**INERT INGREDIENTS:**

**equipment, must wear:**

**clothing:**

- Long-sleeved shirt and long pants
- Chemical-resistant gloves
- Protective eye wear (goggles, face shield, or safety glasses)
- Respirator filters

*NOTE:* Aerial applicators are not required to use an enclosed cab/cockpit and are not required to wear PPE while the PPE specified in the PPE section of this labeling for handlers engaged in those activities for which use of a respirator with an organic vapor (OV) cartridge or canister with any R, P, or HE prefilter. Please note that N designation for respirator filters does not apply when application is made with oils.

**FIRST AID:**

- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.

**OPERATIONAL USE INSTRUCTIONS**

- Motorized ground-equipment applicators must:
  - Use only when the bees are least active.
  - Do not apply this product or allow it to drift to blooming crops or planter rows.
  - Apply only to ornamentals in an effort to minimize the potential of incidental deposition into the water body.
  - Do not contaminate bodies of water when disposing of equipment washwaters.

- Users should:
  - Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
  - Wear the personal protective equipment required in the PPE section of this labeling for mixer/loaders.
  - Do not apply this material on or within 100 feet of ponds, commercial fish ponds, marshes or estuaries, except when necessary to target areas where adult mosquitoes are present.

- Aerial Application:
  - The entire spray system must be inspected before each operation to correct any leaks or obstructions, to detect corrosion and/or application advisor. Read and follow the entire label of each product to be used in the tank mix with this product.
  - Climate factors (e.g., ambient temperature, wind speed/direction) as determined using reliable means must be evaluated with the application technique and equipment based on how the crops, pests and weather will allow. Weather should be as near to predicted landing as possible.

- DIRECTIONS FOR USE:

- Use of Teflon and/or TFE (Fluorocarbon) nozzle tips and/or Teflon and/or TFE spray solutions is essential to avoid drift and aerial contamination.
- The entire spray system must be inspected before each operation to correct any leaks or obstructions, to detect corrosion.
- Directions from the equipment manufacturer must be followed. Avoid use of steel or galvanized steel.
- The spray equipment must be adjusted so that the volume median diameter produced is less than 60 microns (Dv 0.5 < 60 μm) and that 90% of the spray is contained in droplets smaller than 75 microns (Dv 0.9 < 75 μm). Directions from the equipment manufacturer must be followed. Directions from the equipment manufacturer must be followed.
