ULTRA-KLEEN CW502

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

RECYCLING COOLING WATER SYSTEMS, INCLUDING COOLING TOWERS, EVAPORATIVE CONDENSERS AND BREWERY PASTEURIZERS. Effectively removes and controls biofilm and other organic contaminants in commercial and industrial cooling towers, influent water systems such as flow-through filters, and heat exchanger water systems.

DOSEAGE RATES: Initial Dose for badly fouled systems. Add 5 to 20 lbs. Ultra-Kleen CW502 per 1000 gallons of water contained in the system. Subsequent Dose: When microbial control is evident, subsequent slug additions of 1 to 3 lbs. Ultra-Kleen CW502 per 1000 gallons of water are made every 2 to 5 days as needed. The frequency of addition depends on the relative amount of bleed off, the quality of the makeup water and rate of inflow of air borne or other contaminants. Slug additions are made in the flow of water cooling systems.

AIR WASHERS: For use only in industrial air washing systems that maintain effective mist eliminating components. Effectively removes and controls biofilm and other organic contaminants in industrial water Scrubbing Systems. DOSEAGE RATES: Initial Dose for badly fouled systems. Add 16 to 80 lbs. of Ultra-Kleen CW502 per 1000 gallons of water contained in the system. Subsequent Dose: When microbial control is evident, subsequent slug additions of 1 to 5 lbs. Ultra-Kleen CW502 per 1000 gallons of water are employed every 1 to 5 days as needed. The frequency of addition depends on the relative amount of bleed off, the quality of the makeup water and rate of inflow of air borne or other contaminants. Slug additions are made in the sump of Industrial Water Scrubbing Systems.

PULP AND PAPER MILLS. For use only in the production of pulp and paper that will be used in the production of pulp and paper mill processes, paper making processes, and other processes where pulp and paper products are manufactured. Ultra-Kleen CW502 is effective in treating pulp and paper water systems, wastewater treatment systems, and other processes.

DOSEAGE RATES: Initial Dose for badly fouled systems. Add 10 to 80 lbs. of Ultra-Kleen CW502 per 1000 gallons of water contained in the system. Subsequent Dose: When microbial control is evident, subsequent slug additions of 0.3 to 2 lbs. Ultra-Kleen CW502 per 1000 gallons of water are employed every 1 to 5 days as needed. The frequency of addition depends on the relative amount of bleed off, the quality of the makeup water and rate of inflow of air borne or other contaminants.

DRY MACHINES. Effectively removes and controls biofilm and other organic contaminants in industrial dryers. DOSEAGE RATES: Clean badly fouled systems by adding 90 to 200 lbs. of Ultra-Kleen CW502 per 1000 gallons of water contained in the system. Subsequent Dose: When microbial control is evident, subsequent slug additions of 0.3 to 2 lbs. Ultra-Kleen CW502 per 1000 gallons of water are applied every 2 to 5 days as needed. The frequency of addition depends on the relative amount of bleed off, the quality of the makeup water and rate of inflow of air borne or other contaminants.

WATER-JET LOOMS. Effectively removes and controls biofilm and other organic contaminants in Water-Jet Looms. DOSEAGE RATES: Initial Dose for badly fouled systems. Prepare a solution of 0.05 to 0.2 lbs. Ultra-Kleen CW502 per 1000 gallons of water contained in the system. Subsequent Dose: When microbial control is evident, subsequent slug additions of 0.05 to 0.2 lbs. Ultra-Kleen CW502 per 1000 gallons of water are applied every 2 to 5 days as needed. The frequency of addition depends on the relative amount of bleed off, the quality of the makeup water and rate of inflow of air borne or other contaminants.

TANKS AND PIPING USED TO STORE AND COOLED INDUSTRIAL WATER OR AQUATIC MASSES. Do NOT Use in equipment that will contact food. Effectively removes and controls biofilm and other organic contaminants in Tanks and Piping used to store and convey Process Water or Aqueous Mixtures. DOSEAGE RATES: Fill equipment as completely as possible with a solution of 40 to 600 lbs. Ultra-Kleen CW502 per 1000 gallons of system capacity. Circulate for 4 to 8 hours and then drain system. Rinse system with 6 volumes of water. If necessary, apply a solution containing 0.04 to 0.2 lbs. Ultra-Kleen CW502 per gallon onto surfaces of the equipment that are not submerged.

DEIONIZED WATER SUPPLY SYSTEMS NOT USED IN FOOD PROCESSING, FOR HUMAN DRINKING WATER OR IN DENTAL LINES. Effectively removes and controls biofilm and other organic contaminants in Tanks, Filters and Piping used to store and convey Deionized Water. Do NOT Use deionized water for food processing, for human drinking water or for medical/industrial purposes. DOSEAGE RATES. Add 16 to 80 lbs. of Ultra-Kleen CW502 per 1000 gallons of system capacity. Circulate for at least 4 hours and then drain system. Rinse system with 6 volumes of water. If necessary, apply a solution containing 0.04 to 0.2 lbs. Ultra-Kleen CW502 per gallon onto surfaces of the equipment that are not submerged.

PENETRATES AND REMOVES BIOFILM AND OTHER ORGANIC CONTAMINANTS, AS A BACTERICIDE, SLIMICIDE, MILDRET, AND ALGICIDE in:

DRAINAGE. Effectively removes and controls plugging and odors caused by accumulation of biofilm and other organic contaminants in drains. Prevents stoppage and odors. DOSAGE RATES. Initial Dose for badly fouled systems. Four to 6 oz. Ultra-Kleen CW502 around or into one-inch diameter mushroom or larger diameter drain, or into three-inch diameter drains. If the drain is not in use at the time, follow with one gallon of hot water for every 0.5 oz of Ultra-Kleen CW502 added. Allow to stand for 30 minutes. Repeat until control is evident. Subsequent Dose: When microbial control is evident, subsequent slug additions of 0.05 to 0.2 lbs. Ultra-Kleen CW502 per gallon of water are applied every 1 to 3 days as needed.

FOR CLEANING OF WHIRLPOOL BATHTUBS dissolve 0.5 oz of Sterilex Ultra-Kleen CW502 in 1 gal. tap water and circulate through tub and associated piping and filters at a temperature of 90°F.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS. Corrosive. Causes irreversible eye damage and skin burns. If swallowed or absorbed through skin. Wear goggles and/or face shield, protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS. This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, ocean or other waters unless in accordance with the requirements of a National Pollutant DischargeElimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously consulting the local sewage treatment plant authority. For guidance, contact your Local State Water Board or Regional Office of the U.S. Environmental Protection Agency.

STORAGE AND PESTICIDE DISPOSAL
Do not contaminate water, food or any improper storage or disposal.

PESTICIDE STORAGE: Keep product in closed original container when not in use. Store in a cool, dry area away from potential sources of heat, open flames, sunlight or other chemicals. Product should be stored below 100°F.

PESTICIDE DISPOSAL: Pesticides are acutely hazardous, improper disposal of excess pesticide, spray misture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide Environmental Control Agency or the hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not re-use or refill this container. Offer for recycling, if available or purchase and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. If rinsate cannot be used, follow pesticide disposal instructions. If not triple rinsed these containers are acute hazardous wastes and must be disposed of in accordance with local, state and federal regulations.

Completely empty bag into application equipment by shaking and tapping alldo and bottom to loosen clinging particles. If not emptied in this manner, the bag may be considered an acute hazardous waste and must be disposed of in accordance with local, state and federal regulations. When completely empty, offer for recycling if available or dispose of by sale in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOTE: Seller warrants that this product complies with the specifications in this label. Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. Seller's liability or default, breach or negligence shall be limited to the amount of the purchase price. Seller shall have no liability for consequential damages.
