This product is specifically formulated for use with automatic chlorinating and flocculating type feeders. It provides highly effective pool water sanitation and a clear, colorless water in high chlorine demand. This combination of ingredients enhances the effective quantity of the active ingredients and reduces the potential for pool maintenance. It contains ingredients that are listed more clearly and is a better automatic feeder than the previous model. It contains ingredients that are listed more clearly and is a better automatic feeder than the previous model.

DIRECTIONS FOR USE: It is essential to understand that the use of this product in a manner inconsistent with the label will void the warranty, but third party liability is not greater than the manufacturer's liability under warranty. Reading labels and understanding the instructions associated with this product are essential in obtaining the performance and efficiency of this product.

UNIT APPLICATION: This product should be applied strictly as directed on the label. For the correct dosage, refer to the following instructions provided by the manufacturer of the unit. Use one tablespoon of this product per 100 US gallons of water. Measure the temperature of the water and the pH level. The dosage should be adjusted based on the temperature and pH level of the water.

STORAGE AND DISPOSAL: Keep this product dry and in a cool, dry, well-ventilated area away from heat or open flame. Do not use this product in the presence of flammable liquids or combustible materials. Do not store or dispose of this product in the presence of flammable liquids or combustible materials.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms.

NOTE: Users assume all responsibility for safety and use not in accordance with instructions.
