Dr. DRI, Inc.

Washington State Reg. No. 45989-70002

KEEP OUT OF REACH OF CHILDREN

WARNING

KALO, Inc., 13200 Metcalf Avenue, Overland Park, KS 66213
800-255-5196 • www.kalo.com

Storage and Disposal
Do not contaminate water, foodstuffs, feed or seed by storage or disposal.
Storage: Store above 35°F and below 120°F. Store product in original bag only. Keep away from heat, sparks, and open flame. Do not store with oxidizing agents.
Disposal: Completely empty contents of bag into spray application tank. Empty bags should be disposed of in a sanitary landfill or by authorized incineration. Dispose of contents/bag in accordance with local/national regulations.

Precautionary Statements
Wash hands, face and other affected areas thoroughly after handling. Wear protective gloves and eye/face protection. Call a poison center or doctor/physician if you feel unwell. If medical advice is needed, have product package/label at hand.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists, get medical advice/attention. If eye irritation persists, get medical advice/attention.
IF ON SKIN: If skin irritation occurs, get medical advice/attention.
Refer to back of bag for more First Aid statements.

Environmental Hazards
Do not contaminate water sources by cleaning of equipment or disposal of wastewaters.

Principal Functioning Agents
Carbonyl diamine, polyoxyethylene-polyoxypropylene, beta-hydroxy-tricarboxylic acid 96.0%
Constituents ineffective as spray adjuvants 4.0%
Total 100.0%

Exempt from tolerance under 40 CFR 180.

Net Contents: 3 Pounds (1.36 Kg)

DRI NONIONIC SURFACTANT IS NOT FOR AQUATIC USE.
First Aid
Call a poison control center or doctor/physician immediately if you feel unwell and for treatment advice. Have the product packaging/label with you when calling a poison control center or doctor, or going for treatment.

If Swallowed: Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, all 911 or an ambulance, then get artificial respiration, preferably by mouth-to-mouth, if possible.

If In Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If eye irritation persists, get medical advice/attention.

If On Skin or Clothing: Take off contaminated clothing and wash before reuse. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. If skin irritation occurs, get medical advice/attention.

General Information
DRI Nonionic Surfactant is a spreader-activator. It may be tank-mixed with herbicides or nutrients that recommend the use of a nonionic surfactant or spreader-activator.

DRI Nonionic Surfactant improves spray coverage and penetration of plant foliage.

Recommend the use of a nonionic surfactant or spreader-activator.

DRI Nonionic Surfactant is a spreader-activator. It may be tank-mixed with herbicides or nutrients that recommend the use of a nonionic surfactant or spreader-activator.

Mixing
Thoroughly clean all spray mixing and application equipment prior to, and following, each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with DRI Nonionic Surfactant, follow these mixing procedures: 1) Fill solution tank one-half full of water and begin agitation. 2) Add DRI Nonionic Surfactant to the solution. Do not pre-mix DRI Nonionic Surfactant as a slurry before adding to spray solution. 3) Add remaining tank-mix products in the following order: dry flowables and water dissolvable granules, wettable powders, flowables, solutions and demulsifiable concentrates. 4) Continue filling while agitating until all added products are thoroughly mixed into spray solution. Do not mix DRI Nonionic Surfactant directly with undiluted herbicides or tank mix partners.

Directions For Use
Always read and follow all label directions, mixing instructions, and precautionary statements of the herbicide or nutrient being used.

DRI Nonionic Surfactant should only be used when the herbicide or nutrient label recommends or suggests the use of a nonionic surfactant or spreader-activator.

Determining Use Rates
The use rate of DRI Nonionic Surfactant should be determined by the Use Directions on the label of the herbicide or nutrient to be applied. Labels will recommend adjuvant use rates in terms of pints per 100 gallons of spray solution or percentage of spray solution.

Use the following chart to convert liquid surfactant use rate to the equivalent use rate of DRI Nonionic Surfactant.

<table>
<thead>
<tr>
<th>Liquid Surfactant</th>
<th>DRI Nonionic Surfactant</th>
<th>Oz Saved</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 pint per 100 gallons</td>
<td>12 ounces (0.75 lbs) per 100 gallons (0.125% v/v solution)</td>
<td>4 ounces</td>
</tr>
<tr>
<td>2 pints per 100 gallons</td>
<td>24 ounces (1.5 lbs) per 100 gallons (0.25% v/v solution)</td>
<td>8 ounces</td>
</tr>
<tr>
<td>4 pints per 100 gallons</td>
<td>48 ounces (3 lbs) per 100 gallons (0.5% v/v solution)</td>
<td>16 ounces</td>
</tr>
<tr>
<td>8 pints per 100 gallons</td>
<td>96 ounces (6 lbs) per 100 gallons (1% v/v solution)</td>
<td>32 ounces</td>
</tr>
</tbody>
</table>

If herbicide or nutrient label recommends the use of a nonionic surfactant or spreader-activator but provides no use rate, add 12 to 24 ounces of DRI Nonionic Surfactant per 100 gallons of water.
