PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear protective eyewear (goggles, face shield or safety glasses), protective clothing and protective gloves (rubber or chemical resistant). Harmful if inhaled. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by the poison control center or doctor.
Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

FOR EMERGENCY MEDICAL INFORMATION IN USA OR CANADA, CALL 1-800-328-0026.
FOR EMERGENCY MEDICAL INFORMATION WORLDWIDE, CALL 1-651-222-5352 (IN USA).

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsates is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying.

Plastic Containers: For recycling if available or puncture and dispose of sanitary landfill or by other procedures approved by state and local authorities. Triple rinse as follows: Fill container 1/4 full with water and reseal the container. Agitate vigorously, and dispose of rinsate consistent with pesticide disposal instructions. Repeat two more times. If notTriple rinsed, these containers are acutely hazardous wastes and must be disposed of in accordance with local, state, and federal regulations.

ONE-STEP DISINFECTANT GERICIDAL DETERGENT AND DEODORANT

Disinfectant: Staphylococci
Bacterial: Staphylococci
Sporocidal: Salmonellae
Virucidal

A multi-purpose, neutral pH, germicidal detergent and disinfectant effective in hard water up to 400 ppm (calculated as CaCO₃) in the presence of a moderate amount of soil (5% organic serum) according to the ACAC Use-dilution Test.

Disinfects, cleans, and deodorizes in one labor-saving step.

For use in schools, colleges, commercial and industrial institutions and office buildings. Disinfects, cleans, and deodorizes the following hard, nonporous, inanimate surfaces: floors, walls, non-medical metal surfaces, non-medical stainless steel surfaces, glazed porcelain, and plastic surfaces (such as propylene, poly styrene, etc.).

Effective against the following pathogens:

- Bacteria:
  - Staphylococcus aureus
  - Salmonella enterica
  - Acinetobacter calcoaceticus
  - Bordetella bronchiseptica
  - Chlamydia psittaci
  - Community Associated Methicillin
  - Resistant Staphylococcus aureus
  - CA-MRSA (IRS384) (USA300)
  - Community Associated Methicillin
  - Resistant Staphylococcus aureus
  - CA-MRSA (IRS123) (USA400)
  - Enterobacter aerogenes
  - Enterococci coccaceae
  - Enterococcus faecalis
  - Vancomycin Intermediate (VRE)
  - Escherichia coli
  - Fusobacterium necrophorum
  - Klebsiella pneumoniae
  - Legionella pneumophila
  - Stenotrophomonas maltophilia
  - Pasteurella multocida

- Viruses:
  - Adenovirus Type 4
  - Adenovirus Type 7
  - At 4 oz. per gallon
  - Hepatitis A Virus (HAV)
  - Hepatitis B Virus (HBV)
  - Hepatitis C Virus (HCV)
  - Herpes Simplex Type 1
  - Herpes Simplex Type 2
  - Human coronavirus
  - HIV-1 (AIDS virus)
  - Influenza A (Hong Kong) [Influenza] [Influenza Virus] [Flu] [Flu Virus]
  - Respiratory Syncytial Virus (RSV)
  - Rotavirus (RV)
  - Rubella (German measles)
  - SARS (Severe Acute Respiratory Syndrome)
  - Vaccinia
  - Fungi:
    - Aspergillus niger
    - Candida albicans
    - Trichophyton mentagrophytes

For service or additional information, call 1-800-35-CLEAN (352-5326)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PELIGRO: SI NO PUEDE LEER EN INGLES, PRECUITE A SU SUPERVISOR SOBRE LAS INSTRUCCIONES DE USO APROPIADAS ANTES DE TRABAJAR CON ESTE PRODUCTO.

DILUTION: 1:128

1 ounce per gallon of water

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical devices prior to sterilization or high-level disinfection.

DISINFECTING CLEANING/DEODORIZING DIRECTIONS: Remove heavy soil deposits from surfaces, then thoroughly wet surface with a use-solution of 1 oz. of the concentrate per gallon of water. Use 4 oz. per gallon of water to kill Adenovirus Type 7. The use-solution can be applied with a cloth, mop, sponge, or coarse spray or soaking. For sprayer applications, use a coarse spray device. Spray 6-8 feet from the surface, rub with a brush, cloth or sponge. Do not breathe spray. Let solution remain on surface for a minimum of 10 minutes. Rinse or allow to air dry. Rinsing of floors is not necessary unless they are to be waxed or polished. Food contact surfaces must be thoroughly rinsed with potable water. This product must not be used to clean the following food contact surfaces: utensils, glassware and dishes.

BACTERICIDAL STABILITY OF USE-DILUTION: Tests confirm that Oasis S31 when diluted in 400 ppm hard water (via use of automatic dispensing devices), remains effective against Staphylococcus aureus and Salmonella enterica for up to one year when stored in a sealed container such as a spray bottle. If product becomes visibly dirty or contaminated, the use-dilution must be discarded and fresh product prepared. Always use clean, properly labeled containers when diluting this product. Bacterial stability of the use-dilution does not apply to open containers such as buckets or pails.

TOILET BOWLS: Swab bowl with brush to remove heavy soil prior to cleaning or disinfecting. Clean by applying use-solution around the bowl and up under the rim. Stubborn stains may require brushing. To disinfect, first prepare to remove heavy soil, then remove or open over the inner trap the residual bowl water. Pour in 3 ounces of the use-solution. Swab the bowl completely using a scrub brush or mop, making sure to get under rim. Let stand for 10 minutes or overnight, then flush.

FUNGICIDAL DIRECTIONS: For use in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities follow disinfection directions.

MILDLYSTIC INSTRUCTIONS: Will effectively control the growth of mild and mildew plus the odors caused by them when applied to hard, non-porous surfaces such as walls, floors, and table tops. Apply use-solution of 1 ounce per gallon of water with a cloth, mop, sponge, or coarse spray. Make sure to wet all surfaces completely. Let air dry. Repeat application weekly or when growth reappears.

*KILLS HIV-1 (AIDS VIRUS) AND HBV (HEPATITIS B VIRUS) AND HCV (HEPATITIS C VIRUS) ON PRE-CLEANED, ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces, objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV). SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 (AIDS VIRUS) OR HBV OR HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

Personal Protection: Disposable protective gloves, gowns, face masks, or eye coverings, as appropriate, must be worn during all cleaning of blood/body fluids and during decontamination procedures.

Cleaning Procedures: Blood/body fluids must be thoroughly cleaned from surfaces/objects before application of disinfectant.

Contact Time: HIV-1 (AIDS virus) is inactivated after a contact time of 4 minutes at 25°C (77°F) (room temperature). HBV and HCV are inactivated after a 10 minute contact time. Use a 10-minute contact time for other viruses, fungi, and bacteria listed.

Disposal of Infectious Materials: Blood/body fluids should be autoclaved and disposed of according to federal, state, and local regulations for infectious waste disposal.
