STOCKTRINE® II Algaecide

GENERAL INFORMATION

STOCKTRINE® II Algaecide is an environmentally and economically controlled algaegrowth commonly found in stock watering tanks, troughs, and ponds. Treated water can be used immediately for stock watering.

DIRECTIONS FOR USE

It is a violation of Federal Law for anyone to use this product in a manner not consistent with its labeling.

TOUGH RATE & METHOD OF APPLICATION

Use one fluid oz. of STOCKTRINE® II Algaecide per 2,000 gallons of stock watering tank, trough or pond capacity (31 ml per 1000 liters) to obtain a 0.4 ppm copper concentration in treated stock water.

STOCKTRINE® II Algaecide contains at least 9 parts active ingredient per 100 parts water. Use a mixing pump or a well-mixed sprayer to distribute STOCKTRINE® II Algaecide evenly over the water surface.

Use as a stock treatment (i.e. prior to or during treatment) to control algae growth. Efficaciously apply under calm, sunny conditions early in the day when water temperatures are at least 60°F.

To maximize chemical contact time, apply during periods when stock water consumption is low or water intake volumes are at least 60%.

STOCKTRINE® II Algaecide contains at least 9 parts active ingredient per 100 parts water. Use a mixing pump or a well-mixed sprayer to distribute STOCKTRINE® II Algaecide evenly over the water surface.

A dosage concentration of 0.4 ppm copper is obtained by using a fogging formula, for square or rectangular tanks, troughs, and ponds:

\[(L \times W \times D) \times 1000 \times 0.4 \text{ ppm} = \text{gallons to fill tank} \]

For circular or elliptical tanks, troughs, and ponds:

\[(\pi L \times D) \times 1000 \times 0.4 \text{ ppm} = \text{gallons to fill tank} \]

For garden pond systems. In ponds where algal growth is excessive, decomposition following treatment could deplete dissolved oxygen contents resulting in loss of fish. To prevent this occurrence, treat 1/3 of the pond at a time allowing 1-2 weeks between treatments.

PRECAUTIONARY STATEMENTS

HARMFUL TO HUMAN & DOMESTIC ANIMALS

CORROSIVE: Do not get in eyes, on skin or clothing. In case of contact, rinse eyes thoroughly and get medical attention. Harmful if swallowed. In case of contact with skin or clothing, remove contaminated clothing. Do not eat, drink, or smoke while using this product. Wash hands thoroughly after handling this product.

ENVIRONMENTAL HAZARDS

Fish caution: May be toxic to fish and other species of fish. Fish toxicity is dependent upon the hardness of water. Do not use in water containing fish if the corrosive hardness of water does not exceed 80 ppm (parts per million). Do not use in water containing fish if the treated pond is not drained. This product is not recommended for use in fish pond systems. In ponds where algae growth is excessive, decomposition following treatment could deplete dissolved oxygen contents resulting in loss of fish. To prevent this occurrence, treat 1/3 of the pond at a time allowing 1-2 weeks between treatments.

NOTE: If the treated pond contains Koi or Hybrid goldfish. This product is not intended for use in small volume, waters containing Koi and Hybrid goldfish. This product is not intended for use in small volume, waters containing Koi and Hybird goldfish.

PESTICIDE DISPOSAL:

Do not contaminate water, food or feed storage or disposal.

STORAGE AND DISPOSAL

Do not store or transport near areas where feed, or foodstuffs are stored or disposed of. Do not store near feed or foodstuffs. Do not store near water. Store at temperatures above 32°F (0°C). Store in a cool, dry, well-ventilated area. Store at temperatures below 100°F (38°C). Do not store in the presence of heat sources. Store with the cap closed. Do not contaminate water, food or feed by storage or disposal.

KEEP OUT OF REACH OF CHILDREN

CAUTION

As a precautionary measure, contact your State, Federal, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable Container. Do not re-use container. This container is designed to prevent the entry of water. Empty the container into a labeled tank or storm drain for proper disposal. If the container cannot be emptied into a labeled tank or storm drain: call your local hazardous waste facility. Do not burn.

GENERAL INFORMATION

STOCKTRINE® II Algaecide contains 0.107 lbs. of elemental copper per gallon (2.5 g/L). From mixed copper ethanolamine complexes.
