walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

**SELECTION OF TREATMENT AREAS:**
Determine areas where house mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and terminal buildings and related structures around and associated with these sites. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, agricultural and public buildings, transport vehicles, (ships, trains, aircraft), port facilities. This product may only be used to control the following rodent pests in man-made structures: House mouse (*Mus musculus*), meadow vole (*Microtus pennsylvanicus*), Western vole (*Reithrodontomys humuli*), Rice vole (*Ochrotomys nuttalli*), Golden mouse (*Microtus californicus*).

**DIRECTIONS FOR USE:**
Pre-Baited • Disposable
Two openings for mice or meadow voles to readily enter and feed on the bait inside

**APPLICATION DIRECTIONS:**
Place a single bait station on or near any likely areas for mice or meadow voles. Place in trash or offer for recycling if available. If partly filled:
Place in trash or offer for recycling if available.
If empty:
Place in trash or offer for recycling if available.

**STORAGE AND DISPOSAL:**
Store in a dry place out of reach of children and pets. Do not reuse or refill this container. Non-refillable container. Do not expose children, pets or other non-target animals to rodenticides. To help to prevent accidents:
- Make sure all bait is placed out of reach of children, pets, domestic animals and non-target wildlife.
- For non-emergency first aid information on this product, call 1-800-498-5743 (US & Canada) or 1-651-523-0318 (all other areas).
