Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Causes moderate eye irritation. Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash chemical-resistant eyewear. Wash thoroughly with soap and water after handling and before eating, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Directions for Use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

2887 is used to control the growth of algae in decorative fountains that do not contain fish. It is also used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers and recirculating cooling systems.

WATER COOLING TOWERS: Prior to the use of 2887 in water cooling towers, clean the systems to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 4 to 10 fluid ounces of 2887 per 1000 gallons of water to provide 32 to 80 ppm 2887, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 1.0 to 10.0 fluid ounces of 2887 per 1000 gallons of water (8 to 80 ppm 2887) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bloomed and the severity of the microbiological problem. Make slug additions into the sump of water cooling towers.

DECORATIVE FOUNTAINS: 2887 is used to control the growth of algae in decorative fountains that do not contain fish. Manually clean heavy growths of algae prior to treatment. Fountains with just visible algae growth require an initial dose of 5 to 8 fluid ounces of 2887 per 1000 gallons of water. To treat a freshly cleaned and filled fountain, add 3 to 5 fluid ounces of 2887 per 1000 gallons of water. For maintenance dosages, add 1 to 2 fluid ounces of 2887 per 1000 gallons of water every 5 to 7 days as needed. Make sure 2887 is added at a point where it can be uniformly distributed. 2887 may be used in fountains treated with chlorine chemicals, but do not mix 2887 with concentrated dry or liquid chlorine products.

INDUSTRIAL AIR WASHING SYSTEMS: 2887 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to its use, clean the systems to remove bacterial slime and other deposits. Make an initial slug dose of 14.8 to 24.7 fluid ounces of 2887 per 1000 gallons of water. Repeat initial dosage until control is evident. Make subsequent slug additions of 10.1 to 24.7 fluid ounces of 2887 per 1000 gallons of water each 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bloomed and severity of the bacterial problem. Make slug additions into the sump or into the water collection trays of the airwash system.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal. Do not ship with Food, Feed, Drugs or Clothing.

PESTICIDE STORAGE: Keep container closed when not in use. In case of spills, use sawdust or sand to absorb the spilled pesticide and dispose of in a sanitary landfill.

PESTICIDE DISPOSAL: Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture, or rinse water is a violation of Federal Law. If these wastes can not be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING:
Refillable container. Less than or equal to 55 gallons.

Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container prior to refilling or disposal, use a triple rinse wash as follows: Empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously. Pour or pump rinse into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this rinsing procedure two more times.

Batch Code:

Manufactured by: Watercare Industrial Services, Inc.
3755 Truman Street
Washougal, WA 98671
360-835-7284

EPA Reg No: 1448-212-72520
EPA Est No: 72520-WA-01

Product Weight: 8.6 lbs/gal. 1.03 kg/l.
Net contents are marked on container.

HMIS/NPCA Ratings: Health 1 Flammability 1 Reactivity 0

Last Revision: 8/4/11
