DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. SENTRY® is designed specifically for restaurants, bars, food processing plants and other food handling institutions where sanitization of food contact surfaces is of prime importance. SENTRY® will sanitize previously cleaned and rinsed, hard non-porous food contact surfaces such as tanks, counter tops and food processing equipment. Prepare a solution at the recommended concentration of 150-400 ppm. SENTRY® will sanitize previously cleaned and rinsed, hard non-porous food contact surfaces such as drinking glasses and eating utensils when used at the recommended concentration of 200 ppm. SENTRY® is effective against Escherichia coli, Listeria monocytogenes, and Staphylococcus aureus.

SANITIZATION: Remove gross food particles and soil from all surfaces by rinsing, scraping or soaking. Wash and rinse surfaces with a good detergent and rinse with potable water before sanitizing. To sanitize the food contact surfaces, prepare a 150-400 ppm active quaternary solution. Follow sanitization instructions for specific use site below. To sanitize immobile items such as tanks, chopping blocks, counter tops and food processing equipment, prepare a 150-400 ppm active quaternary solution by placing the open jug of Sentry upside down in the dispenser. Turn on water to the dispenser and fill the sink, pail or soak tank to the proper level. Remove immured items, drain the solution from the surface and air dry. Do not rinse surface water after treatment. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not rinse solution followed by water after treatment. Effective sanitizer when diluted in water up to 400 ppm hardness (as CaCO₃).

SANITIZATION:
Remove gross food particles and soil from all surfaces by rinsing, scraping or soaking. Wash and rinse surfaces with a good detergent and rinse with potable water before sanitizing. To sanitize the food contact surfaces, prepare a 150-400 ppm active quaternary solution for at least one (1) minute making sure to immerse completely. To make the 200 ppm active solution, place the open Sentry jug upside down in the dispenser. Turn on water to the dispenser and fill it to the level of the lock. Remove immersed items, drain the solution from the surface and air dry. Do not rinse with water after treatment. Prepare a fresh solution for a longer contact time if necessary. If applied by spraying, use a coarse spray. Direct the hose at the bottom of the dispenser to the sink, pail, hand pump trigger sprayer or the surface to be sanitized. Apply sufficient product by hand pump trigger sprayer, hose, spray, mop, cloth or by using a dispenser. Do not use the dispenser outlet hose to flood the area with 150-400 ppm active quaternary solution for at least one (1) minute, making sure to wet all surfaces completely. If applied by soaking, use a coarse sprayer. Drain the solution from the surface and air dry. Do not rinse these water surfaces with water after treatment. Reapply a fresh solution at least daily or more frequently if solution becomes diluted or soiled. When used as directed, this product is an effective sanitizer when diluted in water up to 400 ppm hardness (as CaCO3).

INSTITUTIONS:

FOOD PROCESSING PLANTS AND OTHER FOOD HANDLING ESTABLISHMENTS:
To sanitize immobile items such as tanks, chopping blocks, counter tops and food processing equipment at the proper level. Remove immersed items, drain the solution from the surface and air dry. Do not rinse with water after treatment. Prepare a fresh solution for a longer contact time if necessary. If applied by spraying, use a coarse spray. Direct the hose at the bottom of the dispenser to the sink, pail, hand pump trigger sprayer or the surface to be sanitized. Apply sufficient product by hand pump trigger sprayer, hose, spray, mop, cloth or by using a dispenser. Do not use the dispenser outlet hose to flood the area with 150-400 ppm active quaternary solution for at least one (1) minute, making sure to wet all surfaces completely. If applied by soaking, use a coarse sprayer. Drain the solution from the surface and air dry. Do not rinse these water surfaces with water after treatment. Reapply a fresh solution at least daily or more frequently if solution becomes diluted or soiled.

RESTAURANTS AND BARS:
To sanitize mobile items such as drinking glasses, eating utensils and dishes, immerse a minute in a 200 ppm active quaternary solution for at least one (1) minute making sure to immerse completely. To make the 200 ppm active solution, place the open Sentry jug upside down in the dispenser. Turn on water to the dispenser and fill it to the level of the lock. Remove immersed items, drain the solution from the surface and air dry. Do not rinse with water after treatment. Prepare a fresh solution for a longer contact time if necessary. If applied by spraying, use a coarse spray. Direct the hose at the bottom of the dispenser to the sink, pail, hand pump trigger sprayer or the surface to be sanitized. Apply sufficient product by hand pump trigger sprayer, hose, spray, mop, cloth or by using a dispenser. Do not use the dispenser outlet hose to flood the area with 150-400 ppm active quaternary solution for at least one (1) minute, making sure to wet all surfaces completely. If applied by soaking, use a coarse sprayer. Drain the solution from the surface and air dry. Do not rinse these water surfaces with water after treatment. Reapply a fresh solution at least daily or more frequently if solution becomes diluted or soiled.

PROTECTION:

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Do not give anything by mouth to an unconscious person. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a physician. If not available, rinse out stomach by pouring a mixture of 200-400 ml of water and pecans or raisins. Wash with soap and water and after handling and before eating, drinking, or using tobacco. May be fatal if swallowed. If swallowed, rinse mouth and gargle, rinse out stomach by pouring a mixture of 200-400 ml of water and pecans or raisins. Wash with soap and water and after handling and before eating, drinking, or using tobacco. May be fatal if swallowed. If swallowed, rinse mouth and gargle. Wash with soap and plenty of water for 15-20 minutes. If not available, puncture and dispose in a sanitary landfill. Keep out of reach of children.

DANGER:

If swallowed, rinse mouth and gargle. Wash with soap and plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after 5 minutes. Then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. If swallowed: Call a Poison Control Center or Doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL:
Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. STORAGE: Store this product in a dry place no higher than temperature 7°C. PESTICIDE DISPOSAL: Pesticides are weakly acutely hazardous. Improper disposal of excess pesticide, spray mixture or inmate is a violation of Federal law. If these pesticides cannot be disposed of by use according to label instructions, contact your local Pesticide or Environmental Control Agency or the Hazardous Waste representative of the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable Container. Do not refill or reuse this container. Three times as follows. Fill container 1/4 full with water and recompose. Shake for 10 seconds. Follow Pesticide Disposal instructions for rinseate disposal. Drain for 10 seconds after the flow begins to drip. Repeat procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

INERT INGREDIENTS:

TOTAL: 100.00%

ACTIVE INGREDIENTS:

n-Alkyl (60%C14, 30%C16, 5%C12, 5%C18) dimethyl benzyl ammonium chlorides 20.00%
n-Alkyl (68%C12, 32%C14) dimethyl ethylbenzyl ammonium chlorides 20.00%

INERT INGREDIENTS:

60.00%

U.S. Patent No. 6,518,313 B1

Lot # NET CONTENTS: 3 lbs. (1.36 kg)

Lot #: NET CONTENTS: 3 lbs. (1.36 kg)

PREGNANCY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

INFOCHEM:

4. Sanitize in a solution of 1 ounce to 16 gallons of water (200 ppm). Immerse all utensils when used at the recommended concentration of 200 ppm. SENTRY is effective against Escherichia coli, Listeria monocytogenes, and Staphylococcus aureus. It is a violation of Federal law to use this product in a manner inconsistent with its label—becomes diluted or soiled.

Drain the use solution from the surface and air dry. Do not rinse surfaces with water after treatment. Prepare a fresh solution at least daily or more frequently if solution becomes diluted or soiled. When used as directed, this product is an effective sanitizer when diluted in water up to 400 ppm hardness (as CaCO3).

NOTE: A clean potable water rinse following sanitization is not permitted.

If not available, puncture and dispose in a sanitary landfill. Keep out of reach of children.

This product is toxic to fish and aquatic invertebrates.
