GENERAL INFORMATION

STICK-IT is a proprietary blend of terpene polymers and emulsifiers designed for use with pesticides and soluble fertilizers. This unique chemistry causes STICK-IT to form an elastic film that keeps the enclosed chemicals in contact with the plant surface. This film reduces pesticide and nutrient loss and often enhances activity of those chemicals. In addition, the STICK-IT film improves retention of pesticides and foliar feeds on plant surfaces even during rain or sprinkler irrigation.

STICK-IT will not foam, freeze, or clog nozzles, and may be applied by aircraft or ground sprayer.

STICK-IT requires at least one hour of sunlight for the film to set. Therefore it must be applied during

COMPATIBILITY

STICK-IT is compatible with most agricultural chemicals. However, a jar test is recommended before mixing it with other chemicals in large quantities.

CONDITION OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, soil, and other conditions may vary, Northwest Ag Products, Inc. and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling, whether or not in accordance with directions or suggestions to the extent consistent with applicable law.

DIRECTIONS FOR USE

To improve the activity and efficiency of pesticidal sprays apply 4 to 6 ounces of STICK-IT per acre.

To improve the absorption and retention of foliar fertilizers, apply 4 ounces of STICK-IT per acre.

For use in air blast sprayers or hydraulic gun sprayers, apply 4 to 8 ounces of STICK-IT per 100 gallons of water.

For vegetable crops, apply 4 to 16 ounces of Stick-It per acres.

Note: Do not apply to food crops within 30 days of harvest except as follows: STICK-IT can be used with copper fungicides, Bacillus thuringiensis products and other tolerance exempt pesticide on food crops up to harvest. Caution: Use of STICK-IT with these exceptions may result in visible residues on crops which may render the crops unsaleable.

MIXING INSTRUCTIONS

Fill the spray tank half full of water, then add other desired components to the tank while agitating the mixture. Premix STICK-IT with more water and add while the tank continues to fill. Agitate mixture continuously while the tank is filling.

Use clean water to rinse spray equipment immediately after spraying. Though some residue may remain in the tank, it will help prevent rusting and corrosion and will not clog nozzles next time the sprayer is used.

STORAGE AND DISPOSAL

Store in original container only. Do not contaminate water, food or feed by storage or disposal. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may be disposed of in a sanitary landfill.
