DUPONT CROP PROTECTION

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

DUPONT™ CURZATE® 60 DF FUNGICIDE

EPA REG. NO. 352-592
EPA SLN NO. WA-990021

FOR CONTROL OF DOWNY MILDEW IN SPINACH, CABBAGE, SWISS CHARD AND TABLE BEET GROWN FOR SEED

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DuPont CURZATE® 60 DF fungicide may be applied to spinach, cabbage, Swiss chard and table beet grown for seed production only for the control of downy mildew. Consult the CURZATE® 60 DF EPA-registered label for additional requirements, restrictions and precautions.

HOW TO USE

Use Rate, tank mixes and timing

- Apply CURZATE® 60 DF fungicide at 3.2 ounces per application per acre in sufficient water to obtain thorough spray coverage of the crop.
- Use CURZATE® 60 DF only in combination with another registered protectant fungicide, such as Manzate® Pro-Stick™, or chlorothalonil.
- Applications can be made prior to or after transplanting.
- Initial applications should start when local conditions indicate that downy mildew infection is imminent.
- Make applications on a 5-7 day interval as long as disease conditions exist.
- Do not exceed 5 applications of CURZATE® 60 DF per 12 month period.
- For conventional ground application equipment, including tractor-mounted sprayers, boom or backpack sprayers, use a minimum of 20 gals/acre.
- For hard-to-wet foliage, a spray adjuvant may be used to help increase spray coverage and retention.

RESTRICTIONS/PRECAUTIONS

- Do not apply by air.
- For use under this SLN label do not apply this product through any type of irrigation system.
- For use only on crops grown for seed.
- All cabbage, spinach, Swiss chard and table beet seed screenings shall be disposed of in such a way that they cannot be distributed or used for food or feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA forthwith upon request. Disposal records shall consist of documentation from a controlled dumpsite, incinerator, or other equivalent disposal site and shall show the lot numbers, amount of material disposed of, its grower(s), and the date of disposal.
- No portion of the cabbage, spinach, Swiss chard and table beet seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
- Cabbage, spinach, Swiss chard and table beet seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Cabbage, spinach, Swiss chard and table beet seed may not be distributed for human consumption or animal feed.
- Do not replant treated fields to any crop within 30 days after last CURZATE® 60 DF treatment.

IMPORTANT
BEFORE USING CURZATE® 60 DF FUNGICIDE, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

WSDA Aquatic Advisory
This pesticide is toxic to fish and aquatic invertebrates. DuPont™ Curzate® 60DF fungicide should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program website at http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance:
Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

Read the Limitation of Warranty and Liability on the section 3 Federal product label before buying or using this product. If terms are not acceptable, return the unopened package at once to seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.

This label for DuPont CURZATE® 60 DF fungicide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2014.
