Controls Roaches, Stored Product Pests, Drain Flies, Fruit Flies and Bedbugs

Gentrol® Aerosol
with GENTROL® IGR

NON-REPELLENT
LONG-TERM CONTROL
COMPATIBLE IN BAITING PROGRAMS
DISSIPATING FOAM ASSURES COMPLETE COVERAGE
TREATS UP TO 1200 SQUARE FEET

FOR PROFESSIONAL USE ONLY

ACTIVE INGREDIENT:
(S)-Hydroper (CAS 65733-18-8) ........................................ 0.36%
OTHER INGREDIENTS* .................................................. 99.64%
TOTAL .................................................. 100.00%

* Contains petroleum distillates

KEEP OUT OF REACH OF CHILDREN

CAUTION
SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION: GENTROL® Aerosol contains GENTROL® IGR. Insect Growth Regulator. The IGR disrupts the normal development of immature cockroaches, drain flies, fruit flies, bedbugs, and stored product pests (examples of these pests include: Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain borers, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and Domestel beetles). Roaches and bedbugs exposed to GENTROL® Aerosol will become adults incapable of reproducing. GENTROL® Aerosol also disrupts the normal life cycle of drain flies, fruit flies, and stored product pests; thus, killing these insects during the pupal stage. In both cases, the cycle of infestation ends. Use in areas such as, but not limited to: apartment buildings, bakeries, bottling facilities, breweries, boiler rooms, cafeterias, candy plants, grocery stores, day care centers, hospitals, hotel lobbies, office buildings, kitchens, laboratories, central processing facilities, manufacturing plants, mauveussons, and produce centers, nurseries, restaurants, restaurants, schools, locker rooms, stores, sunrooms, warehouses, pet stores, as well as various modes of transportation, such as: automobiles, buses, trucks, trailers, rail cars, and marine vessels.

Use as a general surface spray, spot, or crack and crevice application.

Prior to using in commercial or residential food areas, please refer to the Food Handling Establishment Applications section of the label. The preparations prior to treatment and the clean-up after application described are also be followed for residential use.

GENTROL® Aerosol is non-repellent and should be considered an important component in a cockroach baiting program. Baits are an important part of a total cockroach control program but are not a complete solution. GENTROL® Aerosol can reach those nymphs that fail to forage to baits and the IGR stimulates egg-bearing females to leave the harborage and feed.

Shake well before use. GENTROL® Aerosol is a ready-to-use pressurized spray for application to a variety of locations and surfaces to control pests. Apply as a general surface spray, spot, or crack and crevice application. Use the supplied extension tube for crack and crevice applications. To apply as a general surface or spot application, hold can 10" to 12" away from surface to be treated. Use a sweeping motion over the surface to be treated for complete coverage. This product applies as a light foam that dissipates rapidly. An oily residue may be absorbed in heavy applications. The visibility of the dissipating foam eliminates the possibility of missed areas. For crack and crevice applications, use the supplied extension tube and apply to wall voids, hollow wall tubes, leg, grommets, frames, voids, and supports. GENTROL® Aerosol is generally non-staining, but in questionable situations, apply a small amount in an inconspicuous location. Apply once a month for continuous protection, or more often if conditions warrant.

GENERAL SURFACE APPLICATION: Apply at a rate of 16 ounces per 1000 sq ft of surface area. Apply to areas such as: walls, floors, ceilings, attics, basements, garages, and shelving. Note: Prior to treating around air ducts, shut off ventilation system. Turn on air-handling systems immediately after application. SPOT OR CRACK AND CREVICE APPLICATIONS: Apply as a crack and crevice application using the supplied extension tube. Apply directly to areas such as: wall voids, pipe chases, crevices, and false ceilings. Apply spot treatments to areas such as: storage areas, closets, around water pipes, doors, windows, and behind and under appliances (example: furniture and beds). To treat cracks and crevices, apply to harborage points mentioned above, in addition, under beds, bottom side of sofa cushions (do not treat lines and mattresses), under and behind sight stands, to points where carpet and wall meet, cracks in base molding, and other areas where bedbugs harborage. Retreat in 14 days for heavy infestations.

WAREHOUSES (Non-Roach): Apply as a general surface, spot, or crack and crevice treatment in non-food storage warehouses. Apply to all areas that may harbor pests, including under and between pallets. FOOD HANDLING ESTABLISHMENT APPLICATIONS: Apply as a general surface spray, spot, or crack and crevice treatment in both food and non-food areas. These establishments are food handling facilities that other than private residences, where food is prepared, processed, or served. It also includes areas where food items are: received, prepared, packaged, and stored, as well as enclosed food processing systems (mills,diaires, etc.). For control of drain flies and fruit flies: Apply to areas of fly breeding. For flies, apply product into and around the downspout and catch basin area. Cots these areas thoroughly as they develop during spring and summer. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation. SPOT OR CRACK AND CREVICE APPLICATIONS: Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food-handling surfaces. SURFACE SPRAY APPLICATION: Do not apply directly to food products. GENERAL AREA TREATMENTS: Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, heeled, processed, prepared, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues prior to treatment. PARTIAL AREA TREATMENTS: Apply to partial hand-holding establishments in cases of small or localized infestations. For partia area treatments, a perimeter of at least 6 feet must be established, from all food handling surfaces, P M T K Cabinets, SMALL FOOD STORAGE AREAS: Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Dispose of any contaminated, food packages or materials. WAREHOUSES (Roach): Apply as a general surface spray, spot, or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuffs is not anticipated.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Storage: Store in a cool area away from children. Do not reuse empty container. Disposal: Wash out and rinse contaminate cloth and wash clothing before reuse. PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS - Caution: Harmful if inhaled or absorbed through skin. Avoid breathing spray mist. Causes moderate eye irritation. Avoid contact with eyes, skin, and clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. PHYSICAL OR CHEMICAL HAZARDS: Contains petroleum distillates. Vomiting may cause aspiration pneumonia. If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.
