FOOD HANDLING ESTABLISHMENT APPLICATIONS:

Systems (mills, dairies, etc.).

General Area Treatments: Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., recipients, cabinets, shelves) - areas where exposed food may be handled, fed, prepared, processed, or served. If pest control procedures are used, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

Areas that are difficult to treat and require multiple treatments, such as corners and crevices, can be treated by applying the concentrate with a pinpoint or variable spray pattern or a device capable of coating evenly. Make follow-up treatments to areas where bed bugs have been observed. Retreat at 14 days for heavy infestations. Use GENTROL® to treat bed bugs during the pupal stage. In both cases, the cycle of an infestation ends. Use GENTROL® as a spot and crack and crevice treatment in both food and non-food areas of Food Handling Establishments. These establishments are in or around food or food products.

Insects that are not killed by the GENTROL® IGR will continue to feed on the treated food; therefore, food must be discarded or reprocessed. Food must be repackaged or resold, as required or regulated by local authorities.

Apply GENTROL® as a general surface spray, fogging, and fill to final volume. Use diluted solution within 48 hours of mixing. Shake the diluted solution for 10 seconds before use. Pour rinsate into the container. Do not reuse or refill empty container. Clean container promptly after use. Do not apply directly to food or stored in such a way that direct contact with the foodstuff is not anticipated.

For control of drain flies, fruit flies:

Apply as a general surface spray, fogging, and fill to final volume. Use diluted solution within 48 hours of mixing. Shake the diluted solution for 10 seconds before use. Pour rinsate into the container. Do not reuse or refill empty container. Clean container promptly after use. Do not apply directly to food or stored in such a way that direct contact with the foodstuff is not anticipated.
**NOTE TO CLIENT:** If submitting an InDesign file, **INCLUDE A HI-RES PDF Copy.**

**NOTE:** DOCUMENT RASTER EFFECTS SETTINGS SHOULD BE SET AT 300 RESOLUTION

---

**FIRST AID**

- **If swallowed:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

- **If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Seek medical attention.

- **If on skin:** Wash skin with plenty of water for 15-20 minutes. Seek medical attention.

- **If on clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Remove contaminated clothing and wash immediately. If on hair, wash hair with plenty of water for 15-20 minutes.

- **If breathed in:** Remove victim to fresh air if at all possible. If not breathing, give artificial respiration, preferably by mouth-to-mouth. Do not administer oxygen or artificial respiration with a mouth-to-mouth resuscitation mask.

---

**WARNING**

- It is a violation of Federal Law to use this product in a manner inconsistent with this label.

- Storage: Store in a cool area away from children. Do not store in hot areas with excessive sunlight. To ensure that the contents of the container are not exposed to direct sunlight, make certain that the container is in a cool area and protected from direct sunlight. If the container is not protected from the sun, the product may become too hot and even ignite.

- Poison Control Center: Call 1-800-248-7763 to contact the Poison Control Center.

**Some Notes to the Designer:**

1. Hold all text 1/8" from Cut Marks (Also critical graphic elements).
2. Bled Full coverage background graphs 1/8" Beyond Cut Marks.
3. PELL HERE,recommend a 4mm upper corner of OP1.
4. OP1 has full coverage background bleed 1/16" to 1/32" onto OP2.
5. This template is provided in 2 layers. Simply turn off the test layer to use the layout only as a placed image in your document.
**Gentrol® IGR Concentrate (GENTROL®) in apartment buildings, grocery stores, day care centers, hospitals, residential homes, hotels/motels, warehouses (Refer to section below). Close room or warehouse to keep insects from escaping. Once room or warehouse is closed for 30 minutes or longer as recommended by the equipment manufacturer, treatment to dry prior to turning on ventilation system.

**FOGGING (SPACE SPRAY/MIST) APPLICATION:** Prior to application, remove or cover all food containers to ensure proper control. Use 1 fl. ounce of GENTROL® to 1 gallon of diluent. For surface spray/paint brush, spot and crack treatments. For fogging preparation: Use 1 fl. ounce and apply with a ULV (ultra-low volume) misting sprayer, aerosol generator, or thermal fogger to achieve uniform coverage. Refill the ULV or aerosol generator when indicated.

Seller makes no warranty, expressed or implied, concerning the use of this product.

STORAGE AND DISPOSAL:

Do not store in open containers or in treated premises. Do not store in the presence of fire or electrical equipment. Do not store in areas where igniters or sources of ignition are present. Do not store in areas that may become cold temperatures or in areas where moisture may condense, or be applied to areas where food may be handled, held, prepared, processed, or served. Do not store in areas where exposed food may be handled, held, prepared, processed, or served. If left unnoticed, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment. Do not store in areas near sources of ignition.

GENTROL® may be tank mixed with an adulticide currently approved for pest control. Use 1 fl ounce of GENTROL® to 1 gallon of diluent. Do not use this product in or on electrical equipment, water tanks, or oil tanks. Do not use this product in or on any electrical equipment or in or on any electrical equipment unless it is in accordance with the manufacturer's precautions on the label. Use GENTROL® as a general surface spray, fogging, spot, or crack and crevice spray applications, or with a paint brush, misting sprayers, aerosol generators, or thermal foggers to achieve uniform coverage. Apply GENTROL® at a rate of 0.0625 fl ounce per 12,000 cu ft. For crack and crevice treatment, use a method capable of removing chemical residues after treatment.

Dilution Preparations:

GENTROL® can be applied to partial areas of food handling establishments in areas where exposed food may be handled, held, prepared, processed, or served. If left unnoticed, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

GENTROL® can be applied in areas of food handling establishments in areas where exposed food may be handled, held, prepared, processed, or served. If left unnoticed, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

If flame is detected, immediately stop use of GENTROL®, turn off gas supply. Do not use water. Use a dry chemical powder agent or carbon dioxide fire extinguisher. Do not use a water fire extinguisher.

ANIMALS – CAUTION:

Do not use on or around domestic animals, birds, or pets. Do not use around fish ponds, other water sources, or any water-based systems.

Note to Veterinarian:

Inform the veterinarian of the product name and the route of administration.

For information, call 1-800-248-7763.
