PELLETS

FASTRAC®

PLACE PACS

**Norway rats, Roof rats and House mice usually consume a lethal dose in a single night’s feeding, but it may take two or more days from the time of bait consumption for these rodents to die.**

KILLS RATS, MICE, AND MEADOW VOLES*

KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Back Panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:
Bromethalin (CAS #63333-35-7): 0.01%

OTHER INGREDIENTS†: 99.99%

†Contains Denatonium Benzoate

TOTAL 100.00%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

NET WT:
4 lbs (1.8 kg)

121 x 0.53 oz (15 g) Place Pacs

Photo is not representative of a label-consistent bait placement

** Place Pacs **

FIRST AID
HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE

IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-854-2844 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

TREATMENT FOR PET POISONING
If an animal eats this bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting baiting and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures by animals), wash aspiration with either soaps or gastric lavage. Subtle symptoms, if present, would be the result of central excitations and should be treated accordingly through administration of an ondansetron or dextrose.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read the entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or non-target animals to rodenticides. To help prevent exposure:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are filled, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled or unconsumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used whenever children, pets, non-target animals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys harrisoni), Golden mouse (Ochrotomys nuttalli), Polynesian rat* (Rattus exulans), Meadow vole* (Microtus pennsylvanicus), White-throated woodrat* (Neotoma albigula), Southern plains woodrat* (Neotoma micropus), and Mexican woodrat* (Neotoma mexicana). This product must be used in and within 100 feet of non-man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures includes homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet of structures as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Burned baiting with Fastrac Place Pacs is prohibited.

Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, or food- or feed-handling equipment, or milk or meat-handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

KILLS RATS, MICE, AND MEADOW VOLES*
Norway rats, Roof rats and House mice cease feeding after consuming a toxic dose.

KILLS ANTICOAGULANT-RESISTANT NORMAL RATS, ROOF RATS AND HOUSE MICE
Norway rats, Roof rats and House mice cease feeding after consuming a toxic dose.

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01%
OTHER INGREDIENTS: Contains Denatonium Benzoate

KEEP OUT OF REACH OF CHILDREN CAUTION
See Side Panels for First Aid and additional precautionary statements.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep closed and away from other chemicals.

PESTICIDE DISPOSAL: Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING: Nonreturnable container. Do not re-use or refill this container. Offer for recycling, if approved waste disposal facility.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

MADE IN USA

DIRECTIONS FOR USE (Continued from other panel)
Do not sell this product in individual containers totaling less than 4-pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles* will most likely find and consume the bait. Generally these areas are along walls, by grouted openings, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from sun and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
Rats: Apply 1 to 2 place pacs per placement (usually at intervals of 15 to 36 feet). Adjust the amount of bait applied to the level of rodent feeding expected at each bait placement.

Mice and Meadow Voles*: Apply 1 place pac per placement. Spaces placements at intervals of 8 to 12 feet in infested areas. Up to two place pacs may be used at points of extremely high mouse or meadow voles activity.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night’s feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Using gloves, collect and properly dispose of all bait, exposed animals and other bait. To discourage reinfestation, limit sources of robust food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

PRECAUTIONARY STATEMENTS
Hazardous to Humans and Domestic Animals
CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/managing PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-tailed woodrat, Southern plains woodrat, and Mexican woodrat.

TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.
