**Motomco FARM & HOME**

**JAGUAR®**

**RODENTICIDE**

This product may only be used inside and within 100 feet of agricultural buildings and man-made agricultural structures.

**KILLS RATS & MICE**

**ACTIVE INGREDIENT:** Brodifacoum (CAS 69073-10-0) . . . . 0.005%

**Pesticide:** Pelleted Bait

**With Brodifacoum**

**Net Weight:** 12 lbs (5.4 kg)

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION** See back panels for First Aid and additional precautions statements.

**DIRECTIONS FOR USE** (Continued from other panel)

This product may only be applied to control Norway rats, and roof rats within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be water-resistant to commercial rainwater inlets and outfalls in order to effect an effective barrier against rainwater inlets or outfalls.

**FORAGE:** Do not broadcast bait. When used in commercial feed lots or in areas prone to vandalism, this product must be applied in tamper-resistant bait stations. The operator must be familiar with the location of all bait stations.

**APPLICATION DIRECTIONS:** Rodent control activities should be conducted in a manner to minimize the risk of exposure to household pets and to the general public.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed. Causes respiratory irritation. Keep away from children, domestic animals, and livestock.

All handlers (including applicators) must wear gloves plus socks, and gloves. Any person who retrieves dead animals or equipment wash water or rinsate.

**NOTICE TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If needed, consult a physician. In case of contact, immediately wash skin with soap and water for at least 15 minutes or until normal. In serious cases, blood transfusions may be needed.

**NOTE TO PHYSICIAN**

If exposed, this material may reduce the clotting ability of the blood and cause bleeding. If needed, consult a physician. In case of contact, immediately wash skin with soap and water for at least 15 minutes or until normal. In serious cases, blood transfusions may be needed.
