PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Keep away from humans, domestic animals and pets. May be harmful if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling bait.

FIRST AID
HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE.

IF SWALLOWED:
- Call a Poison Control Center, doctor or “HOT LINE NUMBER 1-800-424-9300 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison center control or doctor.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 20 minutes.
- Call a poison control center, doctor or “HOT LINE NUMBER 1-800-424-9300 immediately for treatment advice.

You may also contact HOT LINE NUMBER 1-800-855-7378 (NPIC) National Pesticide Information Center for health concerns, emergency medical treatment information or pesticide incidents.

NOTE TO PHYSICIAN: This product is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Subcutaneous symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.
STORAGE: Store only in original container, in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
PESTICIDE/CONTAINER DISPOSAL: If Empty: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, if partially filled. Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place any unused product down any indoor or outdoor drain.

ENVIRONMENTAL HAZARDS
This product is toxic to mammals and birds. Do not apply directly to water, or to areas where surface water is present or to intermittent areas below the mean high water mark. Dogs and other predatory scavenging mammals might be poisoned if they feed upon animals that have eaten this bait.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides.
To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of the reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooded livestock, raptors, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats, and house mice inside and against outside walls of homes, industrial and agricultural buildings and similar man-made structures. This product may also be used in alleys located in urban areas, inside transport vehicles (trucks, trains, aircraft), and inside and against outside walls of related port or terminal buildings. Do not use this product in sewers. For use in non-food/feed areas. Do not contaminate human or pet food preparations items or areas. Do not place near or inside ventilation duct openings. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rodents will most likely find and consume the bait. Generally, these are along walls, by gravelled openings, or in boxes, burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food accessible to rodents as possible.

APPLICATION DIRECTIONS:
The active ingredient in this product is different from anticoagulant rodenticides. Individual mice cease feeding after consuming a toxic dose. Rate: Apply 2 to 5 place packs per placement location. Space placements at intervals of 15 to 30 feet.
Mice: Apply 1 to 2 place packs per placement. Space placements at intervals of 8 to 12 feet. Larger placements, up to 6 place packs, may be needed at points of extremely high mouse activity. FOLLOW-UP: Adjust the amount of bait applied to the level of feeding by target rodents expected at each placement location. Highest bait consumption is expected to occur during the first day or two after treatment. After several days, inspect bait placements and replenish bait at sites where there is heavy feeding or where there is continued evidence of rodent activity. Maintain bait for at least one week and continue baiting until signs of rodent activity have ceased or it becomes clear that the remaining rodents are not attracted to the bait.

Collect and properly dispose of all dead rodents and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

Notice of Warranty
J.T. EATON & CO., INC. MAKES NO WARRANTY OF MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE, OR OTHERWISE, EXPRESS OR IMPLIED CONCERNING THIS PRODUCT OR ITS USES WHICH EXTEND BEYOND THE USE OF THE PRODUCT UNDER NORMAL CONDITIONS IN ACCORD WITH THE STATEMENTS MADE ON THIS LABEL.

Top Gun™
Pellet Rodenticide Place Pack
Mouse and Rat Poison
For Indoor and Outdoor Rodent Control
KILLS HOUSE MICE, NORWAY RATS AND ROOF RATS
House Mice, Norway Rats and Roof Rats usually consume a lethal dose in a single night's feeding, but it may take two or more days from time of bait consumption for these rodents to die. Rodents cease feeding after consuming a toxic dose. This product is effective against anticoagulant-resistant mice and rats.

KEEP OUT OF REACH OF CHILDREN
CAUTION
