**Algaecide**

For Stock Watering Tanks, Troughs and Ponds

Active Ingredient:
Copper as elemental .......................... 1.25%

Other Ingredients: .......................... 98.75%

Total: .................................. 100.0%

Stocktrine II contains 0.107 lbs. of elemental copper per gallon (12.5 grams per liter).

*From mixed copper ethanoamine complexes.

Keep out of reach of children.

Caution: See additional precautions on side panel.

**Precautionary Statements**

**Caution:**

**Hazard to Humans and Domestic Animals**

FIRST AID: If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing. Call a Poison Control Center or doctor for treatment advice. IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice. IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a Poison Control Center or doctor. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or do not breathe, call 911 or give artificial respiration, preferably mouth-to-mouth, if possible. Call a Poison Control Center or doctor for further treatment advice. In case of emergency, for additional information call (800) 859-7765.

Have the product container or label with you when calling a Poison Control Center or doctor orgoing for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

**Environmental Hazards**

Fish Caution: Stocktrine II may be toxic to trout and other species of fish. Fish toxicity is dependent upon the hardness of water. Do not use Stocktrine II on water containing more than 100 ppm calcium hardness. Do not use in waters containing copper or heavy metal salts. This product may be harmful to aquatic life. In ponds where algae growth is excessive, decomposition following Stocktrine II treatment may deplete dissolved oxygen concentrations resulting in loss of fish. To prevent this occurrence, treat 1/3 to 1/2 of the pond at a time allowing 1 to 2 weeks between consecutive treatments.

**Storage & Disposal**

Keep container closed when not in use. Do not contaminate water, food or feed by storage or disposal. Outdoor dumping is prohibited. FESTICIDE DISPOSAL: Pesticide wastes acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance. CONTAINER DISPOSAL: Triple rinse (or equivalent), then offer for recycling, reconditioning or disposal in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke. Consult Federal, State or local disposal authorities for approved alternative procedures.

NOTE: Neither Applied Biochemists, nor the seller, makes any warranty, guarantee or representation, expressed or implied, concerning this material except that it conforms to the chemical description on the label. Neither shall be held responsible in any manner for any personal injury or property damage or other type of loss resulting from the handling, storage and use of this material not in strict accordance with directions given herewith.
