RESTRICTED USE PESTICIDE
DUE TO AQUATIC TOXICITY, AVIAN HAZARD, ACUTE ORAL TOXICITY AND EYE CORROSIVITY HAZARD
For retail sale to and use only by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.

SUPPLEMENTAL LABELING FOR SPECIAL LOCAL NEED IN WASHINGTON
FOR DISTRIBUTION AND USE ONLY WITHIN KITTITAS COUNTY IN THE STATE OF WASHINGTON*

Supracide™ 2E
EPA REG. NO. 10163-236 / EPA SLN NO. WA-000006

This label for Supracide 2E expires and must not be distributed or used in accordance with this SLN Registration after 12/31/2016.

For Use on Timothy or Timothy-Alfalfa Stands Grown in Kittitas County Only and intended Primarily for Exported Hay or for Use on Timothy stands intended for Seed Production Purposes Only within the State of Washington to Control Grass Scale (Eriococcus insignis), Thrips, and Spider Mites

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail).

* Refer to the General Information section of this label.
Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.
This label must be in the possession of the user at the time of pesticide application.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR INSECT CONTROL, CROP INJURY, AND/OR ILLEGAL RESIDUES.

General Information
As a conditional-use provision of this 24(c) labeling, the application of Supracide 2E on timothy or timothy-alfalfa stands intended primarily for haying, green chopping, or grazing for horses shall be restricted to Kittitas County, Washington.

Timothy or Timothy-Alfalfa Stands
Apply at a rate of 2 pts to 4 pts per acre in a minimum of 10 gallons of water per acre with ground equipment or 2 gallons of water per acre by air.

Chemigation: Do not apply this product through any type of irrigation system.

Bees: This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or broadleaf weeds. Do not apply this product or allow it to drift to blooming alfalfa or broadleaf weeds. Apply as a pre-bloom spray, or control bloom prior to application.

WSDA’s Aquatic Advisory: This pesticide is toxic to fish, aquatic invertebrates, oysters, shrimp, mammals and extremely toxic to birds. Supracide should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information.
regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

Restrictions: To avoid illegal residues, (1) Do not apply within 21 days of harvest. (2) Do not allow any animal which will enter the human food chain to graze on timothy or timothy-alfalfa treated with methidathion. (3) Do not apply Supracide 2E at a rate exceeding 4 pints per acre (1 lb. ai/A) per cutting.

Do not apply within 25 feet of lakes, reservoirs, permanent streams, natural ponds, marshes or estuaries when applying at 2-4 pts (0.5-1.0 lb ai) Supracide 2E per acre using ground equipment. Do not allow spray to drift from the application site and contact people, structures people occupy at any time and the associated property, parks and recreation areas, non-target crops, aquatic and wetland areas, woodlands, pastures, rangelands or animals.

For groundboom applications, apply with nozzle height no more than 4 feet above the ground or crop canopy and when wind speed is 12 mph or less at the application site as measured by an anemometer. Use medium or coarser spray according to ASAE 572 definition for standard nozzles or VMD for spinning atomizer nozzles. Shut off sprayer when turning at end rows.

When applying with aerial equipment, do not apply within 150 feet of lakes, reservoirs, permanent streams, natural ponds, marshes or estuaries. For aerial applications, the boom width must not exceed 75% of the wingspan or 90% of the rotary blade. Use upwind swath displacement and apply only when wind speed is 3-10 mph as measured by an anemometer. Use medium or coarser spray according to ASAE 572 definitions for standard nozzles or VMD for spinning atomizer nozzles. If application includes a no-spray zone, do not release spray at a height greater than 10 feet above the ground or the crop canopy.

The applicator also must use all other measures necessary to control drift.

Plastic containers – WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.
