**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**

CORROSIVE. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin or clothing. Wear goggles or face shield, protective clothing and rubber gloves. May be fatal if swallowed or inhaled. Do not breathe spray mist (or vapor). Wear a dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C). Harmful if absorbed through the skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARD**

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL OR CHEMICAL HAZARDS**

Do not use or store near heat or open flame.

**SPILL OR LEAK PROCEDURES**

Small spills may be mopped up or flushed away with water or absorbed on some absorbent material and incinerated.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product can be used in combination with other EPA registered organic and inorganic wood preservatives, or it may be used alone.

**MYCOSTAT™-QM**

For the control of mold and fungus on green or freshly cut lumber. May be used in a dip or spray application. Dilute this product in either water or mineral spirits to produce a 0.5% to 3.0% active quaternary ammonium compound solution. Seasonal variation in storage and shipping conditions, species and condition of wood should be considered in selection of end use concentrations. For effective inhibition of mold and fungus, lumber and logs must be dipped or sprayed in a manner that ensures that all surfaces are uniformly treated.

Hard woods such as Alder, Birch and Maple would require an application rate of 100 - 150 μg/cm² when stored and shipped as follows: dead packed, no paper-wrap.

Soft woods such as Fir, Hemlock and Pine would require an application rate of 150 - 200 μg/cm² when stored and shipped as follows: dead packed, no paper-wrap.

For best results, green wood should be treated immediately, at least within 24 hours after cutting or sawing. Mold and fungus growth begins immediately after cutting so delayed treatment is much less effective and requires increased chemical concentration. Green, untreated lumber should not be used for stickers.

Freshly treated lumber should not be allowed to remain unprotected in heavy rains. Drip tanks and drip aprons must be roofed, paved and drain to prevent dilution and loss of the anti-stain solution.

**TANK MIXING WITH BORATES**

Mix this product and TIM-BOR (EPA Reg. No. 1624-39) in water and stir to give a solution of the desired concentration of components.

**TANK MIXING WITH COPPER COMPOUNDS**

Mix this product with water and either ACQ-C2 EPA Reg. No. 10463-36 or ACQ-C EPA Reg. No. 10463-33. Refer to the product labels for ACQ-C and ACQ-C2 for precise mixing instructions.

**TANK MIXING WITH PROPICONAZOLE**

Mix this product with MYCOSTAT™-P (EPA Reg. No. 14061-1-0227) and dilute with water to produce a 0.5% to 3.0% quaternary ammonium compound solution. Follow the instructions on the MYCOSTAT™-P label for the appropriate concentration of propiconazole. PLEASE NOTE THIS FORMULATION IS NOT APPROPRIATE FOR PRESSURE SYSTEMS.

---

**MYCOSTAT™-QM**

A Wood Treatment Preservative

Treatment can be done by pressure, double vacuum, dip or spray-box method. Wood articles that will be protected by these treatments include millwork, construction timbers, decks, and posts.

**ACTIVE INGREDIENTS:**

Didecyl Dimethyl Ammonium Chloride .............................. 50.0%

**OTHER INGREDIENTS:**

.................................................................

**TOTAL** .......................................................... 100.0%

Contains 7.4 lbs. of product per gallon

**KEEP OUT OF REACH OF CHILDREN**

See side panel for additional precautionary statements.

**DANGER**

**First Aid**

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

**HOT LINE NUMBER:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For general product information, call Diacon Technologies Ltd. at (604) 271-8855 between the hours of 9 a.m. – 4 p.m. Pacific Time.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

## DIRECTIONS FOR USE (CONTINUED)

**DIP TREATMENT**
Stack the wood to be treated on a suitable holder and convey the stack into the treating solution making sure the stack is completely immersed. Dip time should range from 30 seconds (individual pieces) up to 30 minutes (bundled wooden articles). Use a concentration of 0.5 to 3.0% active quaternary ammonium compound. The concentration should be customized to achieve the degree of sapstain protection desired, which should be determined by an independent test on the intended species of wood.

**PRESSURE TREATMENT**
Place the article to be treated into the pressure cylinder and seal unit. Treat the wooden articles using the pressure treatment procedure consistent with the equipment being used and standard treatment practices. Treatment conditions should be such as to produce a 0.1 to 0.6 lb./cu. ft. retention in the treatment article. Such treated wood is to be used for above ground uses only.

**SPRAY-BOX APPLICATION**
For spray-box application prepare the treating solution by adding 1 gallon MYCOSTAT™-QM to 5 - 30 gallons of water. The concentration should be customized to achieve the degree of sapstain protection desired, which should be determined by an independent test on the intended species of wood. Mix thoroughly to ensure uniform composition. Application rates will vary according to wood species and moisture content, temperature, humidity, storage conditions and inoculum pressure. Ensure that the treatment conditions are such that the wood articles are uniformly covered with the treating solution. Move spray booth mixtures to ensure proper concentrations are being maintained. Contact your MYCOSTAT™-QM representative for application and monitoring advice.

**DOUBLE VACUUM**
Stack the wooden articles to be treated in the treatment vessel so that the preservative solution will have access to all sides of the articles. Seal the vessel. Reduce the pressure within the vessel to -10 in. for 5 minutes. Cover the articles with preservative solution. Allow the pressure to return to atmospheric conditions and discharge the preservative solution. Reduce the pressure to -20 in. and maintain for 20 minutes. Allow the pressure to return to atmospheric and remove treated wood articles. Treatment conditions should be used as to produce 0.1 to 0.6 lb./cu. ft. retention of DDAC in the treated article. Wood treated to this retention for above ground only use.

**PERSONAL PROTECTION EQUIPMENT FOR PRESSURE TREATMENT, DOUBLE VACUUM, DIP AND SPRAY TREATMENT**
Applicators must wear gloves which are chemical-resistant (such as butyl or nitrile) in all situations where dermal contact is expected (i.e., handling freshly treated wood and manually opening cylinder doors). Individuals who enter pressure treatment cylinders and other related equipment that are contaminated with the wood treatment solution (e.g., cylinders that are in operation or are not free of all treatment solution) must wear coveralls over a long sleeved shirt and long pants, socks, chemical-resistant footwear and protective eyewear. Federal, State and local confined space entry procedures need to be followed.

Applicators must not eat, drink or use tobacco products during those parts of the application process that may expose them to the wood treatment formulation (e.g., manually opening/closing cylinder doors, moving frames out of cylinders, mixing chemicals, handling freshly treated wood). Wash thoroughly after skin contact and before eating, drinking, use of tobacco products or using restroom. Protective clothing must be changed when it shows signs of contamination. Applicators must leave protective clothing and work shoes or boots and equipment at the plant. Wear out protective clothing and work shoes or boots must be left at the plant and disposed of in a manner approved for pesticide disposal and in accordance with State and Federal regulations.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

1) **STORAGE INSTRUCTIONS**
Open dumping is prohibited. Store in original containers and place in locked storage area. Keep from freezing.

2) **PESTICIDE DISPOSAL**
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA regional office for guidance.

3) **CONTAINER DISPOSAL**

   - **NONREFILLABLE CONTAINERS**: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into the application equipment or a mix tank. Fill the container 1/4 full of water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

   - **REFILLABLE CONTAINERS**: Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

      - To clean the container before final disposal, empty the remaining contents from the container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinseate into application equipment or rinseate collection system. Repeat this rinsing procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**NOTICE OF WARRANTY**
Dacon Technologies Ltd. warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risk inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Dacon Technologies Ltd.
