**CAUTION:**

TOTAL Net contents are marked on the container.

**HMIS/NPCA RATINGS**

Health 1 Flammability 1 Reactivity 0

Product Weight: 8.6 lbs/gal 1.03 kg/L

Net contents are marked on the container.

**ACTIVE INGREDIENT(S)**

Poly[oxyethylene (dimethyliminio) ethylene](dimethyliminio) ethylene dichloride] 15.0%

**INERT INGREDIENTS** 85.0%

**TOTAL** 100.0%

EPA Reg. No. 1448-212-66114

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

- **If in Eyes**: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

- **If on Skin, Clothes**: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

- **If Swallowed**: Move person to fresh air. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact CHEMTREC at 1-800-424-8300 for emergency medical treatment information.

- **If Inhaled**: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth method.

- **HOT LINE NUMBER**: Have the product container or label with you when calling a Poison Control Center or a doctor for treatment advice. Do not mix with any other pesticides.

- **Precautionary Statements**: Keep out of reach of children. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wear chemical-resistant eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash clothing before reuse.

**Environmental Hazards**: This pesticide is toxic to fish, aquatic organisms and clams. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**Directions for Use**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**COOLACIDE™** is used to control the growth of algae in decorative fountains that do not contain fish. It is also used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers and recirculating cooling systems.

**WATER COOLING TOWERS**: Prior to the use of COOLACIDE in water cooling towers, clean the systems to remove algae and other deposits. Then make an initial slug addition of 4 to 10 fluid ounces of COOLACIDE per 1000 gallons of water to provide 32 to 80 ppm COOLACIDE, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 1.0 to 10.0 fluid ounces of COOLACIDE per 1000 gallons of water (6 to 80 ppm COOLACIDE) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Make slug additions into the sump of water cooling towers.

**DECORATIVE FOUNTAINS**: COOLACIDE is used to control the growth of algae in decorative fountains that do not contain fish. Manually clean heavy growths of algae prior to treatment. Fountains with just visible algae growth require an initial dose of 5 to 10 fluid ounces of COOLACIDE per 1000 gallons of water. For maintenance dosages, add 1 to 2 fluid ounces of COOLACIDE per 1000 gallons of water every 5 to 7 days as needed. Make sure COOLACIDE is added at a point where it can be uniformly distributed. COOLACIDE may be used in fountains treated with chlorine chemicals, but do not mix COOLACIDE with concentrated dry or liquid chlorine products.

**INDUSTRIAL AIR WASHING SYSTEMS**: COOLACIDE is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to its use, clean the systems to remove bacterial slime and other deposits. Make an initial slug dose of 14.8 to 24.7 fluid ounces of COOLACIDE per 1000 gallons of water. Repeat initial dosage until control is evident. Make subsequent slug additions of 10.1 to 24.7 fluid ounces of COOLACIDE per 1000 gallons of water each 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Make slug additions into the sump or into the water collection trays of the airwash system.

**Storage and Disposal**

Do not contaminate water, food, or feed by storage or disposal. Do not ship with Food, Feed, Drugs, or Clothing. (Nonrefillable containers with capacity of 5 gallons or less)

**PESTICIDE STORAGE**: Keep container closed when not in use. In case of spills, use sawdust or sand to absorb the spilled pesticide and dispose of in a sanitary landfill.

**PESTICIDE DISPOSAL**: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**CONTAINER HANDLING**: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for the later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or reconditioning, if appropriate, or by other procedures if approved by state and local authorities.

**Nonrefillable containers, capacity of greater than 5 gallons**

**PESTICIDE STORAGE**: Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. In case of spills, use sawdust or sand to absorb the spilled pesticide and dispose of in a sanitary landfill. Keep container closed when not in use.

**PESTICIDE DISPOSAL**: Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER HANDLING**: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal.

Repeat this procedure two more times. Then offer for recycling if available or reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures if approved by state and local authorities.
