Continuous Protection For 4 Months

Gentrol®
IGR Concentrate

with GENTROL®
Insect Growth Regulator

CONTROLS COCKROACHES, DRAIN AND FRUIT FLIES, BEDBUGS, AND STORED PRODUCT PEST POPULATIONS

USE IN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

FOR FOGGING IN FOOD HANDLING ESTABLISHMENTS

CONTAINS 10/1 FL OZ BOTTLES (286 ML)

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Storage: Store in a cool area away from children. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill empty container. Clean container promptly after emptying. Triple rinse as follows. Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling, if available or purchase and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

For information, call 1-800-248-7763.

2-1/2 x 1/2” Unvarnished Area for Lot Code. Does Not Print.
PRECAUTIONARY STATEMENTS – HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION: Harmful if ingested or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling.

FIRST AID: Call a poison control center or doctor immediately for treatment advice.

If swallowed • Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.

If in eyes • Hold eye open and rinse slowly and gently with water for 15-30 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If on skin or clothing • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-30 minutes.

If inhaled • Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-248-7070 for emergency medical treatment information.

Note to Physician: Contains petroleum distillates. Vomiting may cause aspiration pneumonitis.

PHYSICAL OR CHEMICAL HAZARDS: Do not use this product on or in electrical portions of equipment due to the possible shock hazard.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

CENTRAL Garden & Pet

DILUTION PREPARATION: For surface spray/paint brush, soil and crack and crevice preparations: Use 1 ounce of GENTROL® to 1 gallon of water. Partially fill the mixing container with water, add the GENTROL®, then fill the container to the one gallon mark with water. Stir to mix. Shake or stir before use. For fogging preparation: Follow equipment manufacturer’s instructions.

TANK MIXING: GENTROL® may be tank mixed with a herbicide currently registered for use, unless the product label prohibits such use. Use the resulting tank mixture in accordance with the more restrictive label limitations and precautions.

GENERAL SURFACE APPLICATION: Apply the GENTROL® dilution at a rate of 1 gallon per 1500 sq ft of surface area. Use spray application equipment capable of delivering a variable spray or fogging to uniformly apply the solution. Apply to areas such as walls, floors, ceilings, attics, basements, or crawl spaces. NOTE: Prior to treating around air ducts, shut off ventilation system. Allow treatment to dry prior to turning on ventilation system.

FOGGING (SPACE SPRAY/MIST) APPLICATION: Apply GENTROL® as a fog or an ultra-low volume (ULV) mist with equipment such as ULV mechanical misting sprayers, aerosol generators, or thermal foggers to achieve uniform coverage. Follow equipment manufacturer’s instructions. Apply at a rate of 1 ounce GENTROL® per 12,000 sq ft. GENTROL® may be tank mixed with other ULV insecticides, but not for fogging. Follow the directions of the more restrictive label when tank mixing. Use water or oil as a diluent depending on the type of equipment. Fogging applications are hard for larger facilities including warehouses (refer to Warehouses section below). Close room or warehouse and shut off all ventilation systems. Apply the products in line and direct mist toward all areas that may harbor target pests. After treatment, leave the room closed for 30 minutes or longer as recommended by the equipment manufacturer or the label of other products applied in tank mixing. Do not return to treated area until ventilated before reentry.

SPOT AND CRACK AND CREVICE APPLICATIONS: Apply GENTROL® diluted spray solution using either a pressure-mounted spray system capable of delivering a pinpoint or variable spray pattern or a device capable of covering evenly. Make crack and crevice applications directly to areas such as crevices, baseboards, floor, ceiling, attics, or walls. Make spot treatments to areas such as storage areas, closets, around water pipes, doors, windows, and behind and under appliances or equipment, furniture and beds. To treat bedbugs, apply to harborage points mentioned above, in addition, under beds, bottom side of box spring or box springs, do not treat linens and mattresses; under and behind night stands, on points where carpet and wall meet, cracks in base, molding, and other areas where bedbugs harborage. Repeat at 14 days for heavy infestations.

WAREHOUSES (Non-Food): Apply GENTROL® as a general surface fogging, spot or crack and crevice treatment in non-food storage warehouses. Apply to all areas that may harbor pests, including under and between pallets.

FOOD HANDLING ESTABLISHMENT APPLICATIONS: Apply GENTROL® as a general surface fogging, spot, or crack and crevice treatment in both food and non-food areas of Food Handling Establishments. These establishments are defined as places other than private residences where appropriate food is held, prepared, processed, or served. It also includes areas where food items are received, prepared, packaged, and stored, as well as enclosed food processing systems (milking builts, etc.).

SPOT AND CRACK AND CREVICE APPLICATIONS: Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food-handling surfaces.

For control of drain flies, fruit flies: Apply GENTROL® to areas of fly breeding. For drains, apply product into and around the drainport and catch basin area. Coat these areas thoroughly as fly larvae develop in the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

Alternate Directions for Food Application: Refer to the Dilution Preparation section of this label for the Dilution rate for GENTROL®. To convert GENTROL® dilution to a 3mL atomizing agent at machine’s rate. For best results, use the higher amount of the foaming agent rate range. Follow the requirements of the foam equipment manufacturer.

GENERAL INFORMATION: GENTROL®, an Insect Growth Regulator (IGR), is a synthetic juvenile hormone (kairomone) which disrupts the normal growth development of cockroaches, drain flies, fruit flies, bedbugs, and stored product pests (example of stored product pests include Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, larger grain beetles, merchant grain beetles, sawtoothed grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetles). Cockroaches and bedbugs exposed to the GENTROL® OR will become adults incapable of reproducing. GENTROL® also disrupts the normal life cycle of stored product pests, drain and fruit flies, and fleas, thus killing these insects during the pupal stage. In both cases, the cycle of an infestation ends. Use DAZCON® GENTROL® High Concentrate (GENTROL®) in apartment buildings, bakeries, clothing factories, breweries, bakeries, boiler rooms, cisterns, candy plants, grocery stores, day care centers, hotels, residential homes, hotels/motels, office buildings, kitchens, laboratories, cereal processing facilities, manufacturing plants, maufacturers, meat and produce canneries, nursing homes, restaurants, schools, locker rooms, stores, laundries, warehouses, as well as various modes of transportation such as aircraft, buses, trucks, rail cars, and marine vessels.

Use GENTROL® as a general surface spray, fogging, spot, or crack and crevice application. Prior to using in commercial or residential (household) food areas, please refer to the Food Handling Establishment Applications section of the label. The preparation prior to treatment and the clean up after application described therein are also to be followed for residential (household) use.

INSTRUCTIONS FOR USE: Mix GENTROL® with spray and use or apply spray equipment, such as hand-pressurized or power-operated sprayers capable of delivering general surface spray, fogging (space spray/mist), spot, crack and crevice spray applications, or with a paint brush, roller, or similar device.

SURFACE SPRAY APPLICATION: (Do not apply directly to food products.) General Area Treatments - Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves – areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment. Partial Area Treatments - GENTROL® can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established (6 feet in all directions from the treated area), where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

PANTRY/CABINETS, SMALL FOOD STORAGE AREAS: Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Do not store food in open containers in treated pantries. Destroy any exposed food packages to ensure proper control.

FOGGING (SPACE SPRAY/MIST) APPLICATION: Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves – areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

WAREHOUSES (Food): Apply GENTROL® as a normal surface fogging, spot, or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuff is not anticipated.
FIRST AID: Call a poison control center or doctor immediately for treatment advice.

If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses. If present, after the first 5 minutes. Then continue rinsing eye.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-246-1713 for emergency medical treatment information.

Note to Physicians: Contains petroleum distillates. Vomiting may cause aspiration pneumonia.

PHYSICAL OR CHEMICAL HAZARDS: Do not use this product in or near electrical portions of equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

CENTRAL®6, an Insect Growth Regulator (IGR), is a synthetic, pyrethroid hormone 'tool-kit' which disrupts the normal growth development of cockroaches,

- Grass flies, fruit flies, bedbugs, and stored product pests (examples of these pests include Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain borers, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetles).

Cockroaches and bedbugs exposed to the CENTRAL® IGR will become unable to reproduce. CENTRAL®I IGR also disrupts the normal life cycle of stored product pests. drain and fruit flies, and fleas, thus killing these insects during the pupal stage. In both cases, the cycle of an infestation ends. Use Central®I Concentrate (CENTRAL®I) in apartment buildings, office buildings, bowling alleys, theaters, bakeries, restaurants, schools, locker rooms, stores, taverns, warehouses, etc.
**GENERAL SURFACE APPLICATION:** Apply the GENEROL® solution at a rate of 1 gallon per 1000 sq ft of surface area. Use spray application equipment capable of delivering a variable spray or coating to uniformly apply the solution. Apply to areas such as walls, floors, ceilings, attics, basements, etc. In structural crevices. **NOTE:** Prior to treating around air ducts, shut off ventilation system. Allow treatment to dry prior to turning on ventilation system.

**FOGGING (SPACE SPRAY/MIST) APPLICATION:** Apply GENEROL® as a fog or an ultra-low volume (ULV) mist with equipment such as ULV mechanical misting sprayers, aerosol generators, or thermal foggers to achieve uniform coverage. Follow equipment manufacturer's instructions. Apply at a rate of 1 ounce GENEROL® per 12,000 cu ft. GENEROL® may be tank mixed with bifenthrins labeled for fogging. Follow the directions of the more restrictive label when tank mixing. Use water or oil as a diluent, depending on the type of equipment used. Fogging applications are best for larger facilities including warehouses (Refer to Warehouses section below). Close room or warehouse, and shut off all ventilation systems. Apply the product in the air and direct mist around all areas that may harbor target pests. After treatment, leave the room closed for 30 minutes or longer as recommended by the equipment manufacturer or the label of other products applied in tank mixing. Do not remain in treated area; ventilate before reentry.

<thead>
<tr>
<th><strong>INSTRUCTIONS FOR USE:</strong> Mix GENEROL® with diluent and apply with spray or hand application equipment such as hand-pressure or power-operated spray guns capable of delivering a general surface spray, fogging, space spray, mist, spot, crack, and crevice spray applications, or with a paint brush, roller, or similar device.</th>
<th><strong>DILUTION PREPARATION:</strong> For space spray, paint brush, spot and crack and crevice preparations: Use 1 ounce of GENEROL® per 1 gallon of diluent. Partially fill the mixing container with diluent, add the GENEROL®, shake or stir, and fill to final volume. Use diluted solution within 12 hours of mixing. Shake or stir before each use. For fogging preparation: Follow equipment manufacturer's instructions.</th>
<th><strong>TANK MIXING:</strong> GENEROL® may be tank mixed with an aldicarb currently registered for use, unless the product label prohibits such use. Use the resulting tank mixture in accordance with the more restrictive label limitations and precautions.</th>
</tr>
</thead>
</table>
SPOT AND CRACK AND CREVICE APPLICATIONS: Apply SEPTOL® spray solution using either a pressurized spray system capable of delivering a pinpoint or variable spray pattern or a device capable of maxing evenly. Make crack and crevice applications directly to areas such as crevices, baseboards, floors, ceilings, or walls. Make spot treatments to areas such as storage areas, closets, around header pipes, doors, windows, and behind and under appliances/equipment, furniture and beds.

To treat bedbugs, apply to harborage points mentioned above in addition, under beds, behind base of sofa springs (so not treat frame and mattresses), under and behind night stands, in corners where carpet meet cracks in baseboard, molding, and other areas where bedbugs harborage. Retreat at 14 days for heavy infestations.

WAREHOUSES (Non-Food): Apply SEPTOL® as a general surface, fogging spot, or crack and crevice treatment in non-food storage warehouses. Apply to all areas that may harbor pests, including under and between pallets.

FOOD HANDLING ESTABLISHMENT APPLICATIONS: Apply SEPTOL® as a general surface, fogging spot, or crack and crevice treatment in both food and non-food areas of Food Handling Establishments. These establishments are defined as places other than private residences where exposed food is held, prepared, processed, or served. It also includes areas where food items are received, prepared, packaged, and stored, as well as enclosed food processing systems (e.g., towers, etc.).

SPOT AND CRACK AND CREVICE APPLICATIONS: Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food-handling surfaces.

For control of drain flies, fruit flies, Apply SEPTOL® to areas of fly breeding. For drains, apply product into and around the downsputs and catch basin area. Coat these areas thoroughly as fly larvae develop in the scum buildup on the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

Alternate Directions for Foam Application: Refer to the Dilution Preparation section of this label for appropriate dilution rate for SEPTOL®. To convert SEPTOL® dilution to a foam, add foaming agent at manufacturer's rate. For best results, use the highest amount of the foaming agent rate range. Follow the requirements of the foam equipment manufacturer.

SURFACE SPRAY APPLICATION (Do not apply directly to food products).

GENERAL AREA TREATMENTS: Prior to application, remove or cover all food items. Also cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment. Partial area treatments - SEPTOL® can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a boundary...
it is filled with food items (e.g. boxes, jars, etc.), where all food-handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

**PANTRY/CABINETS, SMALL FOOD STORAGE AREAS:** Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all foods from containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Do not store food in open containers in treated pantries.

Destroy any infested food packages to ensure proper control.

**FOGGING (SPACE SPRAY/TENT) APPLICATION:** Prior to application, remove for cover all food items. Also, cover all food contact surfaces (i.e., equipment, process, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

**WAREHOUSES (Food):** Apply GENTROL® as a general surface, fogging, spot treatment or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuff is not anticipated.
STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Storage: Store in a cool area away from children. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill empty container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to stop. Fill the container 1/8 full with water and reseal. Shake for 10 seconds. Pour mixture into application equipment or a mix tank or store inside for later use or disposal. Drain for 10 seconds after the flow begins to stop. Repeat this procedure two more times. Then offer for recycling, if available or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Other makes no warranty, expressed or implied, concerning the use of this product other than is indicated on the label. Buyer assumes all risks of use and handling of this material when such use and handling are contrary to label instructions.
