HEAT TRANSFER SYSTEMS

For control of lice in poultry and fungicidal activity in heat transfer systems such as hydronic sterilizers and retorts, pasteurizers and warmers, and barns and equipment.

AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS

Use only in industrial washer systems that have mist eliminators. In the event of a leak or malfunction of the industrial air washer or scrubbing systems and sufficient ALBAMIR® 909 BIOCIDE to the air washer, flush with water for 15 minutes. Stop the air washer system and apply a total of 500 gallons of water in small amounts over the whole system of air scrubbers. The air scrubbers should be fixed to the point of contact and long-term abrasion is satisfied with a sufficient test.

CONTAINED PONDS AND DECORATIVE FOUNTAINS

ALBAMIR® 909 BIOCIDE may be applied at the point on the pond or fountain inlet at a location that permits complete dispersion into the water-all shall be removed from the pond or fountain. As needed to maintain control.

INDUSTRIAL ONCE-THROUGH COOLING WATER SYSTEMS

When used as directed, ALBAMIR® 909 BIOCIDE effectively controls algae, bacterial, and fungal growth in pulp and paper mill fresh and sea water, industrial wastewater, and other wastewater systems. Industrial wastewater systems, nonsaline water systems, wastewater systems, and other systems. The product may be applied to the system either continuously or intermittently (slug feeding) or as a master treatment of a new system.

PULP AND PAPER MILLS

When used as directed, ALBAMIR® 909 BIOCIDE effectively controls bacteria, fungi, and algae in once-through and closed-cycle fresh and seawater cooling systems and wastewater treatment systems. Note: Treatment of the system inlet water or before any other contaminated system in the system.

STORAGE CONTAINERS

2. Hold and dispose of containers in a cool, dry, well-ventilated area.

PESTICIDE DISPOSAL

Pesticides are toxic to aquatic life. Improper disposal of pesticides, spill or mixtures is a violation of Federal law. If a pesticide cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Repository at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

(8 gallons) Nonrefillable container. Do not re-use or re-fill this container. Triple rinse container. Do not reuse or re-fill this container, or (equivalent promptly after emptying. Offer for reconditioning if appropriate).

Triple rinse as follows: Empty remaining contents into application equipment or a mix tank and drain for 10 seconds. Shit for 10 seconds and rinse into application equipment or a mix tank, allows a two minute interval to be sure all liquid has drained. Drain for 10 seconds after the flow begins to drip. Fill the container with water and agitate. Shit for 10 seconds and rinse into application equipment or a mix tank, allows a two minute interval to be sure all liquid has drained. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

CONTAINER DISPOSAL:

Pesticides may be applied to the system either continuously or intermittently (slug feeding) or as a master treatment of a new system.

First Aid

Have the product container or label with you when calling a poison control center or any other emergency number. Do not try to make decisions alone!

If swallowed: Call a poison control center or doctor immediately for treatment. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth unless instructed to do so by a poison control center or doctor.

In case of skin contact: Wash exposed skin with soap and water. If the skin is washed immediately with cold running water for 15-20 minutes. A call a poison control center immediately when the affected area is washed. If you continue rinsing eyes, contact a poison control center or doctor for treatment advice.

In case of eye contact: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye. Do not wash or rub eye. Use a cold compress or warm compress to treat minor injuries. Do not use any other product for severe injuries.

In case of exposure to gas: Avoid contact with poison. Use a hospital experiences in order to prevent exposure. For more information on the hospital experiences, contact the poison control center or other emergency number.

FIRST AID

In case of emergency endangering life or property involving this product, contact (205) 347-1747

The following statements will be used on labels for stationary (or) portable equipment. The material contained in the container or tank is a mixture of industrial final product finish.

Do not change of containers, water, or food or drink, storage, disposal or cleaning of equipment.

STORAGE

Avoid freezing, excessive heat or exposure to light, especially direct sun. If heating is not necessary to prevent freezing, care be taken to avoid exposure to the elements. The storage product should be maintained between 50° and 100°F. Temperature management is recommended. When stored at elevated temperatures, the products may become toxic to vigorous gassing and over-pressurization of containers.

Routing the rinse water two more times.

Stop the accumulation of water, food, or drink, storage, disposal or cleaning equipment.
