CONTRAC®
RODENTICIDE PLACE PACS
PELLETS

ACTIVE INGREDIENT:
Bromadiolone (CAS 158772-66-7): 0.005%
OTHER INGREDIENTS*: . . . . . . . . . . . . . . . . . . . . . 99.995%
*Contains Denatonium Benzoate  TOTAL: 100.00%

KILLS RATS & HOUSE MICE
Kills Warfarin Resistant Norway Rats

Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing four or five days after feeding begins.

APPLICATION DIRECTIONS:

Apply 4 to 16 Place Pacs (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease to appear.

Follow-up:
Regional contaminated or unpoisoned bait immediately. Using waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, test sources of rodent food, water, and habitats as much as possible. If contamination occurs, repeat treatment. Where a continuous source of poisoned bait is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS
Rat and/or mouse toxins. This product is extremely toxic to fish, birds and other wildlife. Dogs, cats, and predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water or in areas where surface water is present or to intertidal areas below the mean high water mark.

Store only in original container in a cool, dry place inaccessible to children and pets. Pesticide Storage:
Keep out of reach of children.

KILLS RATS & HOUSE MICE
Kills Warfarin Resistant Norway Rats

Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing four or five days after feeding begins.

APPLICATION DIRECTIONS:

Apply 4 to 16 Place Pacs (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease to appear.

Follow-up:
