GENERAL INFORMATION
BRONC® is specially formulated to be used with agricultural chemicals, which perform best when mixed with ammonium sulfate.

BRONC is filtered through a special process to remove impurities and other contaminants generally associated with dry or other liquid ammonium sulfate products. This lack of sedimentation reduces nozzle plugging, wear and corrosion of equipment when used with post emergent herbicides that call for an ammonium sulfate additive.

Typical Properties:
Appearance.............................................................................................................. Light Green Liquid
Specific Gravity ............................................................................................................................1.217
Freezing Temperature .....................................................................................................................4°F
pH ........................................................................................................................................... 6.0 - 7.0
Corrosion Factor ................................................................................................................... Very Low

DIRECTIONS FOR USE
Generally, use 2.5 to 5.0 gallons of BRONC per 100 gallons of spray mixture.

Refer to the following conversion table to determine the ammonium sulfate equivalence of liquid BRONC to dry ammonium sulfate.

Always read and follow all directions on this label and on the label of the herbicide being used.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage and disposal.

STORAGE: Store in original container only and keep container tightly sealed. Do not allow water to be introduced to the contents of this container. Store in closed storage areas. Do not store near heat or open flame. Use caution when moving, opening, closing or pouring.

PRODUCT DISPOSAL: Improper disposal of excess spray mixtures or rinsate is a violation of Federal Law. Wastes resulting from use of this product may be disposed of through on-site spray application, or at an approved waste disposal facility. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment washwaters, or spray waste.

CONTAINER HANDLING: Triple rinse (or equivalent), then offer for recycling or reconditioning. Recycling cleaned containers is the best option of container disposal. ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Alternatively, puncture and dispose of the container in a sanitary landfill or by incineration. Do not burn unless allowed by state and local ordinances. If burned, stay out of smoke. Burning is not a legal method of container disposal in Washington State.
Conditions of Sale and Limitation of Warranty and Liability:
