MaxiSpray Plus

**EFFECTIVE AGAINST**
Mycobacterium tuberculosis var. bovis (BCG)**
Staphylococcus aureus
Pseudomonas aeruginosa
Salmonell choleraesuis
Tuberculosis meningitis
Mycobacterium avium complex (MBC).

**DESCRIPTION**
MaxiSpray Plus is a multi-purpose disinfectant/decontaminant cleaner for use on hard, non-porous inanimate surfaces.

It is useful in hospital operating rooms, non-sterile areas, non-sterile areas of hospital, surgical centers, and other clinical areas where control of cross contamination between treated surfaces is important.

MaxiSpray Plus will effectively clean and disinfect, when used as directed, such items as interior surfaces of infant incubators and basins, exterior surfaces of anesthesia machines and respiratory equipment (e.g., operating room tables and lights, and other surfaces) equipment surfaces, operating room equipment, P.T.E. equipment surfaces, animal cages, exterior surfaces of dental operators, dental chairs in rooms, and exterior surfaces of dental cures, which are made of plastic or glass, polyvinyl chloride, polyethylene, polyester, and other plastic, glass, and metal.

MaxiSpray Plus is effective against Staphylococcus aureus, Pseudomonas aeruginosa, Tuberculosis meningitis, and Salmonella choleraesuis.

Wipe surface using a towel or cloth, or use a spray bottle and spray surface with MaxiSpray Plus directly on treated surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.

Spray MaxiSpray Plus directly on pre-sterilized surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.

For use as a pre-cleaning desinfection spray. Place instruments in a container with MaxiSpray Plus to allow thorough and complete cleaning of all instrument surfaces and allow to remain visibly wet for 30 seconds. Remove and rinse instruments. Follow with appropriate cleaning and disinfection process.

FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES, INCLUDING H1N1, HIV, and HCV APPLICATIONS:

Spray MaxiSpray Plus directly onto pre-sterilized surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.

Spray MaxiSpray Plus directly onto pre-sterilized surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.

Spray MaxiSpray Plus directly onto pre-sterilized surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.

Spray MaxiSpray Plus directly onto pre-sterilized surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 3 minutes at room temperature (65°F-72°C), FOR USE AS A DISINFECTANT ON NON-STERILE SURFACES.
