Fast Acting Formula

Fleas

1 PT (16 fl oz)
HAZARDS TO HUMANS — CAUTION: Harmful if swallowed or inhaled. Avoid contact with skin, eyes, or clothing. May cause dermal sensitization (skin allergy). May cause unconsciousness. Do not induce vomiting unless told to do so by a poison control center or doctor.

HAZARDS TO ANIMALS — CAUTION: Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or sensitized animals on medication. Sensitivities may occur after using ANY pesticide product for animals on medication. Sensitivities may occur; however, these effects are temporary and not harmful. May cause dermal sensitization (skin allergy).

FIRST AID

• If swallowed: Do not induce vomiting unless told to do so by the poison control center or doctor. Soak mouth and throat with a glass of water and have person sip a glass of water if able to swallow.

• If in eyes: Rinse immediately with plenty of water for 15-20 minutes.

• If on skin or clothing: Remove contact lenses, if present, after the first few minutes of exposure. Take off contaminated clothing.

• In case of exposure: If person is in unconcious state, call a poison control center or doctor. Have the product container or label with you when calling a poison control center, doctor, or going for treatment. You may also contact 1-800-950-4783 for emergency medical information.

Hazardous to humans — Caution! Harmful if swallowed or inhaled. Avoid contact with skin, eyes, or clothing. May cause dermal sensitization (skin allergy). May cause unconsciousness. Do not induce vomiting unless told to do so by a poison control center or doctor.

Hazardous to animals — Caution! Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or sensitized animals on medication. Sensitivities may occur; however, these effects are temporary and not harmful. May cause dermal sensitization (skin allergy).

DIRECTIONS FOR USE — It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For Ticks: Leave the open nose, eyes, and mouth exposed, treat puppies and kittens weighing less than 3 pounds by wrapping the animal in a towel that has been lightly sprayed with this product for 5 to 10 minutes. Or lightly spray a brush or cotton ball and work thoroughly into the hair coat. Flies may then be removed from the skin.

For Fleas: Leave the open nose, eyes, and mouth exposed, treat puppies and kittens weighing less than 3 pounds. For best results, spray the coat while the animal is grooming against the natural lay of the hair. Cover animal’s eyes and ears with a towel. With a firm, fast stroke, spray head, ears, and front. With cloth, rub into fur around mouth, nose, and ears. Then spray the rear, rump, tail and back guard, finishing with legs and tail last. Avoid spraying rectum and genitals.

Apply at the rate of 1 or 2 squirts of the trigger spray per pound of body weight. For larger dogs, spray until damp, not saturated. Do not allow animals, cats in particular, to become chilled. Repeat every 2 months for continued treatment. For best results, omit feeding or giving water for 4-6 hours.
