GENERAL INFORMATION

NOT FOR AQUATIC USE.
SUPER SPREAD 90 is a general purpose nonionic surfactant used for increasing the efficiency of various agricultural chemicals. It should be used where quick wetting and uniform distribution of the pesticide is required.

SUPER SPREAD 90 may vary with the conditions of application. Use just enough to form a uniform film. Always add as the last ingredient to the spray tank with the agitator running. If excessive foaming occurs, add a defoaming agent.

When application plans include the use on a sensitive crop, it is recommended that a small area first be treated, to determine if there may be any adverse effects on the crop.

FIRST AID

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have a person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.
