Stabilized Chlorinating Tablets

NET WEIGHT: 5 Lbs. (2.27 kg)

1" SIZE

WARNING POOL SANITIZER

When used as directed, this product is an effective stabilized chlo-
rinating disinfecting agent. This over dosing product releases
sufficient chlorine to reduce the growth of harmful algae and
microorganisms in your pool.

DIRECTIONS FOR USE: This is a non-soluble powder. Add the
powder in a manner consistent with its labeling. Read entire
labeling and directions in accordance with precautionary state-
tments and directions.

Ensure all pool equipment is working properly. Backwash the filter
system following manufacturer's directions. Add product to between
3.2-7.6 lbs. Add stabilizer to establish a minimum stabilizer level of 10-
40 ppm to reduce the degradative effects of sunlight upon the
chlorine system. Superchlorinate the pool so that a chlorine resid-
ual of between 5-8 ppm is obtained. When using other products as
cultured in directions for this product, always follow directions on
those products.

WHEN USED IN AUTOMATIC CHLORINATORS AND FLOTTERS:
This product can be used in feeding mechanisms such as auto-
matic chlorinators and floaters as a maintenance treatment.
Use at the rate of 3.2-7.6 lbs. per 10,000 gallons of water. Do not use
more than one-half of the recommended dose of this product.

INHABITED: When persons are in the pool, or applications are
being made, all persons shall remove their contact lenses and
depart the area of use until the equipment is turned off and
thoroughly flushed. In the absence of a pool, persons may
continue to exist in the area, however, face within 30 feet
of the application point shall be protected. Do not use
over a period of 48 hours without bringing pool water
below 120°F. Use only as directed.

TRANSPORTATION: This product is a hazardous material
and must be shipped in compliance with transportation laws.

Both the manufacturer and the user must comply with
related Federal, State and local regulations for handling
and transportation of hazardous materials.

Environmental Hazards: In case of crystallization or decom-
position, do not allow container to open. Do not re-
use container. If possible, isolate container with large
amounts of water to dilute chlorine residue before de-
contaminating container. Do not contain food or
leaves by storage or disposal. CONTAINER DISPOSAL: Do not
recontamination, but place in trash collection. Rinse thoroughly
before disposing in trash.

PRECAUTIONARY STATEMENTS

Hazardous to Humans and Domestic Animals: DANGER

Highly irritant. Causes skin and eye damage. May be fatal if
swallowed. Do not get in eyes, on skin or on clothing. Wash
immediately with soap and water. If swallowed, im-
mediately seek medical attention. If exposed, wash face
with soap and water. Inhaling the dust at high concentra-
tions may cause irritation to nose and throat. Avoid breathing dust and fumes. Rinse and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG CHEMI-
CICAL AGENT: Do not mix with other chemicals. Mix only with water.

Do not add water to product. Always add product to large quanti-
ties of water. When using automatic feeding devices, always follow
manufacturer's directions as to the proper addition of stabilizer
to the pool. Use clean dry sand. Do not add this product to any dispersing device containing remnants of any other
product. Such use may cause a rapid reaction leading to fire or
detonation. Clean or rinse empty container thoroughly before re-
using container or recycling. Never use this product in conjunction
with other chemicals. Use only as directed.

Ifphytotoxicity: No data are available for this product.

To report or investigate a potential problem with this product,
contact the manufacturer at 1-800-858-0135.

If you have never used this product before, you should consult
with your pool service personnel to ensure best results. Do not use
in pools until your service personnel have been consulted.
