PRECAUTIONARY STATEMENTS + HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, ditches, ditches, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Handling application equipment over the treated area will help avoid run off to water bodies and drainage systems.

FIRST AID - Have the product container or label with you when calling a poison control center or doctor or going for treatment. In the event of a medical or chemical emergency, contact ChemTel North America 1-800-232-3924 or Worldwide Int. + 01- 813-248-0565

If on skin or clothing
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 – 20 minutes.
- Call a person control center or doctor for treatment advice.

If in eyes
- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
- Call a person control center or doctor for treatment advice.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

1. WHAT IS THIS PACKAGE FOR?
Use this product to control Fire Blight and Bacterial Wilt, Stem Rot, Leaf Spot, and Crown Gall on Fruit Trees, Flowers and Shrubs.

2. HOW DO YOU USE IT?
FRUIT: APPLES AND PEARS (Areas Other Than West Coast): To control Fire Blight in Home Plantings, apply 1 tablespoon in 2% gallons of water (equivalent to 108 ppm or 4 ozs. per 50 gallons of water) in foliar and blossom sprays. Make first spray at the start of blossoming period. Continue spray applications every 3 to 4 days during bloom time. Apply additional sprays every 5 to 7 days after bloom period when weather conditions favor spread of Fire Blight. Do not apply when fruit is edible.
PYRACANTHA: To control Fire Blight, apply a solution of 1 level tablespoon of fenamidone™ FIRE BLIGHT SPRAY per 2% gallons of water (110 ppm concentration). Begin spraying at start of bloom period. Repeat at 3 to 4 day intervals during bloom and at 5 to 7 days intervals after bloom if weather favors Disease spread.
CHRYSANTHEMUMS (Cuttings): To control Bacterial Wilt, soak cuttings for 4 hours in a solution containing 1% tablespoon of fenamidone™ FIRE BLIGHT SPRAY per 2% gallons of water (110 ppm concentration) and plant as usual.
DIEFFENBACHIA: To control Bacterial Stem Rot, spray plants at 5 to 7 day intervals with a solution of 1 level tablespoon of terti-lome® FIRE BLIGHT SPRAY in 2½ gallons water (100 ppm concentration) or soak cuttings for 20 minutes in a solution of 2 level tablespoons in 2½ gallons water (200 ppm concentration) and plant in sterile rooting medium.

PHILODENDRUM: To control Bacterial Stem Rot, remove all decayed leaves and spray with a solution of 2 level tablespoons of terti-lome® FIRE BLIGHT SPRAY in 2½ gallons water (200 ppm concentration) as preventative or at first sign of water soaked leaves. Repeat at 4 to 5 day intervals.

ROSES: To control Crown Gall, remove infested Plant and cut out gall tissue. Soak root system and cut surfaces of infested area for 15 minutes in a solution of 2 level tablespoons of terti-lome® FIRE BLIGHT SPRAY per 2½ gallons water (200 ppm concentration). Replant in soil free from disease organisms, and apply ½ tablespoons per 2½ gallons water (50 ppm concentration) as foliage spray at weekly intervals.

3. HERE ARE THE RESULTS YOU SHOULD EXPECT:
When used according to directions, this product will control Fire Blight and Bacterial Wilts, Stem Rot, Leaf Spot, and Crown Gall on Fruit Trees, Flowers and Shrubs.
