COMPLETE COMPATIBILITY®

Compatibility Agent and Acidifier

PRINCIPAL FUNCTIONING AGENTS:
Alcohol ethoxylate phosphate ester, isopropanol, dipropylene glycol monomethyl ether .......................................................... 60%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANTS .................................................................................................................. 40%
TOTAL .............................................................................................................. 100%

All ingredients are exempt from tolerance requirements under 40 CFR 180.

KEEP OUT OF REACH OF CHILDREN
DANGER
STOP - READ LABEL BEFORE USING

PRECAUTIONARY STATEMENTS
DANGER - Corrosive. Causes irreversible eye damage. Causes skin burns. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles or face shield) and chemical-resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear protective eyewear (goggles or face shield), chemical-resistant gloves, coveralls worn over long-sleeved shirt and long pants, and chemical-resistant footwear plus socks.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, than continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

GENERAL INFORMATION

COMPLETE COMPATIBILITY® is an anionic formulation that aids in the blending of liquid fertilizers with pesticides and
pesticides with other pesticides in tank mixes.

COMPLETE COMPATIBILITY® may be used with pesticides registered for use on all agricultural, forestry, industrial,
non-cropland, rights-of-way, turf and municipal, and other uses.

THE NEED FOR COMPATIBILITY AGENTS

Problems can occur with fertilizer and pesticide combinations because of different physical and chemical properties in
the tank mix.

Some types of problems are inadequate dispersion, wetting, emulsion or solution stability and lumping. To determine
the need for this product or insure that problems with the tank mix are minimized, follow the testing procedure
described below:

IN THIS TEST ONE TEASPOON PER GALLON IS EQUAL TO APPROXIMATELY ONE PINT PER 100 GALLONS
FOR PESTICIDE AND LIQUID FERTILIZER TANK MIXES.

Potential tank mixes should be tested before use. Liquid fertilizer/pesticide tank mixes or pesticide tank mixes may
be tested as follows:

1. Measure one gallon of liquid fertilizer or water in a clean clear container.
2. Add each one teaspoon of COMPLETE COMPATIBILITY® (1 pint rate) to the liquid and mix well.
3. Add each pesticide or adjuvant (following label mixing order/jar test instructions) to the solution and shake well to
mix before adding next material until all the tank mix components have been added.

Allow the mixture to stand for at least 15 minutes. If the mixture is, lumpy or otherwise unacceptable, repeat the test using the same
amount of fertilizer and/or pesticide, and increase the amount of COMPLETE COMPATIBILITY® to two teaspoons (2 pint rate) and
mix. The solution should remain stable for at least 30 minutes. If this does not solve the problem, increase the amount of COMPLETE
COMPATIBILITY® to three teaspoons (3 pint rate). If the problem still exists after trying the 3 pint rate, make a pre-mix of each pesticide
and water then retest compatibility test. Premixing often increases compatibility when adding dry pesticides like wettable powders or
when adding pesticides to liquid fertilizer, especially cold liquid fertilizer.

COMPLETE COMPATIBILITY® may be added to fertilizer grades as follows:

1 to 3 pints per 100 gallons
--- 25-0-0, 28-0-0, 30-0-0, and 32-0-0

2 to 3 pints per 100 gallons
--- 20-20-20, 20-5-5, 15-15-0, 15-10-8, 15-10-6, 12-48-8, 12-12-8, 10-34-0, 10-24-0, 10-15-5, 10-5-5,
8-24-0, 8-16-8, 7-21-7, 6-16-6, 5-23-5, 5-10-10, 4-10-10, 5-20-12

DIRECTIONS FOR USE

For Terrestrial Use Only - Not for Aquatic Use

The best method of use is to add the COMPLETE COMPATIBILITY® to the fertilizer with the agitation on before adding
the pesticide.

Use 1 to 3 pints of COMPLETE COMPATIBILITY® per 100 gallons of liquid nitrogen/pesticide tank mixture.
(See fertilizer grades above).

Use 1 to 3 pints of COMPLETE COMPATIBILITY® per 100 gallons of pesticide tank mix. Apply as soon as possible
after mixing.

If mixture is allowed to stand for any length of time, check to make sure the mixture is still smooth and agitate before using.

IN EVERY CASE, THE PESTICIDE LABEL PRECAUTIONS MUST BE FOLLOWED AND THIS PRODUCT MUST BE USED IN
ACCORDANCE WITH PRODUCT LABEL DIRECTIONS.

Instructions for use chart:
1. Test the pH of the water to be used in your tank mix by using a pH test kit.
2. Determine the desired pH for the pesticide to be tank mixed. Typically, spray tank mixtures are most effective
at pH's between 5 and 7.
3. Determine the approximate quantity of COMPLETE COMPATIBILITY® to be added to each 100 gallons of the
tank mix by reading across the chart from the starting pH and down to the desired pH on the left side.

</table>

This chart is a guide to the approximate quantity of COMPLETE COMPATIBILITY® required to reduce the pH of 100 gallons of
water.

Oz. of COMPLETE COMPATIBILITY® per 100 gallons of water

NOTE: When applying aerially, follow pesticide label directions including minimum water volume per acre. Do not substitute COMPLETE COMPATIBILITY® for water required by the pesticide label.
STORAGE AND DISPOSAL
Storage: Keep product in original container away from heat or flame. Do not contaminate water, food or feed by storage or disposal.
Container Disposal: Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

NOTICE OF WARRANTY
Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
