EPA Est. No. 10250-50-001 EPA Reg. No.: 10250-54

HEMPEL'S ANTI-FOULING OLYMPIC HI 76600 is an advanced antifouling paint containing caprylic acid for the prevention of barnacles, algae, barnacles, and other navalts marine fouling organisms. Recommended for the underwater surfaces of steel vessels operated in all coastal and coastal waters.

APPLICATOR INSTRUCTIONS:
Stir thoroughly and apply to a clean dry surface with a temperature above the dew point. Apply over previous coating (exemptions: primer, seawal, antifouling paint) or according to the written painting specifications developed for the particular vessel. Film thickness (measured by a film thickness gauge) and the number of coats required to be applied depends upon vessel full condition, tracking pattern, and designated extension of painted surface service life. Allow at least 5 hours drying time between coats of this product at 25°C (77°F). Drying time is proportionately longer at lower temperatures. If painting is required for highly weathered, conventional type of antifouling paints may require up to 5 days after application to reach service life. The ship may be floated when final coat is dry for 12 hours. Prolonged exposure to the atmosphere may affect the properties of this product.

STORAGE AND DISPOSAL:
PROHIBITED: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

Pesticide disposal: Bury, biodegradable disposal of excess pesticide, spray mixture, or residue is a violation of Federal Law. If these wastes cannot be disposed of by using labeled instructions, contact your State or local authority for advice.

CONTAINER DISPOSAL: Send waste to an authorized waste disposal facility.

GENERAL:
Consult local Federal, State, or Local authorities for approved alternative procedures.
