Stabilized Chlorinating Tablets

GIANT 3” SIZE

ACTIVE INGREDIENT: Calcium hypochlorite 15%
OTHER INGREDIENTS: 85%
TOTAL INGREDIENTS: 100%

KEEP OUT OF REACH OF CHILDREN

DANGER

SWIMMING POOL SANITIZER

When used as directed, this product is an effective stabilized chlorinating agent. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and microorganisms in your pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautions statements and directions.

Ensure all pool equipment is working properly, backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.6. Add stabilizer to establish a constant stabilizer level of 30-40 ppm to reduce the degradation effects of sunlight upon the chlorine residual. Remove debris from the pool so that a clear view of the bottom of the pool is obtained. Follow directions on these products.

WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS: This product can be used in spinning mechanisms such as automatic chlorinators and floaters as in-maintenance treatment. Fill pool with this product and adjust the feeding mechanism to assure a constant treatment level of 1.0-1.2 pounds available chlorine in the pool water. Normally, 1-2 ounces of the product per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor free available chlorine. The recommended feed point is the skimmer box. Do not let this product enter in direct contact with vinyl liners or other combustible surfaces as damage may occur.

WHEN USED IN SKIMMERS: This product may be used in plastic skimmers only if skimmer cover and the ponding between skimmer and pond are plugged. Do not add other chemicals through the skimmer when using this product in skimmer as an explosive or fire may result. Do not turn pump off for more than 8 hours in very cold water when product is in the skimmer. Replace skimmer screens as determined by a high level test strips to maintain chlorine residual of 1.0-1.2 ppm. Remove any floating scum on surface to prevent localized high levels of 3 ppm chlorine due to lack of body movement.

STORAGE AND DISPOSAL: Keep the product dry in an airtight, closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. Material may decompose this product and cause a violent reaction to the skin and eyes. In case of decomposition, isolate container from possible and flood area with large amounts of water to dissolve all material before discarding the container. Clean container with a strong stream of water. Drowning apparatus: Use appropriate winch collection. Place thoroughly before discarding in tanks.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles, in-sight glasses and rubber gloves when handling this product. Avoid breathing dust and fumes. Remove and wash contaminated clothing and shoes immediately after contact.​​

PHYSICAL OR CHEMICAL HAZARDS: STRONG CHLORINE ODOR: Do not mix with other chemicals. Store water with other chemicals that could react with chlorine. Use vinyl dry storage. Do not add this product to any dispersing device containing remnants of any other product. Such can cause a violent reaction and contaminate the entire pool. Organic matter other than chlorine will start a chemical reaction and generate hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not return container, if possible, store container in same or well ventilated area. Flood area with large amounts of water. In case of fire, water can be used. Carbon dioxide or dry chemical extinguishers and for use on electrolytic pools.
