lighting fixtures, basins, beds, railings, physical therapy equipment, shower stalls, toilet exteriors and interior seats, telephones and other related hard surfaces in hospitals, operating and surgical rooms, intensive and critical care units, emergency units, dental and veterinary offices, surgery, recovery, anesthesia, X-Ray, Cat Lab, shore collection and donation centers, isolation units, orthopedics, neonatal nursery, respiratory therapy, radiology, pediatrics, physical therapy, rehabilitation, optometry, optometry, hospital, central supply, emergency medical vehicles, police and fire vehicles, correctional facilities, funeral homes, morgues, spas, health clubs, salons, schools and school medical facilities, school buses, day care and non-contact medical surfaces.

Special Instructions for Disinfection and Decontamination of: inanimate, hard, non-porous kitchen/food service and bathroom surfaces such as counter tops, drawer pulls, carpet, baskets, tables, cabinets, door knobs and handles, appliance exteriors, shower stalls, toilet interiors and toilet seats, bathroom and living fixtures, sinks, flooring, walls, vanities, diaper pails, trash cans, telephones, shopping carts, child-restraint seats, exercise and weight-training equipment, office equipment, computer screens and key pads, telephones, cell phones, and other related hard, non-contact surfaces.

Use on stainless steel, glass, terrycloth and other similar surfaces. Use care when using stainless surfaces or plexiglass. Do not use as a baby wipe. Discard towel after use.

*Washable Apartment: Dicosol Ultra Disinfecting Towelettes are effective against the following viruses in 30 seconds or one minute when used according to label directions on hard, non-porous environmental surfaces: MRSA, VRE, Avian Influenza A (H3N2) strain, Influenza A (Hong Kong strain), Pandemic 2009 H1N1, influenza A virus (formerly called swine flu), RES, EBV, HIV, Human coronavirus, H1N1, Adenovirus type 1, and Hepatitis Simplex virus type 2.

**Viruses:** HIV-1, HIV-2, and HCV on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of non-movable surfaces/objects with animal or human blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDs), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).

PERSONAL PROTECTION: Wear disposable outer gloves, protective goggles, face mask and eye covering, as appropriate, when handling HIV-1, HBV, and HCV infected blood or body fluids.

CLEANING PROCEDURE: All blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this disinfectant. A Dicosol Ultra Disinfecting Towelette can be used for this purpose.

CONTACT TIME: Thoroughly wet surface with a Dicosol Ultra Disinfecting Towelette. Allow surfaces to remain wet for 1 minute, then air dry. The efficacy of a 1 minute contact time has been shown to be adequate against HIV-1 (AIDS virus), HBV, and HCV.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be associated and disposed of according to Federal, State, and local regulations for infectious waste disposal.

PRECAUTIONARY STATEMENTS:

Trauma to Humans and Domestic Animals: WARNING: Caution. Substantial but temporary eye injury. Do not get in eye or on clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Physical or Chemical Hazards: Flammable. Keep away from heat or open flame.

STORAGE AND DISPOSAL:

Do not contain water, food, or feed by storage and disposal.

PERIODEC STORING: Dries away from heat.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of used towels in trash.

If exposed:

- flush eyes with large amounts of tepid water for 15-20 minutes.
- remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

NOTICE: Electrically powered, non-powered, and gas-powered, ultrasonic, and steam sterilizers, are not intended to be used to sterilize the above-mentioned medical devices.
