SPECIAL LOCAL NEED SECTION 24(c) SUPPLEMENTAL LABELING

Fyfanon® ULV AG

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

EPA Reg. No. 67760-35               EPA SLN No. WA-960004

• It is a violation of federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DIRECTIONS FOR USE

Cottonwood and Hybrid Poplar Plantations / Grasshoppers:

Use 8-12 fluid ounces of Fyfanon ULV AG per acre for grasshopper control in cottonwood and hybrid poplar plantations. Apply with fixed wing aircraft flying less than 150 mph or helicopter equipped for ultra low volume application. More than one application may be necessary depending upon severity of grasshopper populations and weather conditions. Application of Fyfanon ULV AG to bordering range grass (e.g. 500 feet) at 6-8 fluid ounces per acre will protect the adjacent cottonwood or hybrid poplar plantation from reinfestation by grasshoppers.

Restrictions / Precautions:

• Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.
• Do not apply more than 3 times per season. Allow at least 7 days between applications.
• The interaction of equipment and weather related factors determines the potential for spray drift. Apply only when weather conditions are favorable. Wind and rising air currents may cause undesirable spray drift and reduce insect control. Temperature inversions can restrict vertical air mixing. Do not make aerial applications during temperature inversions due to the high potential for drift.
• This pesticide is toxic to fish, aquatic invertebrates, and aquatic life stages of amphibians. Fyfanon ULV AG should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the
WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/EnvResources/EndangSpecies.htm, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

- Certain uses of malathion may be restricted by a U.S. District Court final order. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/EnvResources/Buffers.htm for information regarding pesticides that are impacted by the final order.

- This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or broadleaf weeds. Do not apply this product or allow it to drift to blooming crops or broadleaf weeds. Broadleaf weed bloom must be controlled prior to the application in cottonwood/poplar plantation borders with 5 or more blooms per square yard.

- For use under this SLN label do not apply this product through any type of irrigation system.

**WSDA Container Disposal Guidance:**

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

*This label for Fyfanon ULV AG expires and must not be distributed or used in accordance with this SLN registration after December 31, 2011.*
