STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE
Do not reuse empty container. Keep from freezing.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
Nonrefillable container. Clean container promptly after emptying. Triple rinse as follows:

Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer container for recycling, if available.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or on clothing. Wear chemical splash-proof goggles or face shield, rubber gloves and protective clothing. Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

IN CASE OF EMERGENCY, CALL A POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

1-800-851-7145

Have the product container or label with you when calling a Poison Control Center or doctor going in for treatment.

Note to Physician: Probable mucosal damage may contraindicate gastric lavage.
This product is a one-step disinfectant cleaner and deodorizer designed for general cleaning, disinfecting and deodorizing of hard, non-porous environmental surfaces. It cleans quickly by removing dirt, grime, mold, mildew, body oils and other common soils found in hospitals, nursing homes, schools and colleges, medical offices, hotels, motels, public areas, restrooms and foodservice establishments.

It is designed for use on the following hard, non-porous environmental surfaces: vinyl, painted surfaces, plastic, glazed ceramic, glazed porcelain, chrome, aluminum, laminated surfaces and baked enamel surfaces associated with floors, walls, ceilings, tables, chairs, counter tops,.telephones, fixtures, glazed tile, toilets, urinals, sinks, shower rooms and locker rooms areas — any hard, non-porous washable surfaces where disinfection is required. This product non-damaging formula eliminates the time and labor normally required for rinsing. A portable water rinse is required for food contact surfaces. Do not use on glasses, dishes or utensils.

When used in accordance with the directions, this product contains 600 ppm of active quaternary amine cationic surfactants. This makes it effective against a wide variety of pathogenic microorganisms.

Using approved AOAC test methods under Good Laboratory Practices, in the presence of 400 ppm hard water, 0% serum load and 10 minutes contact time, this product kills the following hard non-porous inanimate surfaces:

- **Bacteria** — Pseudomonas aeruginosa, Staphylococcus aureus, Salmonella enterica, Acinetobacter baumannii, Azotobacter calcoaceticus, Enterococcus faecalis, Escherichia coli, Escherichia coli 0157:W7, Klebsiella pneumoniae, Listeria monocytogenes, Proteus mirabilis, Proteus vulgaris, Salmonella enterica, Salmonella typhi, Shigella dysenteriae, Staphylococcus epidermidis, Streptococcus agalactiae, Staphylococcus pyogenes

- **Antibiotic-Resistant Bacteria** — Enterococcus faecalis, Resistant to Vancocin (VRE); Staphylococcus aureus, Intermediate Vancocin Resistance (IVR); Staphylococcus aureus, Resistant to Methicillin (MRSA) and Gentamicin (GSM); Staphylococcus epidermidis, Resistant to Methicillin (MRSE); Streptococcus pneumoniae, Resistant to Penicillin (PRP).

- **Viruses** — Coxsackievirus A9, Herpes Simplex virus Type 1, Herpes Simplex virus Type 2, Human Coronavirus, Influenza virus Type A (H1N1), Parainfluenza virus Type 3, Respiratory syncytial virus, Rotavirus, Viscutivirus. Kills HIV-1 & HIV-2 in 10 minutes contact time.**

**Fungi** — Geotrichum candidum, Saccharomyces cerevisiae.

**Aerobic Stability of Use-Dilution — Tests show this product, when diluted in 400 ppm hard water and in the presence of 0% serum load, remains effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica for up to 1 year in storage as long as it remains sealed. If product becomes visibly dry or contaminated, the use-dilution must be discarded and fresh product prepared. Always use clean, dry containers when diluting this product.

Using approved AOAC test methods under Good Laboratory Practices, in the presence of 400 ppm hard water, 5% serum load and 10 minutes contact time, this product kills the following hard non-porous inanimate surfaces:

- **Viruses** — Adenovirus Type 2.

- **Fungi** — Aspergillus niger, Trichophyton mentagrophytes (athlete’s foot fungus).

- **Yeasts** — Candida albicans.

- **Mold/Mildew** — kills the growth of mold and mildew: Aspergillus niger and the odors caused by them when applied to hard, non-porous environmental surfaces.

See reference sheet for additional directions for use and a complete list of organisms. This product can be applied by mop, sponge, cloth, paper towel, coarse trigger sprayer, auto-scrubber or foam gun. Change cloth, sponges or towels frequently to avoid redeposition of soil. For disinfection, all surfaces must remain wet for 10 minutes.

**Directions for Use:**

- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the blood stream or normal sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

To Prepare Use Solution: Add the product at the 1/2 oz. per gallon of water (1:250).

For Use as a One-Step Cleaner/Disinfectant: Pre-clean heavily soiled areas. Apply Use Solution to hard, non-porous environmental surfaces. All surfaces must remain wet for 10 minutes. Wipe surfaces and let air dry.

For Use as a Sanitizer: Apply Use Solution to hard, non-porous environmental surfaces. Wipe surfaces and let air dry.

**For Use as a Non-Acid Bowl Cleaner/Disinfectant in Toilet Bowls and Urinals from Use-Dilution:** Pre-clean heavily soiled areas. Empty toilet bowls by forcing water through the trap. Apply Use Solution to exposed surfaces in toilet bowls and urinals. Swab entire surface area especially under the rim. Allow entire surface to remain wet for 10 minutes. Flush toilet or urinal and rinse swab applicator thoroughly.

For use as a Non-Acid Bowl Cleaner/Disinfectant in Toilet Bowls from Concentrate: Pre-clean heavily soiled areas. Add 3/8 oz. into toilet bowl for a 1:256 dilution. Swab entire surface area especially under the rim. Allow entire surface to remain wet for 10 minutes. Flush toilet and rinse swab applicator thoroughly.

For Use To Clean and Disinfect Shower Rooms, Locker Rooms and Other Large, Open Areas with Floor Drains: Pre-clean heavily soiled areas. Apply Use Solution to floors, walls and ceilings making sure not to overspray. To disinfect, all surfaces must remain wet for 10 minutes. Slowly pour concentrate into floor drain and attach bottle to spray nozzle and ensure gun is attached to hose. Note: See foam gun instructions for more information. Make sure setting is set for a 1:256 dilution. Once in place, squeeze handle to dispense foam solution. To disinfect, all surfaces must remain wet for 10 minutes. Scour using a brush or other coarse material as necessary. Rinse surfaces thoroughly and let air dry. NOTE: When cleaning floors position wet-floor signs around areas to be cleaned. Floors will be slippery when wet or contaminated with foreign materials. Promptly clean up spills and foreign materials.

To Kill Mold and Mildew (in 5% soil load): Pre-clean heavily soiled areas. Apply Use Solution to hard, non-porous environmental surfaces. Allow surfaces to remain wet for 10 minutes. Wipe surfaces and let air dry.

To Control Mold and Mildew: Apply Use Solution to pre-cleaned, hard, non-porous environmental surfaces. Allow to air dry. Repeat application weekly or when growth reappears.

To Kill Fungi: Pre-clean heavily soiled areas. Apply Use Solution to hard, non-porous environmental surfaces. Allow surface to remain wet for 10 minutes. Wipe surfaces and let air dry.

For use as an Anti-Microbial Spray-N-Sanitizer in Floor Drains: Pre-clean heavily soiled areas. Apply Use Solution to floors, walls and ceilings making sure not to overspray. To disinfect, all surfaces must remain wet for 10 minutes. Slowly pour concentrate into floor drain and attach bottle to spray nozzle and ensure gun is attached to hose. Note: See foam gun instructions for more information. Make sure setting is set for a 1:256 dilution. Once in place, squeeze handle to dispense foam solution. To disinfect, all surfaces must remain wet for 10 minutes. Scour using a brush or other coarse material as necessary. Rinse surfaces thoroughly and let air dry. NOTE: When cleaning floors position wet-floor signs around areas to be cleaned. Floors will be slippery when wet or contaminated with foreign materials. Promptly clean up spills and foreign materials.

**Kills** HBV, HCV and HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (hospitals, nursing homes) and other settings in which there is an expected likelihood of soilage of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects are likely to be soiled with blood or body fluids which can be associated with the potential for transmission of Hepatitis B virus (HBV), Hepatitis C virus (HCV) and Human Immunodeficiency Virus Type 1 (HIV-1) associated with AIDS.

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HBV, HCV and HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.**

- Personal Protection: Disposable latex or vinyl gloves, gowns, face masks, and eye coverings as appropriate, must be worn during all cleaning of blood/body fluids, blood, and decontamination procedures.

**Cleaning Procedures:** Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

**Contact Time:** Allow surface to remain wet for 1 minute to kill *HBV*, 5 minutes to kill *HIV-1*, 5 minutes to kill *HIV-2*, *HCV*, and for 10 minutes to kill all other organisms cited on the label.

**Disposal of Infectious Materials:** Blood and other body fluids must be autocarried and disposed of according to Federal, State, and local regulations for infectious waste disposal.

To Sanitize Food-Contact Surfaces:

1. Pre-clean soiled hard non-porous surfaces.
2. Apply this product until surface is thoroughly wet.
3. Let stand 1 minute, then wipe.

**Note:** Not for use on food contact surfaces or on food preparation areas.
Virex® II 256

This product can be applied by mop, sponge, cloth, paper towel, coarse trigger sprayer, auto-scrubber or foam gun. Change cloth, sponges or towels frequently to avoid re-adherence of soil. For disinfection, all surfaces must remain wet for 10 minutes.

When used as directed, a 1:256 dilution (12 oz per gallon of water) this product contains 660 ppm of active quaternary gemicide making it highly effective against a wide variety of pathogenic microorganisms.

Using approved AADAC test methods under Good Laboratory Practices, in the presence of 400 ppm hard water, 10% serum load and 10 minute contact time, this product kills the following on hard-non porous inanimate surfaces:

**Bacteria –**
- Pseudomonas aeruginosa, (ATCC 15442)
- Staphylococcus aureus, (ATCC 6538)
- Salmonella enterica, (ATCC 10708) formerly known as Salmonella cholerasuis
- Acinetobacter baumannii, (ATCC 19606)
- Enterococcus faecalis, (ATCC 9957)
- Bordetella bronchiseptica, (ATCC 10558)
- Burkholderia cepacia, (ATCC 25416) formerly known as Pseudomonas cepacia
- Campylobacter fetus, (ATCC 27214)
- Chlamydia psittaci, (VR-125)
- Clostridium freundii, (ATCC 8099)
- Enterobacter cloacae, (ATCC 27155)
- Enterobacter cloacae, (ATCC 2355)
- Enterobacter liquefaciens, (ATCC 13463)
- Enterococcus faecalis, (ATCC 19433) formerly known as Streptococcus faecalis
- Enterococcus hirae, (ATCC 10541)
- Escherichia coli, (ATCC 11229)
- Escherichia coli 0157:H7, (ATCC 43990)
- Flavobacterium meningosepticum, (ATCC 13253)
- Haemophilus influenzae, (ATCC 10271)
- Hafnia alvei, (ATCC 13337)
- Klebsiella oxytica, (ATCC 13182)
- Klebsiella pneumoniae, (ATCC 13863)
- Legionella pneumophila, (ATCC 32153)
- Listeria monocytogenes, (ATCC 15313)
- Micrococcus luteus, (ATCC 4698)
- Micrococcus luteus, (ATCC 14425)
- Micrococcus sedentarius, (ATCC 27657)
- Neisseria gonorrhoeae, (ATCC 43069)
- Pasteurella multocida, (ATCC 13171)
- Proteus mirabilis, (ATCC 9249)
- Proteus vulgaris, (ATCC 13135)
- Pseudomonas diminuta, (ATCC 11568)
- Pseudomonas fluorescens, (ATCC 12955)
- Pseudomonas putida, (ATCC 12953)
- Pseudomonas stutzeri, (ATCC 17568)
- Salmonella enterica (pulorum), (ATCC 19945) formerly known as Salmonella cholerasuis pulorum
- Salmonella enteritidis, (ATCC 13076)
- Salmonella gallinarum, (ATCC 13076)
- Salmonella muenchen, (ATCC 10719)
- Salmonella typhi, (ATCC 8592)
- Salmonella typhimurium, (ATCC 13311)
- Serratia marcescens, (ATCC 9013)
- Shigella dysenteriae, (ATCC 25025)
- Shigella flexneri, (ATCC 25875)
- Shigella sonnei, (ATCC 25931)
- Staphylococcus aureus, (ATCC 29213)
- Staphylococcus aureus (Toxic Shock), (ATCC 35386)
- Staphylococcus epidermidis, (ATCC 14996)
- Staphylococcus haemolyticus, (ATCC 29270)
- Streptococcus agalactiae, (ATCC 13813)
- Streptococcus mutans, (ATCC 25152)
- Streptococcus pyogenes, (ATCC 10665)

**Viruses –**
- Astrovirus, (Strain WA)
- *Rotavirus, (Strain WA)*
- *Vaccinia virus (smallpox vaccine virus), (VR-119)*
- *Kills HIV-1 (AIDS virus) (HTLVII) when used as directed on hard, non-porous inanimate surfaces with 1 minute contact time.*
- *Kills HIV and *HCV when used as directed on hard, non-porous inanimate surfaces with a 5 minute contact time.*
- *Kills Pandemic 2009 H1N1 Influenza A virus*
- *Veterinary viruses:*
  - Avian Infectious bronchitis virus (IBV), (VR-22)
  - Avian Influenza virus, (VR-2072)
  - Canine distemper virus, (VR-128)
  - Feline viral rhinotracheitis virus, (VR-636)
  - Infectious bovine rhinotracheitis virus, (VR-168)
  - Newcastle disease virus, (VR-108)
  - Pseudorabies virus, (VR-135)
  - Transmissible gastroenteritis virus (TGE), (U of Minn, Strain)
- *Fungi –*
  - Aspergillus fumigatus, (ATCC 25272)
  - Aspergillus niger, (ATCC 6275)
  - Aspergillus niger, (ATCC 6275)

**Reference Sheet**

**Microbicidal Activity –** controls and prevents the growth of mold and mildew: Aspergillus niger (ATCC 6275) and the odors caused by them when applied to hard, non-porous environmental surfaces.

Using approved AADAC test methods under Good Laboratory Practices, in the presence of 400 ppm hard water, 5% serum load and 10 minute contact time, this product kills the following on hard-non porous inanimate surfaces:

**Viruses –**
- *Adenovirus Type 2, (VR-2)*
- *Fungi –* Aspergillus niger, (ATCC 6275), Trichophyton mentagrophytes (athlete's foot fungus), (ATCC 9535)
- Yeast: Candida albicans, (ATCC 10231)

**Mold/Mildew –** kills the growth of mold and mildew: Aspergillus niger (ATCC 6275) and the odors caused by them when applied to hard, non-porous environmental surfaces.

**Non-Food Contact Sanitizer –** When used on hard, non-porous inanimate surfaces in the presence of 400 ppm hard water and hard water, this product reduces the following organisms by 99.9% by a 1 minute contact time on non-porous inanimate surfaces:

- Staphylococcus aureus, (ATCC 6538)
- Haemophilus influenzae, (ATCC 10271)
- Klebsiella pneumoniae, (ATCC 13042)
- Pseudomonas aeruginosa, (ATCC 15442)
- Enterococcus faecalis, (ATCC 1060)
- Salmonella enterica, (ATCC 10706)
- Escherichia coli 0157H7, (ATCC 35150)
- Shigella dysenteriae, (ATCC 11835)

**Non-Food Contact Sanitizer –** Antibiotic-Resistant (Strains of) Bacteria (Antibiotic-Resistant Bacterial Activity) -
- Enterococcus faecalis, (VRE) (ATCC 51578) Staphylococcus aureus, (MRSA) (ATCC 35992)

**Malodor: eliminates odors and odor-causing bacteria on hard, nonporous surfaces in restroom areas, behind and under sinks and countertops, storage areas and other places where bacterial growth can contribute, Bacterial Activity of Use-Dilutions – Tests show this product, when used at 1,000 ppm hard water and in the presence of 5% serum load, remains effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica for up to 1 year in storage as long as it remains sealed. If product becomes visibly dirty or contaminated, the use-dilution must be discarded and fresh product prepared. Always use clean, dry containers when diluting this product.

**This product may be used to fill and refill clean, properly labeled containers for dilution elsewhere within your facility. Make sure the small container has been cleaned, dried and properly labeled. Also make sure other items (funnels or hand pumps) are properly cleaned and dried. To refill, simply pour from the larger container directly into the smaller one being careful not to spill any product. Keep both containers sealed when not in use.

For Use In Treatment of Animal Housing Facilities:
1. Remove all animals and feed from areas being treated.
2. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities occupied or traversed by animals.
3. Empty or cover all troughs, racks and other feeding and watering appliances.
4. Thoroughly clean all surfaces with soap or detergent and rinse with water.
5. Apply fresh use solution to floors, walls, cages and other washable hard, non-porous environmental surfaces. For smaller surfaces, use a trigger sprayer bottle to spray all surfaces with solution until wet. To disinfect, all surfaces must remain wet for 10 minutes.
6. Immerses all hangers, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure.
7. Ventilated buildings, car, toilets and other closed spaces. Do not house animals or employ equipment until product has dried.
8. For disinfection of feed racks, troughs, automatic feeders, fountains and watering appliances scrub with use-solution, let stand 10 minutes. Then thoroughly scrub all treated surfaces with soap or detergent and rinse with potable water before reuse. To Control Mold and Mildew:

*Apply Solution to pre-cleaned hard, non-porous environmental surfaces, Allow to air dry, Repeat application weekly or when growth reappears.*

**To Sanitize Non-Food Contact Surfaces:**
1. Pre-clean soiled hard non-porous surfaces.
2. Apply this product until surface is thoroughly wet.
3. Let stand 1 minute, then rinse.
4. Note: Not for use on food contact surfaces or on food preparation areas.

See container label for First Aid, Precautionary Statements and complete Directions for Use.

EPA Reg No, 70627-24

REF90130 (13/052)
Virex® II 256

This product is a one-step disinfectant cleaner and deodorant designed for general cleaning, disinfecting and deodorizing of hard, non-porous environmental surfaces. It cleans quickly by removing dirt, grime, mold, mildew, body oils and other common soils found in hospitals, nursing homes, schools and colleges, medical offices, hotels, motels, public areas, restrooms and foodservice establishments.

It is designed for use on the following hard, non-porous environmental surfaces: vinyl, painted surfaces, plastic, glazed ceramic, glazed porcelain, chrome, aluminum, laminated surfaces and baked enamel surfaces associated with floors, walls, ceilings, tables, chairs, countertops, telephone fixtures, glazed tile, toilets, urinals, sinks, shower rooms and locker room areas - any hard, non-porous washable surface where disinfection is required. This product's non-dulling formula eliminates the time and labor normally required for rinsing. A potable water rinse is required for food contact surfaces. Do not use on glasses, dishes and utensils.

When used as directed at a 1:256 dilution (1/2 oz. per gallon of water), this product contains 660 ppm of active quaternary germicide making it highly effective against a wide variety of pathogenic microorganisms.

Using approved AOAC test methods under Good Laboratory Practices, in the presence of 400 ppm hard water, 10% serum load and 10 minute contact time this product kills the following on hard non-porous inanimate surfaces:

- Pseudomonas aeruginosa
- Staphylococcus aureus
- Salmonella enterica

See reference sheet for a complete list of organisms and additional directions for use.

This product can be applied by mop, sponge, cloth, paper towel, coarse trigger sprayer, auto-scrubber or foam gun. Change cloth, sponges or towels frequently to avoid redeposition of soil. For disinfection, all surfaces must remain wet for 10 minutes.

**DIRECTIONS FOR USE:**

- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- For Use as a Non-Acid Bowl Cleaner/Disinfectant in Toilet Bowls and Urinals from Use-Dilution:
  - Pre-clean heavily soiled areas. Empty toilet bowls by forcing water through the trap. Apply Use Solution to exposed surfaces in toilet bowls and urinals. Swab entire surface area especially under rim. Allow entire surface to remain wet for 10 minutes. Flush toilet or urinal and rinse swab applicator thoroughly.
- For use as a Non-Acid Bowl Cleaner/Disinfectant in Toilet Bowls from Concentrate:
  - Pre-clean heavily soiled areas. Add 3/8 oz. into toilet bowl for a 1:256 dilution. Swab entire surface area especially under the rim. Allow entire surface to remain wet for 10 minutes. Flush toilet and rinse swab applicator thoroughly.
- For Use To Clean and Disinfect Shower Rooms, Locker Rooms

and Other Large, Open Areas with Floor Drains: Pre-clean heavily soiled areas. Apply Use Solution to floors, walls and ceilings making sure not to over spray. To disinfect, all surfaces must remain wet for 10 minutes. Special instructions for foam guns: Pour concentrate into foam gun bottle and attach bottle to spray nozzle and ensure gun is attached to hose. Note: See foam gun instructions for more information. Make sure setting is set for a 1:256 dilution. Once in place, squeeze the handle to dispense foam solution. To disinfect, all surfaces must remain wet for 10 minutes. Scrub using a deck brush or other coarse material as necessary. Rinse surfaces thoroughly and let air dry.

**NOTE:** When cleaning floors position wet-floor signs around area to be cleaned. Floors will be slippery when wet or contaminated with foreign materials. Promptly clean up spills and foreign materials.

**To Kill Mold and Mildew (in 5% soil load):**

Pre-clean heavily soiled areas. Apply Use Solution to hard, non-porous environmental surfaces. Allow surfaces to remain wet for 10 minutes. Wipe surfaces and let air dry.

**To Control Mold and Mildew:**

Apply Use Solution to pre-cleaned hard, non-porous environmental surfaces. Allow to air dry. Repeat application weekly or when growth reappears.

**To Kill Fungi:**

Pre-clean heavily soiled areas. Apply Use Solution to hard, non-porous environmental surfaces. Allow surface to remain wet for 10 minutes. Wipe surfaces and let air dry.

**Kills** HBV, *HCV* and *HIV-1* on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (Hospitals, Nursing Homes) and other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of *Hepatitis B Virus* (HBV), *Hepatitis C Virus* (HCV) and *Human Immunodeficiency Virus Type 1* (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HBV, HCV and HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.**

- **Personal Protection:** Disposable latex or vinyl gloves, gowns, face masks, and eye coverings as appropriate, must be worn during all cleaning of body fluids, blood, and decontamination procedures.
- **Cleaning Procedures:** Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of this product.
- **Contact Time:** Allow surface to remain wet for 1 minute to kill *HBV*, for 5 minutes to kill *HCV* and for 10 minutes to kill all other organisms cited on the label.
- **Disposal of Infectious Material:** Blood and other body fluids must be autoclaved and disposed of according to Federal, State, and local regulations for infectious waste disposal.

**To Sanitize Non-Food Contact Surfaces:**

1. Pre-clean soiled hard non-porous surfaces.
2. Apply this product until surface is thoroughly wet.
3. Let stand 1 minute, then wipe.

**Note:** Not for use on food contact surfaces or on food preparation areas.

See container label for First Aid, Precautionary Statements and complete Directions for Use.
