Formulated for Home • Hospital • School • Hotel • Motel • Office • Restaurant • Locker and Gym Room • Factory • Institution
Meets ACOG/permisso spray products test standards for Hospital disinfectants.

Precautionary Statements
Hazard to Humans and Domestic Animals
Keep Out of Reach of Children

Warning
Causes eye irritation. Do not get in eyes. Avoid contact with skin. Avoid contamination of food/products.

First Aid
If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lens, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, or mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
Have the product container or label with you when calling a poison control center or doctor for treatment advice.

Attention: This product contains o-phenylenediamine, a chemical known to the State of California to cause cancer in animals to Prop. 65 (State of California Safe Drinking Water and Toxic Enforcement Act of 1986).

Physical Hazards
Extremely Flammable. Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

Directions for Use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
This product is not to be used as a terminal disinfectant in high-level disinfection on any surface or instrument that (1) is introduced directly into the human body, either in or on contact with the bloodstream or normally sterile areas of the body; or (2) contacts mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to polish or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

 nil: "YHV" (US VR) on preclinical environmental surfaces.
 nil: "US VR" on preclinical environmental surfaces.

Special Instructions for Cleaning and Disinfection of Surfaces/Objects Soiled with Blood and Body Fluids on preclinical environment surfaces or objects previously soaked with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of nonsterile surfaces/objects with blood, blood/body fluids and in which the surrondings/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV

Personal Protection: When handling items soiled with blood or body fluids, use appropriate barrier protection such as disposable latex gloves, gowns, masks or eye coverings.

Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant.

Disposal of Infectious Materials: Blood and other body fluids should be handled and disposed of according to Federal, state and local regulations for infectious waste disposal.

Contact Time: Leave surface wet for at least one minute.

After surface is cleaned, hold can upright and spray 6 to 8 inches from surface to be treated until surface becomes wet. Allow spray to dry without wiping, allowing surface to contact treated surface for a minimum of 10 minutes prior to wiping.

For Disinfection of Immune Surfaces: This disinfectant is an effective germicide that kills Staphylococcus aureus, Salmonella enterica, Pseudomonas aeruginosa, Staphylococcus epidermidis, Klebsiella pneumoniae (ESBL), Pseudomonas aeruginosa, and Enterococcus faecalis (VRE) and Methicillin-resistant Staphylococcus aureus (MRSA).

It kills viruses and fungi on hard, non-porous surfaces. "Viruses: influenza A (H1N1), HIV-1, poliovirus type 1, coxsackievirus A16, echovirus 7, adenovirus type 3, adenovirus type 7, adenovirus type 11, adenovirus type 12; fungi: Trichophyton mentagrophytes (Sakaguchi's strain)."

Due to disinfection of environmental surfaces, these metal- and plastic-covered environmental surfaces, plastic or ceramic tiles, shower stalls, metal or plastic storage tanks, garbage cans, light switches, telephones and keyboards, and non-wood surfaces of solid woods, enamel cabinets, athletic equipment and toys, and not under sinks, in sinks, countertops, toilet seats, and other places where side-stepping gauze is a problem.

To Clean: Cleansurfaces by using usual cleaning methods.

For Disinfection: Hold dispenser upright and spray 6 to 8 inches from preclinical surface until surface is wet. Allow disinfectant to remain on the surface for 10 minutes before wiping off. Repeated application may be necessary.

For Control of Mold & Mildew: Control mold and mildew on hard surfaces such as concrete, metal, glass or masonry drain covers, plastic storage tanks, or other surfaces in which the use of this product is appropriate. Do not puncture or incinerate container.

Directions to Control Mold & Mildew: Hold dispenser upright and spray 6 to 8 inches from preclinical surface until surface is wet. Allow disinfectant to remain on the surface for 10 minutes before wiping off. Repeated application may be necessary.

Do not use on polished wood furniture or polyvinyl surfaces.

Storage: Store in a cool dry room. Do not freeze or store in open flame. Do not use for food or for food contact surfaces.
