BPC 68915

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE AND SKIN BURNING. MAY BE LETHAL IF INHALED. MAY CAUSE ALLERGIC SKIN REACTION. HARMFUL IF INHALED, HARMFUL IF SWALLOWED. Do not get apt on, skin or eyes. If product is splashed onto skin or eyes, wash thoroughly with water. Keep product out of reach of children. Do not contaminate water, foods, or feed by storage, disposal, or application of this product. Keep not feed container. Do not reuse this container. Do not re-use or refill this container. Do not return this container to store. Read label before application. May contaminate water by cleaning of equipment or disposal of waste. Apply this pesticide only in accordance with the requirements of a federal Pesticide Disposal Elimination System (PDUS) permit and the permitting authority has been satisfied.

STORAGE AND POSAL

PHYSICAL AND CHEMICAL PROPERTIES: This product is a yellow liquid. Do not store with strong oxidizing or reducing agents. Store in a cool, dark area, away from heat and fire. Do not allow to freeze or boil. Store for not feed container. Controls bacteria, fungi and algae in industrial recirculating water cooling towers. CLOTHING

FIRST AID

CLOTHING

KEEP OUT OF REACH OF CHILDREN

IF INHALED

IF INHALED

IF INHALED

NOTE TO PHYSICIAN: Prussic acid damage may contaminate the use of gastric lavage. Poisoning by contact with the eyes or skin may result in blindness or severe dermal irritation. Note that it should be confirmed with membrane manufacturers.

OIL FIELD INJECTION WATERS

For the control of sulfate reducing bacteria in oil field waters, slug treat with 67 to 332 ppm BPC 68915 Industrial Microbiocide with reverse osmosis membranes. Use of BPC 68915 Industrial Microbiocide for periodic membrane cleaning, add 0.4 to 1.0 pound of BPC 68915 Industrial Microbiocide to every 120 gallons of cleaning solution (0.15 ppm active ingredient). Badly fouled systems should be cleaned before final treatment is begun. NOTE: For use only in industrial air washing systems that maintain continuous water flow. LIMITATIONS: BPC 68915 Industrial Microbiocide is recommended for use in aqueous metalworking fluids such as emulsified petroleum oils or naphthalene sulfonate. These fluids are usually prepared by diluting the product concentrates 1:40 to 1:60 with water. These products may be incompatible with naphthalene sulfonate or other metalworking fluid additives. To maintain this treatment level by adding a continuous feed method at 32 fluid ounces per 1,000 gallons emulsion (4 to 10 pounds) to be added to 1,000 gallons emulsion (2 to 10 pounds) every 8 to 12 weeks. For periodic membrane cleaning, add 0.4 to 1.0 pound of BPC 68915 Industrial Microbiocide to every 120 gallons of cleaning solution (0.15 ppm active ingredient).

ENVIRONMENTAL HAZARDS

This chemical is environmentally hazardous. Do not discharge this chemical and other hazardous substances into water, food, soil or feed by storage, disposal, or application of this product or wastewater systems without previously notifying the local sewage treatment plant authority. Or, contact your State Water Board or Regional Office for information. Ask your local health or environmental authority if any special restrictions apply. Apply the precautions only as specified on the label.
