Nufarm
Weedone® LV6 EC
Broadleaf Herbicide

WEED AND BRUSH CONTROL IN SMALL GRAINS, FIELD CORN, RANGELAND, PASTURES, ROADSIDES AND FENCEROWS

ACTIVE INGREDIENT:
2,4-Dichlorophenoxyacetic acid, isooctyl ester* ........................................ 86.6%
OTHER INGREDIENTS: .................................................. 13.4%
TOTAL: .................................................. 100.0%

*2,4-Dichlorophenoxyacetic acid equivalent 57.5% by weight or 5.4 lbs./gal. Isomer specific by AOAC method No. 978.05

KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE INSIDE BOOKLET FOR FIRST AID AND ADDITIONAL PRECAUTIONARY STATEMENTS

For Chemical Spill, Leak, Fire, or Exposure, Call CHEMTREC (800) 424-9300
For Medical Emergencies Only, Call 877-325-1640

Manufactured By
Nufarm Americas Inc.
150 Harvester Drive
Burr Ridge, IL 60527

EPA REG. NO. 71368-11
EPA EST. NO. 228-IL-1
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid breathing vapors or spray mist. Do not get in eyes, on skin or on clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE):
Applicators and other handlers must wear: long-sleeved shirt and long pants, waterproof gloves, shoes plus socks and protective eye wear.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. After each day of use, clothing or PPE must not be reused until it has been cleaned.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d) (4-6)], the handler PPE (personal protective equipment) may be reduced or modified as specified in the WPS.

For containers over 1 gallon but less than 5 gallons, mixers and loaders who do not use a mechanical system (probe and pump) to transfer the contents of this container must wear coveralls or chemical-resistant apron in addition to the other required PPE.

For containers of 5 gallons or more, a mechanical system (probe and pump) must be used for transferring the contents of the container. If the contents of a non-refillable pesticide container is emptied, the probe must be rinsed before removal. If the mechanical system is used in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4)] the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Get medical attention, preferably an ophthalmologist.

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-325-1840 for emergency medical treatment information.

NOTE TO PHYSICIAN

No specific antidote is available. All treatments should be based on observed signs and symptoms of distress in the patient. Overexposure to materials other than this product may have occurred.

This product contains petroleum distillates. If large amounts, greater than 1 mg/kg body weight have been ingested, the stomach should be evacuated by gastric intubation with the aid of a cuffed endotracheal tube to prevent aspiration of petroleum distillates. After removal of stomach contents, wash stomach by instilling 30 to 50 grams of activated charcoal in 3 to 4 ounces of water through the stomach tube and again remove stomach contents. Avoid oily laxatives.
ENVIRONMENTAL HAZARDS

This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and non-target plants. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Do not apply when weather conditions favor drift from treated areas. Do not use the same spray equipment for other purposes unless thoroughly cleaned. Do not contaminate water used for irrigation or domestic purposes. Do not apply this product directly to, or permit spray mist to drift onto cotton, okra, grapes, tomatoes, fruit trees, vegetables, flowers or other desirable crop or ornamental plants which are susceptible to 2,4-D herbicide. Do not apply near susceptible plants since very small quantities of the 2,4-D will cause severe injury during the growing or dormant periods. Crops contacted by sprays or spray drift may be killed or suffer significant stand loss with extensive quality and yield reduction. Do not apply when a temperature air inversion exists. Such a condition is characterized by little or no air movement and an increase in air temperature with an increase in height. In humid regions a fog or mist may form. An inversion may be detected by producing a smoke column and checking for a layering effect. If questions exist pertaining to the existence of an inversion, consult with local weather services before making an application. Use coarse sprays to minimize drift. Do not apply with hollow cone type insecticide or other nozzles that produce fine spray droplets. Drift from aerial or ground application may be reduced by: (1) applying as near to the target as possible in order to obtain coverage; (2) by increasing the volume of spray mix per acre; (3) by decreasing the pounds of pressure at the nozzle tips; (4) by using nozzles which produce a coarse spray pattern; (5) by not applying when wind is blowing toward susceptible valuable plants. At high air or ground surface temperatures, vapors from this product may injure susceptible plants.

MIXING AND LOADING: Most cases of ground water contamination involving phenoxy herbicides such as 2,4-D have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D pesticides at such sites to prevent contamination of ground water supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent ground water contamination.

DIRECTIONS FOR USE

It Is A Violation Of Federal Law To Use This Product In A Manner Inconsistent With Its Labeling. Read entire label before using this product. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil or water is: coveralls, waterproof gloves, shoes plus socks and protective eye wear.

GENERAL CAUTIONS AND RESTRICTIONS

Do not apply this product through any type of irrigation system. Do not use in or near a greenhouse.

MIXING INSTRUCTIONS

Add 1/2 the required amount of water to the spray tank, then add this product with agitation, and finally, the balance of the water with continued agitation. This material forms an emulsion in water, not a solution. This tends to separate on standing. Provide agitation to prevent such separation and insure uniform spray mixtures.

COMPATIBILITY

If this herbicide is to be tank mixed with fertilizers or with other pesticides, compatibility should be tested prior to mixing. To test for compatibility, use a small container and mix a small amount (0.5 to 1 quart) of spray, combining all ingredients in the same ratio as the anticipated use. If any indications of physical incompatibility develop, do not use this mixture for spraying. Indications of incompatibility usually will appear within 5 to 15 minutes after mixing.

Read and follow the label of each tank mix product used for precautionary statements, directions for use, geographic and other restrictions.
COMBINATION WITH LIQUID NITROGEN FERTILIZER

Use 1/3 to 1/2 pint of this product per acre for weeding and feeding corn, small grains or grass pastures as directed on this label. Use fertilizer at rates recommended by supplier or Extension Service Specialist.

Fill the spray tank about half full with the liquid fertilizer, then add this product with vigorous agitation, and complete filling the tank with fertilizer. Apply immediately and continue agitation in the spray tank during application. Application during very cold weather (near freezing) is not advisable. Do not allow mixture to stand overnight. Incompatibility may be encountered with some fertilizer brands or under some environmental conditions. If in doubt, test a small sample in the dilution ratio planned for application.

NOTE: Fertilizers can increase foliage contact burn of herbicides. Reducing the fertilizer rate and concentration will reduce the hazard of leaf burn.

GENERAL INFORMATION

This product contains isooctyl ester of 2,4-D, the original and one of the best low volatile esters. In cropland, this herbicide is more effective than amines for controlling hard-to-kill weeds such as bindweed, thistle, smartweeds, wild garlic, curled dock, tansy ragwort and wild onions.

INJURY TO CROPS FROM THIS HERBICIDE MAY OCCUR. IF YOU ARE NOT PREPARED TO ACCEPT SOME DEGREE OF CROP INJURY, DO NOT USE THIS PRODUCT.

Crop varieties vary in response to 2,4-D and some are easily injured. Apply this herbicide to varieties known to be tolerant to 2,4-D. If you are uncertain concerning tolerant varieties or local use situations that may affect crop tolerance to 2,4-D, consult your seed company, state Agricultural Extension Service or qualified crop consultant for advice.

GENERAL WEED LIST

ANNUAL AND BIENNIAL WEEDS

annual yellow sweetclover
*beggarticks
buckthorn
coffee weed
*common broomweed
common burdock
common cocklebur
common evening primrose
croton (Texas or woolly)
hairy galinsoga
jimsonweed

*knotweed
*mallow (venice, dwarf, little)
marsh elder
*morning glory (common, ivy, woolly)
mustards (except blue mustard)
pepperweeds (except perennial)
*pigweeds (Amaranthus spp.)
prickly lettuce
*nippleweed (common, giant)
rough fleabane
*Russian thistle

PERENNIAL WEEDS

*alfalfa
*bindweed (hedger, field & European)
blue lettuce
*Canada thistle
catnip
chicory
*dandelion
*dogbanes
*goldenrod
*ground ivy
*hawkweed (orange)
*healall
*heary cress
*Jerusalem - artichoke
*many-flowered aster
*mexican thistle

*nettles (including stinging)
plantains
sowthistle (perennial)
*tansy ragwort
*venus
*western ironweed
*wild garlic
*wild onion

*These species may require repeat applications and/or use of the higher rate recommended on this product label even under ideal conditions for applications.

**Control of pigweeds in the High Plains area of Texas and Oklahoma may not be satisfactory with this product.

SPECIFIC USE DIRECTIONS

CEREAL GRAINS: WHEAT, BARLEY AND RYE (not underseeded with legumes)

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Postemergence Annual and biennial weeds</td>
<td>1/3 to 1-1/3 pints* 2/3 to 1-1/3 pints*</td>
<td>Apply after grain is well tilled (usually about 4 to 8 inches high) but before boot. Do not spray grain in boot to dough stage.</td>
</tr>
<tr>
<td>Perennial broadleaf weeds</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

SPECIFIC USE DIRECTIONS
CEREAL GRAINS: WHEAT, BARLEY AND RYE (not underseeded with legumes)(continued)

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wild onion or garlic</td>
<td>1 to 1-1/3 pints*</td>
<td>Apply 1 pint when grain is well tilled and wild garlic or onion plants are small. Apply 1-1/3 pints after harvest in the crop stubble. For control of new fall growth of wild onion or garlic, refer to FALLOWLAND use directions.</td>
</tr>
<tr>
<td>Emergency Weed Control in Wheat Perennial broadleaf weeds</td>
<td>2 pints*</td>
<td>Apply when weeds are approaching bud stage, but do not spray grain during the boot to dough stage. The 2 pints per acre application can produce injury to wheat. Balance the severity of your weed problem against the possibility of crop damage. Where perennial weeds are scattered, spot treatment is suggested to minimize the extent of crop injury.</td>
</tr>
<tr>
<td>Preharvest</td>
<td>2/3 to 1-1/3 pints*</td>
<td>Apply when grains are in the hard dough stage to suppress large weeds that may interfere with harvest. Best results will be obtained when soil moisture is sufficient to induce succulent weed growth.</td>
</tr>
</tbody>
</table>

*Use the lower rate if small annual and biennial weeds are the major problem. Use the higher rate if perennial weeds or annual and biennial weeds are present which are in the hard-to-kill categories as determined by local experience. The higher rates increase the risk of grain injury and should be used only where the weed control problem justifies the risk of grain damage. Do not apply to grain in the seedling stage.

Note: Maximum rate 1 pint/acre from jointing to before boot stage. Treatment at this growth stage (jointing to before boot) should be used where such increased risk of injury to crop is acceptable. Higher rates listed on this label are more likely to cause crop injury.

RESTRICTIONS AND LIMITATIONS FOR USE ON CEREAL GRAINS

• For aerial application on grain: Apply this product in 2 or more gallons of water per acre.
• For ground application: A minimum of 10 to 15 gallons of water per acre is recommended for proper spray coverage.
• Do not mix with oil for crop uses.
• Do not permit dairy animals or meat animals being finished for slaughter to forage treated grain fields within 2 weeks after treatment.
• Do not feed treated straw to livestock if a preharvest treatment or emergency treatment as described above is applied.

FIELD CORN

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preplant</td>
<td>2/3 to 1-1/3 pints</td>
<td>To control emerged broadleaf weed seedlings or existing cover crops prior to planting corn, apply 7 to 14 days before planting. Do not use on light, sandy soil, or where soil moisture is inadequate for normal weed growth. Use high rate for control of less susceptible weeds or cover crops such as alfalfa.</td>
</tr>
<tr>
<td>Preemergence</td>
<td>1-1/3 to 2 pints</td>
<td>To control broadleaf weeds and suppress annual grasses, apply 3 to 5 days after planting, but before corn emerges. Use high rate on soil high in organic matter. Do not use on light, sandy soil, or where soil moisture is inadequate for normal weed growth.</td>
</tr>
<tr>
<td>Postemergence Annual broadleaf weeds</td>
<td>1/3 pint</td>
<td>Avoid spraying just after corn leaves unfold as injury may occur. Apply when weeds are small and corn is less than 8 inches tall. If corn more than 8 inches tall must be sprayed, use drop pipes. Spray when weeds are in the bud to bloom stage. If corn is more than 8 inches tall, use drop pipes to keep spray off corn leaves. Do not spray corn from tassel to dough stage. 2,4-D may make corn brittle. Winds or cultivation may cause stalk breakage while brittle.</td>
</tr>
<tr>
<td></td>
<td>1/2 pint</td>
<td></td>
</tr>
<tr>
<td>Preemergence Perennial broadleaf weeds</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Preharvest</td>
<td>2/3 to 1-1/3 pints</td>
<td>After the hard dough (denting) stage, to suppress weeds that interfere with harvest such as bindweed, cocklebur, dogbane, jimsonweed, ragweed, sunflower and velvetleaf, and to decrease production of weed seeds, spray with air or ground equipment. The high rate will be needed for tough weeds under stress.</td>
</tr>
</tbody>
</table>
RESTRICTIONS AND LIMITATIONS FOR USE ON FIELD CORN

- Do not forage or feed corn fodder for 7 days following application.

GRAIN SORGHUM (milo)

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual broadleaf</td>
<td>1/2 pint</td>

<td></td>
<td>and the emergence of the soybean plant.</td>
</tr>
</tbody>
</table>

RESTRICTIONS AND LIMITATIONS FOR USE IN SOYBEANS (PRE-PLANT)

- Do not apply this product prior to planting soybeans if you are not prepared to accept the results of soybean injury including possible loss of stand and yield.
- Do not apply this product when weather conditions such as temperature, air inversions, or wind favor drift from treated areas to susceptible plants.
- Apply no more than 1-1/3 pints of this herbicide per acre in one season prior to planting soybeans.
- Do not mow or cultivate weeds prior to treating with this herbicide as poor control may result.
**GRASSES GROWN FOR SEED PRODUCTION**

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual broadleaf weeds</td>
<td>2/3 to 1 pint</td>
<td>Apply to established stands in the spring before the seed head comes into the boot stage. Do not spray in boot stage of growth. In seedling grasses apply in the spring after the grass has tillered or has at least 5 leaves but before the boot stage. Use only the low rate on seedling grasses. <strong>DO NOT USE IN CALIFORNIA</strong></td>
</tr>
<tr>
<td>Biennial and Perennial broadleaf weeds</td>
<td>1-1/3 to 2 pints</td>
<td></td>
</tr>
</tbody>
</table>

**REstrictions and Limitations for Use on Grasses for Seed Production**

- Do not graze dairy animals or cut forage for hay within 7 days of application.

**WEEDS AND BRUSH IN PASTURES, RANGELAND AND FALLOWLAND, ESTABLISHED GRASS PASTURES AND RANGELAND**

<table>
<thead>
<tr>
<th>WEEDS IN CROP</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Established Grasses and Rangeland Annual broadleaf weeds</td>
<td>1-1/3 pints</td>
<td>Apply when weeds are small and actively growing and prior to bud stage. Do not apply to newly seeded areas until grass is well established. Do not apply when grass is in the boot to milk stage if grass seed production is desired. Bentgrass and legumes may be injured by this treatment.</td>
</tr>
<tr>
<td><strong>Perennial and biennial broadleaf weeds</strong></td>
<td>2 to 2-2/3 pints</td>
<td></td>
</tr>
<tr>
<td>Sand sage, sagebrush, shinnery oak and other 2,4-D susceptible woody species</td>
<td>2/3 to 2-3/4 pints</td>
<td>Apply aerially to brush in 2 or more gallons of water per acre. One gallon of fuel oil may be included in the mixture. Consult state or local brush control specialists for most effective rate, volume and timing of spray applications.</td>
</tr>
</tbody>
</table>

<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual broadleaf weeds</td>
<td>2/3 to 1-1/3 pints</td>
<td>Use the lower rate when weeds are small (2 to 3 inches tall) and growing actively. Use the higher rate on older and drought-stressed plants.</td>
</tr>
<tr>
<td>Biennial broadleaf weeds</td>
<td>2/3 to 1-2/3 pints</td>
<td>Spray while musk thistles or other biennial species are in the seedling to rosette stage, and before flower stalks are initiated. The lower rate can be used in spring during rosette stage. In fall or after flower stalks have developed, use the highest rate</td>
</tr>
<tr>
<td><strong>Perennial broadleaf weeds</strong></td>
<td>1-1/3 to 4 pints</td>
<td>Spray weeds in bud to bloom stage, or in good vegetative growth. Do not disturb treated area for at least 2 weeks after treatment, or until weed tops are dead.</td>
</tr>
<tr>
<td>Wild garlic or onions</td>
<td>2-2/3 to 4 pints</td>
<td>Apply to new regrowth of wild onion or garlic which occurs in the fall following harvest of small grains, soybeans, corn or grain sorghum.</td>
</tr>
</tbody>
</table>

**RESTRICTIONS AND LIMITATIONS FOR USE ON Pastures, Rangeland, AND FALLOW LAND**

- For ground application, a minimum of 10 to 15 gallons of water per acre is recommended for proper spray coverage.
- For aerial application, use a minimum of 2 gallons of water per acre.
- Do not graze animals on treated areas within 7 days after treatment.
- Do not cut grass or hay within 30 days after application.
- Do not permit dairy animals or meat animals being finished for slaughter to forage treated fields within 3 days of slaughter.
- Do not plant treated fallow land until 3 months after treatment or until chemical has disappeared from soil.
FENCEROWS, ROADSIDES, VACANT LOTS, AIRFIELDS, RAILROAD, HIGHWAY AND UTILITY RIGHTS-OF-WAY, AND OTHER NON-CROP AREAS.

RESTRICTIONS AND LIMITATIONS FOR USE IN NON-CROP AREAS

• For aerial application to solid stands of susceptible brush, use 1-1/3 to 2-2/3 quarts in 3 to 12 gallons volume per acre. 2 to 4 quarts of fuel oil may be included in this mixture.

Applications will be less effective when conditions such as deficient soil moisture reduce brush growth.

TANK MIXTURES FOR NON-CROP AREAS

WEEDONE® LV6 EC AND GARLON® 4 OR GARLON® 3A Tank Mixtures for Non-Crop Areas

<table>
<thead>
<tr>
<th>WEEDS</th>
<th>AMOUNT OF WEEDONE® LV6 EC PER ACRE</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual broadleaf weeds</td>
<td>1-1/3 to 2-2/3 pints</td>
<td>Apply when most weeds are still young and growing vigorously.</td>
</tr>
<tr>
<td>Perennial and biennial</td>
<td>2 to 3 pints</td>
<td>Apply when weeds are actively growing and near the bud stage, but before flowering. For best results on tansy ragwort and musk thistle, treat in rosette stage, before bolting. A second application is usually needed for best results on thistle, nettle and bindweed. Treat wild onion or garlic in early spring and in fall when they are young and growing actively.</td>
</tr>
<tr>
<td>Cattails and tules</td>
<td>1-1/3 quarts</td>
<td>Mix 1-1/3 quarts of this product per acre in 2 quarts kerosene or diesel oil then add this mixture to 100 gallons of water. This may require 300 to 500 gallons of water per acre, depending on the stand. The addition of a wetting agent such as SURFEL® spray adjuvant is suggested.</td>
</tr>
<tr>
<td>Woody plants</td>
<td>2/3 to 3/4 gallons</td>
<td>Apply preferably through low volume equipment such as DIRECTA-SPRAY®, WOBBLE®, MINI-WOBBLE® or SPIROMETER®. Treat when 2,4-D susceptible species are in full leaf and growing actively. Repeated applications, oil or wetting agent and/or high volume spraying (300 to 500 gallons of water per acre) may be needed for acceptable control of some species or if brush is dense.</td>
</tr>
</tbody>
</table>

(continued)
TANK MIXTURES FOR NON-CROP AREAS
WEEDONE® LV6 EC AND GARLON® 4 OR GARLON® 3A Tank Mixtures for Non-Crop Areas (continued)

SMALL AREA APPLICATIONS FOR NON-CROP USE
For control of broadleaf weeds in small non-crop areas with hand held or back-pack sprayers mix 2-2/3 fluid ounces of this herbicide per gallon of water. Thoroughly wet all weed foliage. Maintain agitation of mixture to prevent separation.

FOREST MANAGEMENT
CONIFER RELEASE
To control alder, apply 2-3/4 to 2 quarts of this product in 9-1/2 to 15 gallons of water per acre as a foliage spray. Usually 1-1/3 quarts of this herbicide per acre is sufficient to provide good alder control with minimum conifer injury. Treat when 3/4 of the brush foliage has attained full size leaves and before new conifer growth reaches 2’ in length. This is usually between late May and early June. Adjust treatment date depending on stage of growth of conifers and brush species. This may cause leader deformation on exposed firs, but they should overcome this during the second year after spraying.

To control tanoak, madrone, ceanothus, canyon live oak, and manzanita, and to release Douglas fir, hemlock, Sitka spruce or grand fir, apply 2 quarts of this product plus 3 quarts fuel oil in 8-1/2 to 10 gallons of water per acre before new growth on Douglas fir is 2” long.

To control manzanita and ceanothus in ponderosa pine, apply 3 quarts of this product before pine growth begins in spring.

To control hazel brush in the Lake states, apply 1-2/5 quarts of this product in 6 to 25 gallons of water per acre when new shoot growth of hazel is complete (usually mid-July).

In northern areas, if possible conifer injury can be tolerated, 1 to 2 quarts of this product applied aerially in 8 to 25 gallons of water per acre after conifers such as jack pine, red pine, black spruce, and white spruce have hardened off (usually mid-July) will provide control of competing hardwoods including alder, aspen, birch, hazel and willow.
SITE PREPARATION

Budbreak Spray: To control alder and other susceptible species before planting forest seedlings, apply 1-2/5 to 2-3/5 quarts of this product in 9 to 15 gallons of water per acre plus 2 quarts of fuel oil per acre after alder buds break, but before foliage is 1/4 full size.

Foliation Spray: To control alder before planting forest tree seedlings, apply 1-2/5 quarts of this product plus 2 quarts fuel oil in 9 to 15 gallons of water per acre after most alder leaves are full size.

Consult your regional or extension forester or state herbicide specialist for recommendations to fit local conditions.

This product will either kill, control or suppress the weeds listed in the label booklet for this product. Some of these species may require repeat spot applications even under ideal conditions.

Maximum Seasonal Application Rate to non-crop and forestry sites is 4 pounds 2,4-D Acid equivalent per acre per application site.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in original container in a dry, secured storage area. Keep container tightly closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law and may contaminate ground water. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse or equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY DISCLAIMER

The directions for use of this product must be followed carefully. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, (1) THE GOODS DELIVERED TO YOU ARE FURNISHED “AS IS” BY MANUFACTURER OR SELLER AND (2) MANUFACTURER AND SELLER MAKE NO WARRANTIES, GUARANTEES, OR REPRESENTATIONS OF ANY KIND TO BUYER OR USER, EITHER EXPRESS OR IMPLIED, OR BY USAGE OF TRADE, STATUTORY OR OTHERWISE, WITH REGARD TO THE PRODUCT SOLD, INCLUDING, BUT NOT LIMITED TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, USE, OR ELIGIBILITY OF THE PRODUCT FOR ANY PARTICULAR TRADE USAGE. UNINTENDED CONSEQUENCES, INCLUDING BUT NOT LIMITED TO INEFFECTIVENESS, MAY RESULT BECAUSE OF SUCH FACTORS AS THE PRESENCE OR ABSENCE OF OTHER MATERIALS USED IN COMBINATION WITH THE GOODS, OR THE MANNER OF USE OR APPLICATION, INCLUDING WEATHER, ALL OF WHICH ARE BEYOND THE CONTROL OF MANUFACTURER OR SELLER AND ASSUMED BY BUYER OR USER. THIS WRITING CONTAINS ALL OF THE REPRESENTATIONS AND AGREEMENTS BETWEEN BUYER, MANUFACTURER AND SELLER, AND NO PERSON OR AGENT OF MANUFACTURER OR SELLER HAS ANY AUTHORITY TO MAKE ANY REPRESENTATION OR WARRANTY OR AGREEMENT RELATING IN ANY WAY TO THESE GOODS.

LIMITATION OF LIABILITY

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, IN NO EVENT SHALL MANUFACTURER OR SELLER BE LIABLE FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, OR FOR DAMAGES IN THEIR NATURE OF PENALTIES RELATING TO THE GOODS SOLD, INCLUDING USE, APPLICATION, HANDLING, AND DISPOSAL. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MANUFACTURER OR SELLER SHALL NOT BE LIABLE TO BUYER OR USER BY WAY OF INDEMNIFICATION TO BUYER OR TO CUSTOMERS OF BUYER, IF ANY, OR FOR ANY DAMAGES OR SUMS OF MONEY, CLAIMS OR DEMANDS WHATSOEVER, RESULTING FROM OR BY REASON OF, OR RISING OUT OF THE MISUSE, OR FAILURE TO FOLLOW LABEL WARNINGS OR INSTRUCTIONS FOR USE, OF THE GOODS SOLD BY MANUFACTURER OR SELLER TO BUYER. ALL SUCH RISKS SHALL BE ASSUMED BY THE BUYER, USER, OR ITS CUSTOMERS, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S OR USER’S EXCLUSIVE REMEDY, AND MANUFACTURER’S OR SELLER’S TOTAL LIABILITY SHALL BE FOR DAMAGES NOT EXCEEDING THE COST OF THE PRODUCT.

If you do not agree with or do not accept any of directions for use, the warranty disclaimers, or limitations on liability, do not use the product, and return it unopened to the Seller, and the purchase price will be refunded.

(RV102005-S)
WEEDONE® LV6 EC BROADLEAF HERBICIDE
WEED AND BRUSH CONTROL IN SMALL GRAINS, FIELD CORN, RANGELAND, PASTURES, ROADSIDES
AND FENCEROWS

ACTIVE INGREDIENT:
  2,4-Dichlorophenoxyacetic acid, isooctyl ester* ............................................. 86.6%

OTHER INGREDIENTS: .......................................................................................... 13.4%

TOTAL: ............................................................................................................. 100.0%

*2,4-Dichlorophenoxyacetic acid equivalent 57.5% by weight or 5.4 lbs./gal. Isomer specific by AOAC method No. 978.05

KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE ATTACHED BOOKLET FOR ADDITIONAL PRECAUTIONARY STATEMENTS

For Chemical Spill, Leak, Fire, or Exposure, Call CHEMTREC (800) 424-9300.
For Medical Emergencies Only, Call (877) 325-1840.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid breathing vapors or spray mist. Do not get in eyes, on skin or on clothing.

FIRST AID
IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Get medical attention, preferably an ophthalmologist.

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
You may also contact 1-877-325-1840 for emergency medical treatment information.

NOTE TO PHYSICIAN
No specific antidote is available. All treatments should be based on observed signs and symptoms of distress in the patient. Overexposure to materials other than this product may have occurred.

This product contains petroleum distillates. If large amounts, greater than 1 mg/kg body weight have been ingested, the stomach should be evacuated by gastric intubation with the aid of a cuffed endotracheal tube to prevent aspiration of petroleum distillates. After removal of stomach contents, wash stomach by instilling 30 to 50 grams of activated charcoal in 3 to 4 ounces of water through the stomach tube and again remove stomach contents. Avoid oily laxatives.

DIRECTIONS FOR USE
It Is A Violation Of Federal Law To Use This Product In A Manner Inconsistent With Its Labeling. Read entire label before using this product.
Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

STORAGE AND DISPOSAL
STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in original container in a dry, secured storage area. Keep container tightly closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal law and may contaminate ground water. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse or equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
