**HASDAY FOR USE**

This product is being used to protect treated articles from decay, mold or mildew, including paints and stains, adhesives, caulking, grouts, sealants, and waxes used in the building, construction, mine, or beverage industries. This product must not be formulated into a product intended as a mold- and mildewcontrol additive designed for direct sale to retailers, e.g. in a “pounce pack” or other small volume or one-use package.

---

**DIRECTIONS FOR USE**

- **ACTIVE INGREDIENT(S):** Chlorslonitrol (tetrachlorsulfonite). 40.4%.
- **INERT INGREDIENT TOTAL:** 59.6%.
- **TOTAL:** 100.0%

- Contains 4.17 lbs. chlorslonitrol active ingredient per gallon.

---

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

May be harmful if inhaled. Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Prolonged or frequent exposure to mist or droplets of the product's concentrated solution or steam may cause local irritation in susceptible individuals.

**PERSONAL PROTECTION EQUIMENT (PPE):** Handling this product may require: long-sleeved shirt and long pants; shoes plus socks; protective eyewear; waterproof gloves (some of the materials that are chemical resistant to this product are barrier laminates, butyl rubber, nitrile rubber, neoprene rubber, polychloroprene, neoprene rubber, polyethylene, or Teflon. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart). Follow manufacturer's instructions for cleaning/maintaining PPE equipment and chemical-resistant gloves. Remove all contaminated clothing, PPE, and other clothing items immediately. Wash all clothing and skin items that have been drenched or heavily contaminated with this product's concentrate. Do NOT reuse them.

**USER SAFETY RECOMMENDATIONS:** Users should wash hands before eating, drinking, chewing gum, using tobacco, or applying cosmetic products; avoid smoking or handling open flames. Do not eat, drink, or smoke while using this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to aquatic invertebrates and wildlife. Do not discharge effluent containing this product into lakes, ponds, streams, lagoons, shrimp, prawn, aquatic, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit or state program and the permit has been in effect in writing prior to discharge. Do not discharge effluent containing this product to wastewater systems without previously notifying the the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

---

**STORAGE AND DISPOSAL**

- **DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL. OPENdumping is prohibited.**
- **PESTICIDE STORAGE:** Store in a cool, dry place, out of reach of children, away from food and feed items.
- **PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, pesticide formulation or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste office of your EPA regional office for guidance.

**CONTAINER FLOOR:**

- **Nonrefillable container.** Do not re-use or re-fill this container. For recycling, if available, triple rinse container (or equivalently) promptly after emptying.
- **Liq uid residual statement for nonrefillable containers with capacity of <50 gal:** Use only as directed. Liquid residual statement for nonrefillable containers with capacity of <50 gal. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to dip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
- **Liq uid residual statement for nonrefillable containers with capacity of ≥ 50 gal:** Liquid residual statement for nonrefillable containers with capacity of ≥ 50 gal. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 20 seconds. Repeat this procedure two more times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times.

---

**For all refillable containers:**

- **Refillable container.** Re-fill the container with pesticide only. Do not re-use this container for any other purposes.
- **Clearance from the container before final disposal is the responsibility of the person disposing of the container.** Clearing from the container prior to refilling or disposal, or failure to rinse or drain this container, is a violation of Federal Law.

---

**For containers larger than 50 gallons:**

- **To clean the container prior to refilling or disposal, use a pressure wash as follows:** Empty the remaining contents into application equipment or a mix tank. Use a pressure wash system that rinses all interior sides with water that is held at >30 psi and <100°F. Pressure wash the container for a length of time that ensures that a minimum of 25% of the container volume of water is used. During the pressure wash, ensure that the container valve is left open for continuous drainage, which provides for the effective pressure wash of the paint film. Discard the rinseate after the flow begins to drip. Repeat this procedure two more times.
- **To clean the container prior to refilling or disposal, use a triple rinse as follows:** Empty the remaining contents from this container into application equipment or a mix tank. Use a pressure wash system that rinses all interior sides with water that is held at >30 psi and <100°F. Pressure wash the container for a length of time that ensures that a minimum of 25% of the container volume of water is used. During the pressure wash, ensure that the container valve is left open for continuous drainage, which provides for the effective pressure wash of the paint film. Discard the rinseate after the flow begins to drip. Repeat this procedure two more times.

---

**For all refillable containers:**

- **Total rinseate volume (in gallons) = total emptying volume (in gallons) – volume of rinsate after draining, for 10 seconds after the flow begins to dip.**
