AGRICULTURAL USE REQUIREMENTS

Use this product in accordance with its labeling and with the Water Protection Plan guidelines (Division 170). This Standard can be used to control mildew with the protection of agricultural workers on farms, forests, nurseries, greenhouses, and horticulture of agricultural pesticides. It also contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The restrictions in this box only apply to uses of this product that are covered by the Water Protection Plan guidelines (Division 170). Due to the nature of the product, pesticide exposure to agricultural workers can occur in any degree. This product, when used as directed, is not intended to be used in areas where restricted entry intervals (REIs) of 4 hours exist. PPE required for early entry (as defined in the label) is not required for any other application. The following requirements apply to all use of this product, regardless of the lake's presence. DS may be applied in the treated area as a second application. It is an admitted fact that the use of this product, regardless of the lake's presence, will and that involves contact with anything that has been treated, such as plants, soil, water, or other substance. Therefore, the use of PPE may vary from one application to another. The material may be used for this application for the lake, but not for the treatment of sensitive areas, including ponds, ditches, streams, and smaller water bodies. Do not use this product in such a manner that it will come in contact with any part of the lake's surface. This is especially important in lakes with nutrient concentrations that are 20 or greater. Pesticides should be used in such a manner that they will not drift onto sensitive areas, including ponds, ditches, streams, and smaller water bodies.

NON-AGRICULTURAL USE REQUIREMENTS

The following requirements apply to the use of this product that are covered by the Water Protection Plan guidelines (Division 40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, greenhouses, or horticulture.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for minutes.
- Remove any contact lenses, if present, after the first 5 minutes.
- Continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

IF SKIN:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

NOTES:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment.
- In the event of a medical emergency, you may also contact the National Poison Information Center at 1-800-222-1222.

DIRECTIONS FOR USE

READ ENTIRE LABEL BEFORE USING

GROUND APPLICATION ONLY

Do not apply this product through any type of irrigation system.

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or by drift. Only properly trained handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulations.

First Aid

Read all labels and follow directions carefully. Avoid contact with skin, eyes, and mouth. No special equipment or methods of disposal are needed. Keep out of reach of children.

Storage and Disposal

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL

PECTIN STORAGE: Store product in original container in a cool, dry place, out of direct sunlight. If stored above 80°F, the color of the product can change, but it is still acceptable for use. Do not store in metal or aluminum containers. Avoid contact with water. The use of this product may be disposed of on site at or approved waste disposal facilities. Pesticide containers are recyclable. Follow instructions on the label.

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

NOTES:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment.
- In the event of a medical emergency, you may also contact the National Poison Information Center at 1-800-222-1222.

 Environmental Hazards

This product is toxic to fish. Shrimp and crabs may be killed at application rates on this label. Do not apply where these are important resources. Do not apply to dikes, levees, or other structures. Do not apply directly to water, or areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when dispersing the product. Do not apply where runoff is likely to occur. Do not apply where weather conditions favor drift from areas treated. Apply only product as specified on this label.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store product in original container in a cool, dry place, out of direct sunlight. If stored above 80°F, the color of the product can change, but it is still acceptable for use. Do not store in metal or aluminum containers. Avoid contact with water. The use of this product may be disposed of on site at or approved waste disposal facilities. Warranty Statement

This product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with the directions for use. The manufacturer and/or distributor of this product are not responsible for the use of this product contrary to the label instructions, or under abnormal conditions not reasonably foreseeable to the manufacturer and/or distributor and the buyer assumes the risk of any such use.

NOTE: Greenhouse and Outdoor Ornamentals: Environmental factors significantly affect phytotoxicity. While ECO E-RASE has been tested on numerous ornamental plants without causing serious toxicity, because of the inherent variability of ornamentals, no guarantees can be given that the product will be treated at the appropriate use rate (as indicated above) under the anticipated growing conditions and for phytotoxicity for plant species being treated. A large number of plants may be treated. ECO E-RASE can be combined in the spray tank with other pesticides, but because not all combinations have been tested, be sure to test the tank mix combination in small quantities on only a few plants. If the tank mix combination is found to be acceptable, then do not use a tank mix combination. If ECO E-RASE is combined in the spray tank with other pesticides, the most restrictive label requirements apply.
