FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing.
Call a Poison Control Center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a Poison Control Center or doctor for further treatment advice.

HAVE THIS PRODUCT CONTAINER OR LABEL WITH YOU WHEN CALLING A POISON CONTROL CENTER, DOCTOR, OR DOCTOR. When going for treatment.
You may also call 1-800-858-7738 for emergency medical treatment advice.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION: Causes moderate eye irritation. Avoid contact with eyes. Use adequate ventilation and avoid breathing dust. Stannic oxide is a respiratory sensitizing agent. In case of contact with eyes, rinse immediately with plenty of water and consult a doctor.

PHYSICAL AND CHEMICAL HAZARDS Keep container tightly closed. Product must remain completely dry to retain insecticidal value.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. APPLY ONLY TO DRY SURFACES. May be used by Pest Control Operators. Excess product may be removed by vacuum, mop, sponge or dampened cloth. JT EATON KILLS BEDBUGS AND CRAWLING INSECTS POWDER™ kills insects by displacing the fluids right out of their body! Insects dry-up...and die!

GENERAL DIRECTIONS JT EATON KILLS BEDBUGS AND CRAWLING INSECTS POWDER™ contains Silicon Oxide material composed of millions of minute, fossilized single-celled aquatic plants known as diatoms which were deposited in the earth’s crust millions of years ago. JT EATON KILLS BEDBUGS AND CRAWLING INSECTS POWDER™ kills insects by abrasively removing and breaking down the oily protective membrane which covers the insect’s body, legs, and other moving parts. Death results from dehydration (drying out), because it absorbs up to 50% of the insects fluid! An insect’s body is approximately 65% water and when as little as 30% dehydration occurs the insect will die. Without water to replace such losses, domineering species of cockroaches and ants die within 1 to 2 days. With JT EATON KILLS BEDBUGS AND CRAWLING INSECTS POWDER™, there is an initial kill followed by the gradual, steady kill of the remaining insects. It remains in place until depleted and will continue to kill insects as long as the product stays dry!

HOME AND RESIDENTIAL PEST CONTROL

KEEP OUT OF REACH OF CHILDREN

INSECTS KILLED BY JT EATON KILLS BEDBUGS AND CRAWLING INSECTS POWDER™, when used as directed, includes the following insects: Ants, Bedbugs, Boxelder bugs, Cockroaches, Crickets, Fleas, Silverfish, Ticks, Spiders, Millipedes, and Houselies resting on treated surfaces.

STORAGE AND DISPOSAL

STORAGE: Store this product in its original container in a dry, cool, secure area. Do not contaminate water, foodstuffs, feed, or seed by storage or disposal.

PRODUCT DISPOSAL: As a responsible environmental practice, where possible, it is recommended that all of the contents of the container be used, carefully following label directions and precautions.

SPILL: In case of spill, if product is dry sweep up and use as directed, or dispose of material according to IF PARTLY FILLED directions above.
