NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage. See back panels for additional precautionary statements and first aid.

TUBERCULOSIS ACTIVITY – This product exhibits disinfected efficacy against Mycobacterium tuberculosis BGC at 20 organs Guenther (1951) when the infected surface is allowed to remain wet for 5 minutes. Using agar plate AHA method under Good Laboratory Practices (GLP), in the presence of 5% blood serum and a 3 minute contact time, unless otherwise noted, SaniZide Plus Germline Solution killed the following organisms on hard non-porous inanimate surfaces:

ANTIMICROBIAL ACTIVITY – Methicillin resistant Staphylococcus aureus (MRSA), Vancomycin resistant Enterococcus faecalis (VRE), vancomycin intermediate resistant Staphylococcus aureus (VISA), and Staphylococcus epidermidis (SAP) are commonly associated with medical devices. SaniZide Plus Germline Solution reduced or eliminated these organisms on hard non-porous inanimate surfaces.

MILDEWSTAIN – To control mildew and mildew on pre-cleaned, hard, non-porous, surfaces, spray solution to be treated thoroughly. Allow to remain wet for 10 minutes. Rinse application of weekly intervals or when mildew growth appears.

FUNGICIDAL ACTIVITY – This product is fungicidal against the fungal fungi, Zoophthora sp. (athletes foot fungi), when used with a 10 minute contact time on corn, cotton, or other similarly contaminated or wetted areas, surface, or area is commonly contaminated or bare by feet.

“VIRUCIDAL ACTIVITY – This product kills on hard, non-porous inanimate surfaces when allowed to remain wet for 10 minutes. Contact time against Hepatitis A Virus (HAV), Herpes Simplex Virus Type 1 and 2, and Human Immunodeficiency Virus (HIV) is 10 minutes. Contact time against RSV virus is 5 minutes.

KILLS HIV-1, HBV and HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in 10 minutes on the tested organisms. The product is effective for the following organisms: Hepatitis B Virus, Herpes Simplex Virus Type 1 and 2, and Human Immunodeficiency Virus (HIV-1 and HIV-2) as well as for the following viruses: Hepatitis A Virus (HAV), Herpes Simplex Virus Type 2 (HSV-2), and Varicella Zoster Virus (VZV). The disinfected efficacies for these viruses were determined using the agar plate diffusion method with standard test procedures.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV and HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

PERSONAL PROTECTION When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, and eye coverings.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product. CONTACT TIME: Allow surfaces to remain wet for HBV and HCV 5 minutes. For HIV-1 10 minutes. These contact times will not control other common types of viruses and bacteria.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids must be suitably contained and disposed of according to local regulations for infectious waste disposal. Efficacy tests have demonstrated that this product is an EFFECTIVE BACTERICIDE, FUNGICIDE, AND VIRUCIDE IN THE PRESENCE OF ORGANIC SOIL (BLOOD SERUM).

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. SaniZide Plus Germline Solution is designed and intended for use on hard surfaces in kitchens, bathrooms, and similar household areas. This product is effective on medical devices, baby bottles, pacifiers, night tables, nursery furnishings, school, food processing plants, restaurants, transportation terminals, office buildings, and all other similar sites. SaniZide Plus Germline Solution is for use in and around healthcare settings where housekeeping is of prime importance in controlling the hazard of cross-contamination. It is formulated to disintegrate hard, non-porous, inanimate, non-porous, inanimate, hard non-porous inanimate surfaces, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tiles, plastic surfaces, bathrooms, showers, sinks, bathtubs, and cabinets. For plastic and painted surfaces, spot test on an inconspicuous area before use. When treating lab equipment, tools, appliances, and other items. A wipe with portable water is required for surfaces to be dried by contact. In addition, this product decontaminates areas which are hard to keep fresh cleaning, such as garbage storage areas, trash garbage bins and car care, laundry, red couches and other areas which are prone to be caused by microorganisms. This product is not to be used on any cotton, or metal items in food establishments.

DISINFECTION, DISINFECTING AND CLEANING – Remove gross filth and heavy soil prior to application of this product. Hold container 6 to 8 inches from surfaces to be treated. Spray area until it is covered with the solution. Allow product to penetrate and the surface to remain wet for 10 minutes. For HIV-1 10 minutes. For HBV and HCV 5 minutes. For RSV virus 10 minutes. RGB virus 5 minutes. Do not mix with other chemical disinfectants or cleaners.

ONE-STEP CLEANING AND DISINFECTION OF TOILET BOWLS AND URINALS – When using this product, remove all waste from the toilet bowl or urinal. Pour solution down the drain. Allow solution to remain wet for 10 minutes. For HIV-1 10 minutes. For HBV and HCV 5 minutes. RGB virus 5 minutes. Do not mix with other chemical disinfectants or cleaners.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE THE ENVIRONMENT OR FOODS. KEEP OUT OF REACH OF CHILDREN. Store in a cool, dry, and protected place.

PESTICIDE STORAGE – Store in a dry place where no known temperature between 50° F and 80° F. When used in a household, keep out of reach of children.

PESTICIDE DISPOSAL – Pesticide waste is hazardous waste. Improper disposal of excess pesticides, spray mixtures, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Environmental Control Agency or the Institutional Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL – Non-reentry containers, do not use or refill container. Clean each container. Pesticide products should be disposed of in a manner consistent with the laws of the State of purchase.

ReENTERING CONTAINER – Non-reentry container, do not use or refill container. Clean each container. Pesticide products should be disposed of in a manner consistent with the laws of the State of purchase.

Keep out of reach of children.
