DECON LABORATORIES INC.

CONFLIKT®

- Cleaner
- *Virucide
- Tuberculocidal
- Deodorizer
- Disinfectant
- Mildewstat
  (on hard, inanimate surfaces)
- Fungicide
  (against pathogenic fungi)

ACTIVE INGREDIENTS:
- $n$-Alkyl (60% $C_{14}, 30% C_{16}, 5% C_{18}, 5% C_{16})$
  - dimethyl benzyl ammonium chlorides ........... 0.105%
- $n$-Alkyl (68% $C_{12}, 32% C_{14})$ dimethyl
  - ethylbenzyl ammonium chlorides ........... 0.105%
INERT INGREDIENTS: ......................... 99.790%
TOTAL: .................................... 100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panel for additional precautionary statements.

NET CONTENTS 16 FL OZ CAT #4101
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Conflikt is designed specifically as a general non-acid cleaner and disinfectant for use in hospitals, nursing homes and schools and food processing plants. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces and cabinets. For plastic and painted surfaces, spot test on an inconspicuous area before use. A rinse with potable water is required for surfaces in direct contact with food. In addition, this product decontaminates those areas which generally are hard to keep fresh-scented, and are prone to odors caused by microorganisms.

Conflikt is not to be used as a terminal sterilizing agent on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contact's infectious microorganisms which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

**DIRECTIONS FOR CONFLEKT IN REFILL BOTTLES:** Fill or refill the 16 or 32 oz. Conflikt spray bottle with the Conflikt refill. Pour product into spray bottle over sink or tub basin.

**DISINFECTION, DEODORIZING AND CLEANING:** Remove gross filth or heavy soil prior to application of Conflikt. Hold container six to eight inches from surface to be treated. Spray area until it is coated with the solution. Allow Conflikt to penetrate the surface to remain wet for 15 minutes (for Bloodborne Pathogens: allow surface to remain wet for HBV and HIV 5 minutes). No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. Conflikt will not leave grit or soap scum.

**TO DISINFECT FOOD PROCESSING PREMISES:** Store, walls and storage areas, hold container six to eight inches from surface to be treated and spray area until it is coated with the solution. Allow Conflikt to penetrate and remain wet for 15 minutes (for Bloodborne Pathogens: allow surface to remain wet for HBV and HIV 5 minutes). Wipe off with a clean cloth, mop or sponge and thoroughly rinse all surfaces in the area with potable water. Heavily soiled areas must be pre-cleaned before using this product. Food products and packaging materials must be removed or carefully protected prior to using this product. Using approved AOAC test methods (under Food Laboratory Practice, ICLPs), in the presence of 5% blood serum and a 3 minute contact time, unless otherwise noted, Conflikt kills the following organisms on hard, non-porous inanimate surfaces:

**BACTERICIDAL ACTIVITY (BACTERIA)**
- Pseudomonas aeruginosa (ATCC 15442)
- Staphylococcus aureus (ATCC 6538)
- Staphylococcus epidermidis (ATCC 33594)
- Salmonella typhimurium (ATCC 14028)
- Escherichia coli (ATCC 25922)
- Salmonella (typhl) typhimurium (ATCC 33591)
- Escherichia coli (ATCC 25922)

**ANTIMICROBIAL RESISTANT BACTERICIDAL ACTIVITY**
- Methicillin resistant Staphylococcus aureus (MRSA) (ATCC 33595)
- Vancomycin resistant Enterococcus faecalis (VREF) (ATCC51757)
- Vancomycin intermediate resistant Staphylococcus aureus (VISA) (CDC isolate 99287)
- Methicillin resistant Staphylococcus epidermidis (MRSE) (ATCC 33594)

**VIRUS ACTIVITY:** Conflikt is tested for disinfectant efficacy against Mycobacterium tuberculosis (ATCC 27953) and 80 degrees G14 strain when the treated surface is allowed to remain wet for 5 minutes.

**VIRUCIDAL ACTIVITY:** Conflikt kills on hard, non-porous inanimate surfaces when allowed to remain wet for a 10 minute contact time against:
- Canine Parvovirus (ATCC VR-207)
- Hepatitis A Virus (HAV) (University of Ottawa)
- Poliovirus Type 1 (ATCC VR-10046)

Conflikt when used on environmental, inanimate hard surfaces exhibits effective virucidal activity against Hepatitis B Virus (HBV) (Hepatitis Testing, Inc.), Hepatitis C Virus (HCV) and Bovine Viral Diarrhea Virus (BVDV) (NVSL) when the treated surface is allowed to remain wet for 5 minutes: Human Coronaviruses (ATCC VR-740), SARS associated Coronaviruses (Zoologic, Zoonotic, Asian Influenza A strain (Asian influenza strains 1918 and 1957) for 15 minutes; Paramyxoviruses (Mumps) (ATCC VR-159), Rhinovirus type 39 (ATCC VR-340) and Rotavirus (University of Ottawa) for 3 minutes; HIV-1 (associated with AIDS) (Advanced Biotechnologies, Inc.) for 1 minute (60 seconds), and Norovirus (Norwalk virus), Feline Calicivirus (University of Ottawa) and Rabies Virus (GCV) for 30 seconds.

CONFLEKT HBV, HCV AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings (hospitals, nursing homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).
SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV, AND HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

CONTACT TIME: Allow surface to remain wet for HBV and HCV 5 minutes, for HIV-1 1 minute. These contact times will not control other common types of viruses and bacteria.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be antisepticed and disposed of according to local regulations for infectious waste disposal.

FUNGICIDAL ACTIVITY - Confluent is fungicidal against the pathogenic fungus Trichophyton mentagrophytes (MTCC 9353) (athlete's foot fungus) (a cause of ringworm) and Trichophyton violaceum (a cause of ringworm of the foot) when used with a 10 minute contact time on clean, non-porous hard surfaces such as found in bathrooms, shower stalls, locker rooms, or other areas commonly contacted by bare feet.

Efficacy Tests have demonstrated that Confluent is an effective bactericide, fungicide, and virucide in the presence of organic soil (5% blood serum).

MILDENAL - To control mold and mildew on pre-cleaned, hard, non-porous surfaces spray surface to be treated making sure to wet completely. Let air dry. Repeat application at weekly intervals or when mildew growth appears.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

KEEP OUT OF REACH OF CHILDREN. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if feasible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

Store in a dry place in a room temperature below 45°F or higher than 120°F. Do not reuse empty refill bottle.

RE: Updated Sub-Registration Label for:  
CONFLIKT  
EPA Reg. No. 1839-83-56753

Dear Sir or Madam:

Thank you for the updated product label that is being added to our files. This label is acceptable. A stamped label is enclosed for your records.

Sincerely,
STEPLAN COMPANY

Bruce L. Greene  
Product Registration Specialist
