INSTRUCTIONS: This product contains Trimer® Herbicide. Trimer® Herbicide controls a wide range of lawn weeds, including dandelion, chickweed, burdock, clover, black medick, burs, plantain, and many other listed weeds commonly found in lawns. In addition, this fertilizer provides a supply of plant food that can be utilized by the lawn if turf is not heavily infested with weeds. For best results, apply when winds are not high and when weeds are young and actively growing, preferably in the morning or when the dew is on the grass. If grass is moist at this time, application will be more effective, and the chance of washoff will be less. Continue to water thoroughly for 1 to 2 days after application. At this time a thorough watering should be made when the dew is on the grass. If grass is moist at this time, application will be more effective, and the chance of washoff will be less.
